

Deconstructing <Code> in a Flash(card)

< Introduction to HCJ Coding >

Code Set Source: <https://codepen.io/gcarino/pen/LDgtn>

Let's review what we know about these three sets of written code: HTML, CSS, and JavaScript (JS).

HTML (HyperText Markup Language) provides the basic content and structure of screens, which is enhanced and modified by other technologies like CSS and JavaScript.

CSS (Cascading Style Sheet) is used to control presentation, formatting, and layout.

JavaScript is used to control the behavior of different elements and the interactions with the end user.

```
HTML
7 </head>
8 <body>
9 <div id='container'>
10 <div id='title'>
11 <h1>Learning Js Properly: Project #1 - Dynamic Quiz</h1>
12 </div>
13 <br/>
```

```
CSS
1 body {
2   font-family: Open Sans;
3 }
4
5 h1 {
6   text-align: center;
7 }
8
```

```
JS
1 (function() {
2   var questions = [{
3     question: "What is 2*5?",
4     choices: [2, 5, 10, 15, 20],
5     correctAnswer: 2
6   }, {
7     question: "What is 3*6?",
8     choices: [3, 6, 9, 12, 18],
```

1. Within which language do you find the title for the quiz below?

```
HTML
7 </head>
8 <body>
9 <div id='container'>
10 <div id='title'>
11 <h1>Learning Js Properly: Project #1 - Dynamic
Quiz</h1>
12 </div>
13 <br/>
```

```
CSS
1 body {
2   font-family: Open Sans;
3 }
4
5 h1 {
6   text-align: center;
7 }
8
```

```
JS
1 (function() {
2   var questions = [{
3     question: "What is 2*5?",
4     choices: [2, 5, 10, 15, 20],
5     correctAnswer: 2
6   }, {
7     question: "What is 3*6?",
8     choices: [3, 6, 9, 12, 18],
```

- 20

Next

4. Based on #3, what will be the correct answer to the second question, shown below?

```
HTML
7 </head>
8 <body>
9 <div id='container'>
10 <div id='title'>
11 <h1>Learning Js Properly: Project #1 - Dynamic
Quiz</h1>
12 </div>
13 <br/>
```

```
CSS
1 body {
2   font-family: Open Sans;
3 }
4
5 h1 {
6   text-align: center;
7 }
8
```

```
JS
1 (function() {
2   var questions = [{
3     question: "What is 2*5?",
4     choices: [2, 5, 10, 15, 20],
5     correctAnswer: 2
6   }, {
7     question: "What is 3*6?",
8     choices: [3, 6, 9, 12, 18],
```

Learning Js Properly: Project #1 - Dynamic Quiz

Question 2:

What is 3*6?

- 3
- 6
- 9
- 12
- 18

Answer: 4, because the correct answer is in the #4 slot (remember, the slots are designated 0-4).

Learning Js Properly: Project #1 - Dynamic Quiz

You got 4 questions out of 5 right!!!

[Start Over](#)

Answer: As you can see, it is in JavaScript!

```
HTML
7 </head>
8 <body>
9 <div id='container'>
10 <div id='title'>
11 <h1>Learning Js Properly: Project #1 - Dynamic
Quiz</h1>
12 </div>
13 <br/>
```

```
CSS
1 body {
2   font-family: Open Sans;
3 }
4
5 h1 {
6   text-align: center;
7 }
8
```

```
JS
151
152 // Computes score and returns a paragraph
element to be displayed
153 function displayScore() {
154   var score = $('<p>', {id: 'question'});
155
156   var numCorrect = 0;
157   for (var i = 0; i < selections.length; i++) {
158     if (selections[i] ===
questions[i].correctAnswer) {
159       numCorrect++;
160     }
161   }
162
163   score.append('You got ' + numCorrect + '
questions out of ' +
questions.length + ' right!!!');
164   return score;
165 }
166
167 })();
```

Learning Js Properly: Project #1 - Dynamic Quiz

You got 4 questions out of 5 right!!!

Start Over

This is just a starting point! Here are the next steps...

- Explore open source code sets from places like codepen.io
- Look at the various tags and commands in this lesson, as well as other examples. We will look at other code sets and see how they can be altered to customize your screens!

Explore the HTML code sets and try the following “hacks” for the First Card:

- Change the title of the card’s front side to MAD-learn.
- Delete the heading on the first card’s back side and add: **MAD-learn brings app development to any classroom!**
- Replace the image on the front side of the card with one you find online.
- Here’s an example:

Explore the CSS code sets and try the following “hacks” for the First Card:

- Change the background color of the card’s back to (**#005ECE**) “dark blue”.
- Change the opacity on the back of the card so that a faded image from the front side shows under the text (about 80%).
- Change the text color of the card’s back to “white” (**#FFFFFF**).
- Take away the reflective shadowing of the letters on the front side of the card.
- Here’s an example:

Further Exploration:

Explore a bit further and make at least one more change OR make similar changes to at least one more card!
