

# Mission Planner

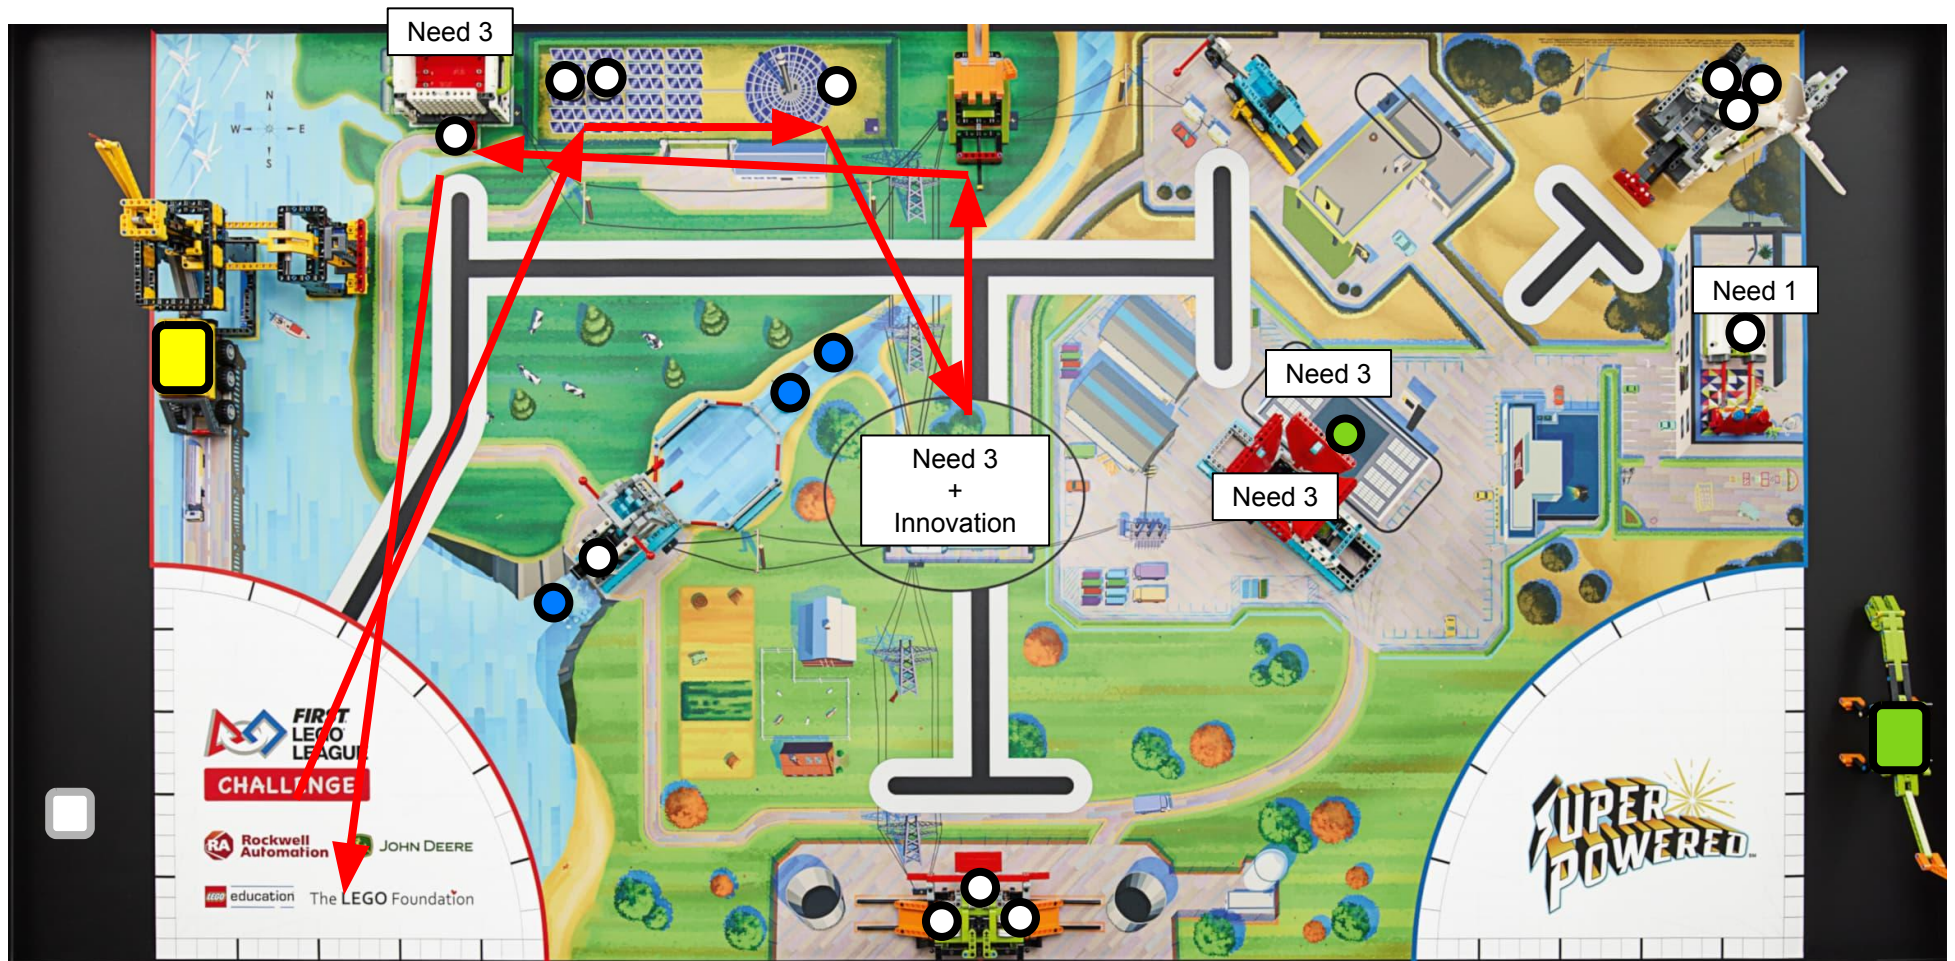

- Use slide 2 for planning, make a copy of the slide for each run
- Slide 3 onwards are example runs
  - Read them to have an idea of how to plan
  - Don't copy them; it is not a great plan
- The images for the energy units, fuel truck, etc are moveable, use them to keep track of their location

RUN:

Notes:

