

Enabling Businesses and Professionals

Project Overview

A Business Process Parachain

78%

IT leaders report a **gap** between their team's skill level and their ability to achieve organizational goals

Source: Global Knowledge, [2020 IT Skills and Salary Report](#), 2020

“An estimated **30% of global IT jobs will be left open by 2022**, as employers compete for workers with digital skills in artificial intelligence, Internet-of-Things, blockchain, and other areas.”

Ventur

The Opportunity

Ventur - Opportunity

The Polkadot/Kusama Ecosystem is growing

In order for companies to enter the ecosystem at full speed, they will need to be able to confidently hire and upskill employees with pertinent technical expertise.

This creates demand for:

- Convenient means for hiring and contracting skilled resources
- A means of assigning and verifying technical credentials for proficiency in ecosystem technologies

Ventur

The Solution

Ventur - Project Overview

Ventur is a Substrate based blockchain that focuses on enabling businesses and professionals.

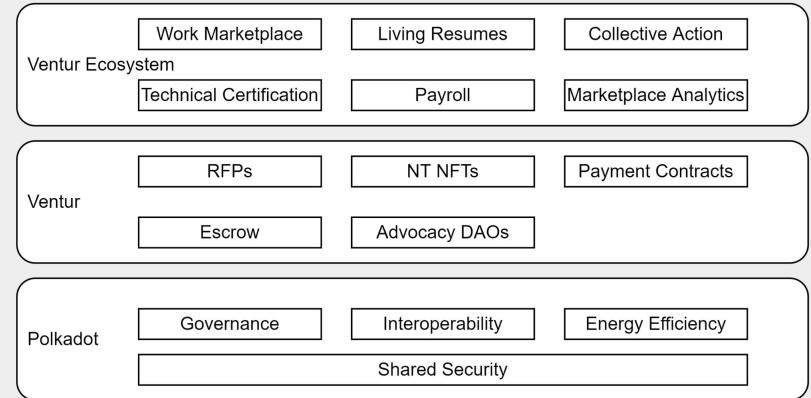

Our Grant Proposal focuses on delivering substrate modules for:

- **The RFP Process**
 - Process for requesting, accepting, and contracting work
- **NT-NFTs**
 - (Non Transferrable NFTs) Credentials like technical certifications or degrees which are tied to a single identity

Development Roadmap

Ventur

Milestones

Milestone 1: Escrow + Payment
Contracts

Milestone 2: RFP + NT-NFT

Milestone 1

Overview

Escrow Pallet

- Fund Lock Up Dedicated to RFP Process (no transfer of funds out of escrow outside of RFP payouts)
- Can enable Open Crowd Funds for Open Source Projects
- Will likely integrate with or draw from the Frame multisig pallet for RFP spend approval process

Contracted Payment Pallet

- Enable payment contracts for regular payouts over a set time frame or for an indefinite period

Milestone 2

Overview

RFP Pallet

- Request for Proposal Process
 - Request Creation
 - Bid Creation
 - Request Shortlisting
 - Bid Update
 - Bid Acceptance

NT-NFT Pallet

- Refine current mvp's storage choices and logic
- Integrate IPFS for NT-NFT content storage

Next Steps

Next Steps

- Launch Test Net for Ventur
- Create Initial dapps on Ventur
 - RFP Market
 - Hiring
 - Certification/Credentialing
 - Subscription
- Engage Corporate Partners for dapp participation as RFP requesters
- Integrate XCM to allow for cross chain assets and messages to enable parachain specific RFPs and Certifications
- Secure a Parachain Slot
