PyCon HK 2026

Django Sprint Recap

15 November 2026

Hi, I'm Luna. Here's what we worked on at today's Django sprint.

Morning

Poypoy gets Django running

- We guided **Poypoy** through the **Django Girls tutorial**, and they got the development server running locally.
- Poypoy joined the **Cantonese translation team** on Transifex, and we nominated them as a coordinator.

Poypoy wanted to learn Django from scratch. We started with the Django Girls tutorial, and they got the server running locally.

Afternoon

Preparing to contribute

- We showed **Stanley** how to contribute translations and nominated him as a Cantonese coordinator too.
- We shared the **Django contribution tutorial** and set up a development environment.

Stanley wanted to help with translations. We showed him how to contribute and set up a Django development environment.

Afternoon

Django ticket #37490

Document how to use Django's ORM in other Python projects.

We reviewed the ticket together.

We looked at how to document using Django's ORM from a Python script outside a Django project.

Sprint update

- **Traditional Chinese (Hong Kong, zh_HK)** is available in Django's Transifex project. We can now translate the docs into Cantonese. Django Forum discussion
- The **Cantonese coordinator nominations** are awaiting approval on Transifex.
- **Stanley** opened PR #22291 for Django ticket #37490.

We can now translate the docs into Cantonese. The coordinator nominations are pending, and Stanley has opened the documentation PR.
