

Bitfortip

Offering Bitcoin Cash as an incentive | Earn Bitcoin Cash for being helpful

A social reward network

A laptop screen is shown in a dark, dimly lit environment. The screen displays a line graph with a blue line and a pie chart with a green slice. The text is overlaid on the screen in a white, sans-serif font. The text reads: "Bitfortip can help spread Bitcoin cash to the general public with a nice use case that is unique." The laptop keyboard is visible at the bottom of the frame.

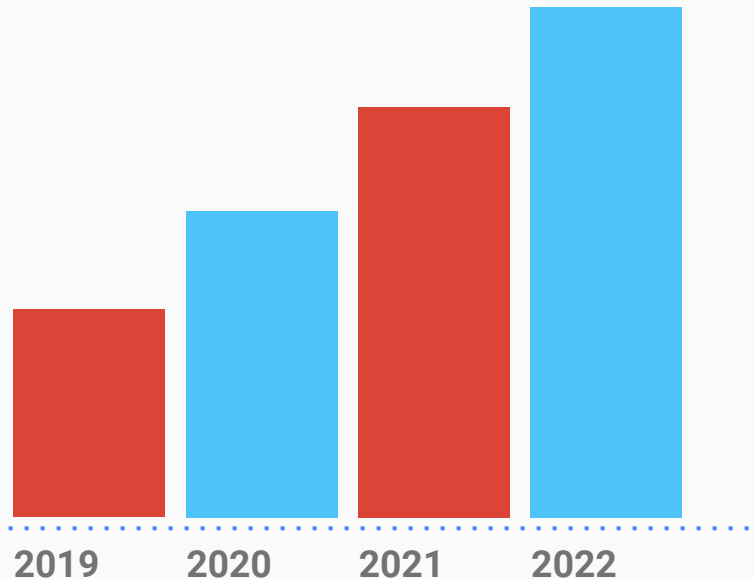

Bitfortip can help spread
Bitcoin cash to the general
public with a nice use case
that is unique.

The problem

Besides purchasing on exchange or being accepted on day to day commerce. There is no other way for people to acquire or use Bitcoin Cash.

Bitcoin adoption will only come with a killer app that is easy to use and people will find useful.

Users will increase greatly as well as demand for BCH related services.

The solution

Offering Bitcoin Cash as an incentive for people all around the world via a smartphone app where the UI is similar to Instagram.

Website version is also available.

How it will work

Use case examples

When users register they will get a unique Bitcoin Cash address, where they will be able to deposit Bitcoin Cash in order to fund their account and then offer any amount as an incentive for others to try and help them.

- Users will be able to take a picture or upload from their gallery with their smartphone (i.e a dress that they saw someone wearing on a magazine, an item on a TV show, a shoe someone wearing on the streets, e.t.c) connect it with a BCH reward of their choice, then upload it to the platform to be visible for everyone else to see.
- Ask to find a better price for an item / service. Offering \$1 in BCH as an incentive for others to try and help you find a hosting package instead of \$100 for \$90.
- Inquire to find specific information like an image/video/link with a BCH incentive.
- Market research for specific information -> 0.1 \$BCH reward for the following:
Looking for accurate data for the Bitcoin price pump between 26 and 28 of July that drove it from 9: to 11K. Largest buy order, which exchange, total volume. what buy order possibly triggered it?

In general, users will be able to post almost any inquiry they want in return for a Bitcoin tip. And each time they upload an inquiry, they can then share it online with their followers on social media like Twitter, Instagram, Facebook e.t.c so it can get more exposure. Big accounts / influencers can draw a lot of traffic.

Current numbers

- Launched in March 2015.
- Reached 50.000 registered members.
- 30+ new daily registrations.
- 500 - 600 daily visits.
- Current Alexa Rank: 420.000.
- Smartphone app downloads: 5.000+

Additional information data

- Participated in 2 tech exhibitions.
- Showcased in universities and Bitcoin meetups.
- Mentioned in multiple sources as a unique concept.
- Voted multiple times by startup tracker as one of the hottest startup for 2020.

YouTube video showcasing the platform

End of presentation