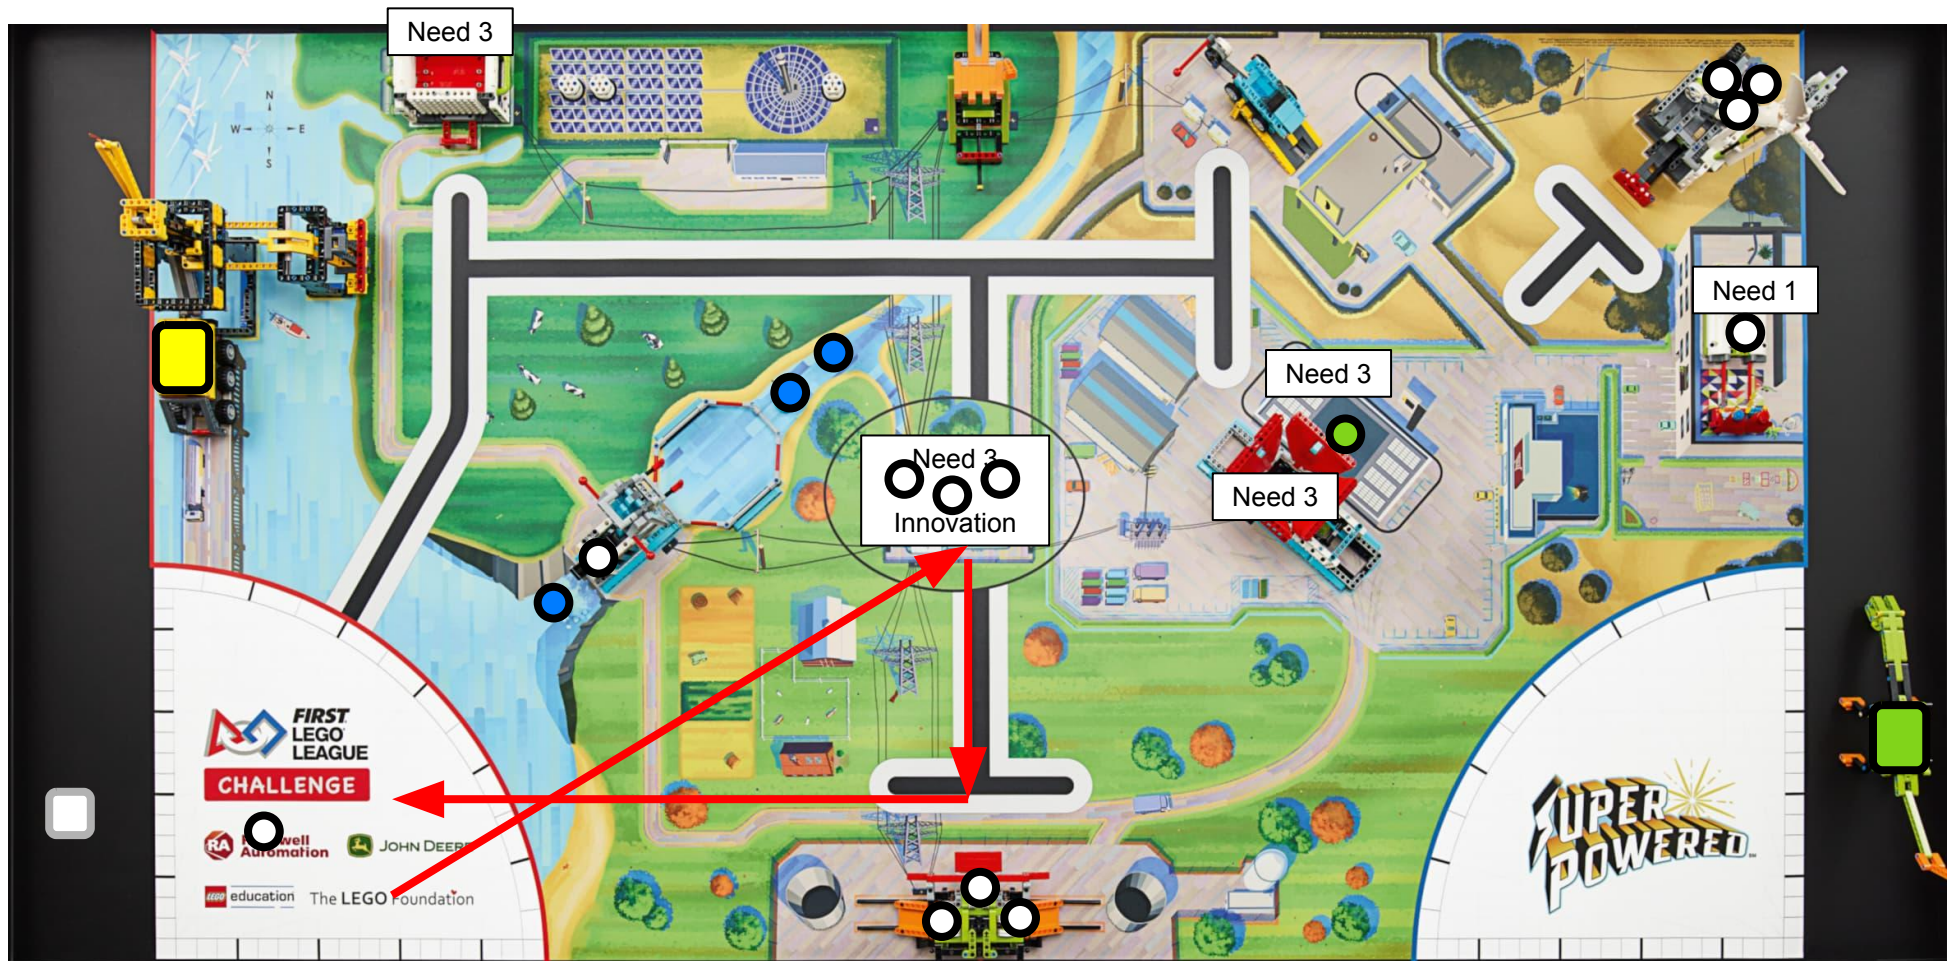

# RUN: Example run 1

## Notes:

- Move 3 blocks from solar farm (M04) to hydrogen plant (M13)
- Flip the smart grid (M05)
- Retrieve one energy unit from energy storage (M03) and bring home

