# Eko 15.0

Enhancement

- **Workflow data bulk export**

The option to export bulk workflow data comprised in one exported file is now available on Data store in each workflow template.
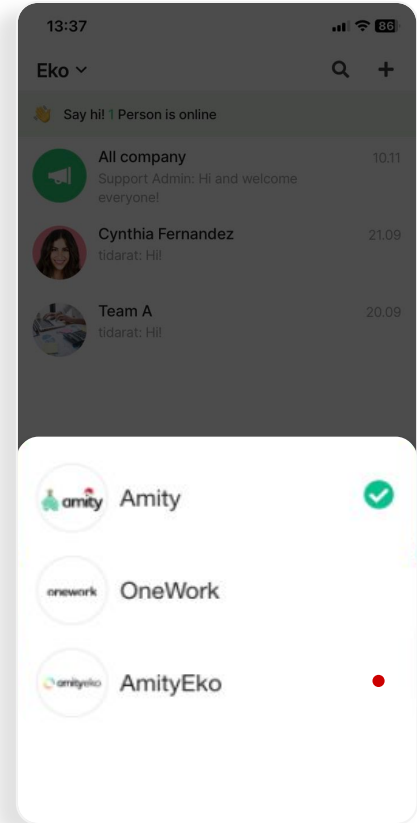

Eko 15.0

Enhancement

- **Multi-network red dot notification**

Red dot notification to notify when there is new incoming message from other networks.

Eko is a product of **Amity**

Eko 15.0

Bug fixes

- All platforms - Notification: fixed red dot notification to display for new message only
- Android & Web - Chat: fixed issue when @all does not disappear when typing to search for a particular user
- Web - Chat: fixed issue when sending an image and writing a caption while someone else is typing a message, the caption is gone
- Android - Task: fixed issue when adding picture from gallery after added assignee, the assignee that was added does not display
- Web - Notification: fixed issue when chat notification not showing real-time
- Admin Panel - Forms: fixed issue when user cannot open the file report that export from "Form Log" page
- Mobile - Check-in: fixed issue when user cannot "Share my check-in" with their manager
- Android & Web - Forms: fixed issue when forms page keeps loading
- Admin panel - Directory: fixed issue when user does not appear when add member until typing something on the search bar
- Web - Chat: fixed issue when pinned chat didn't show in the list when user would like to forward message to pinned chat
- Web - Workflow: fixed issue when required attachment field doesn't pop up the error message when the file is not attached