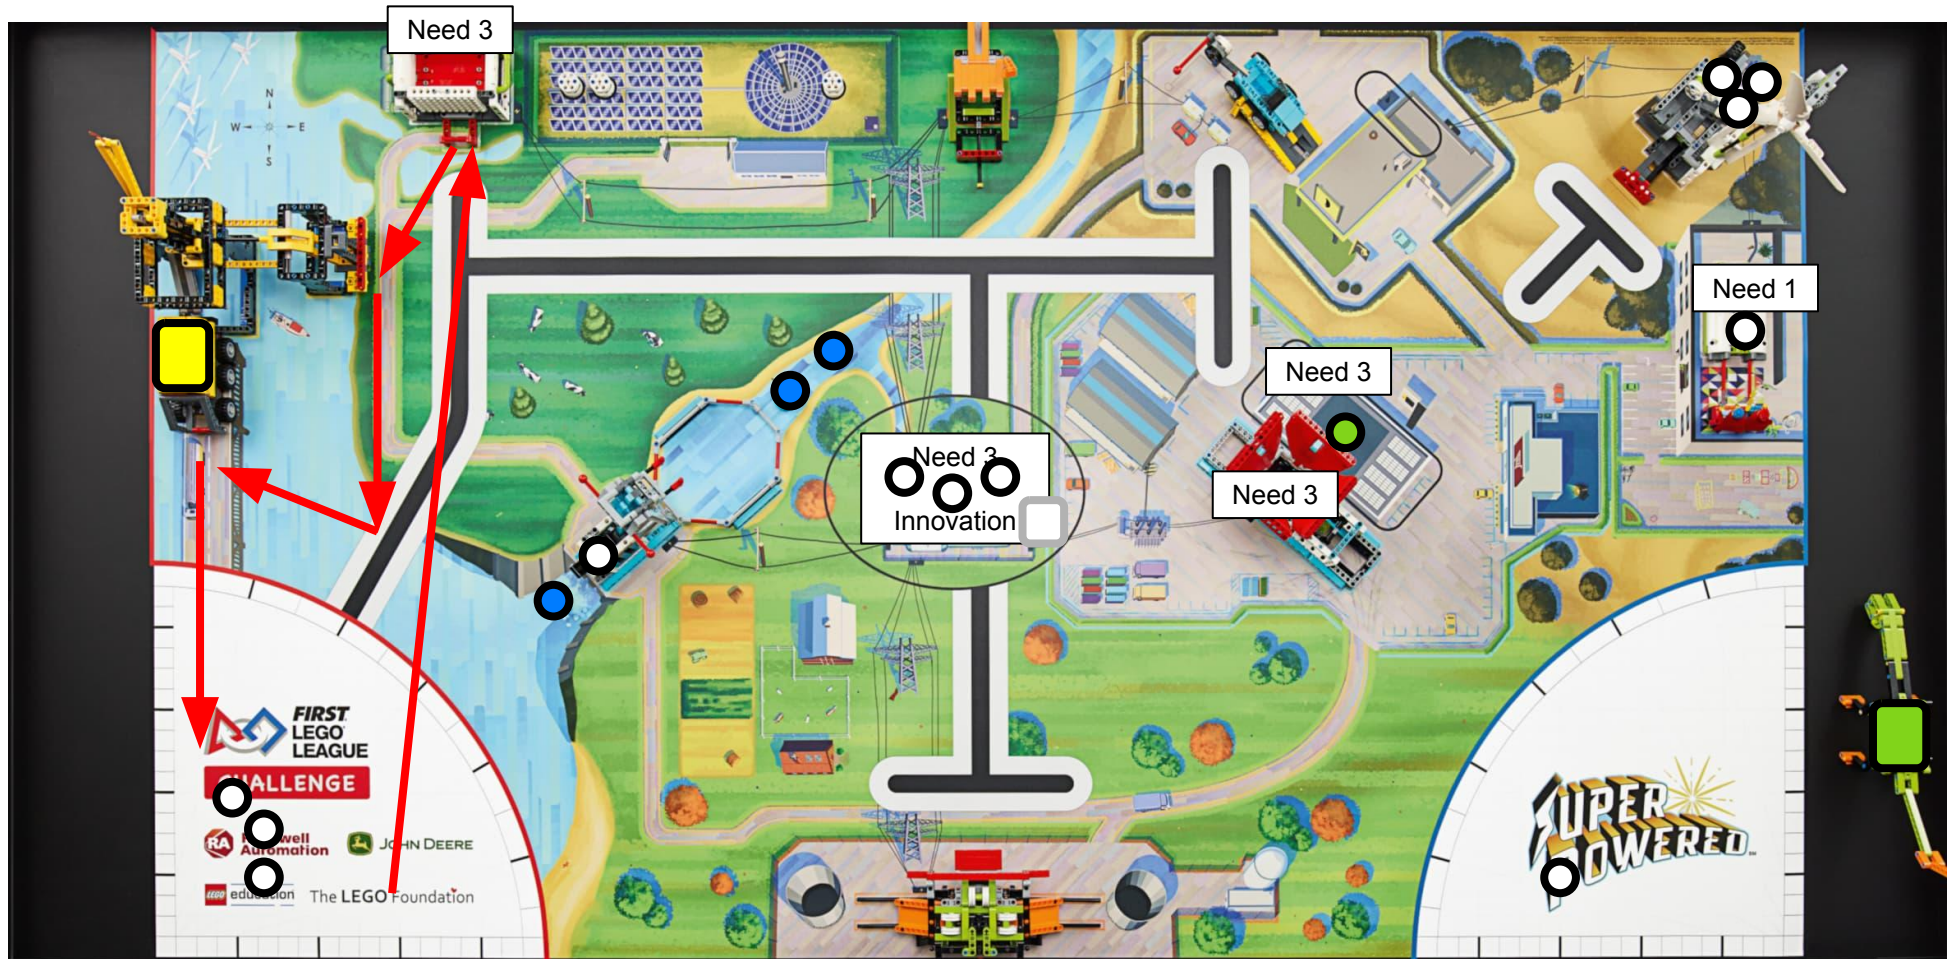

# RUN: Example run 2

## Notes:

- <Start with one energy unit in home and 3 in hydrogen>
- Put innovation project model (M01) into hydrogen plant
- Retrieve one energy unit from power plant (M10), remaining 2 should roll into east and west

# RUN: Example run 3

## Notes:

- Bring 3 energy units to energy storage (M03)
- Load fuel units into fuel truck (M02) and bring fuel truck into home
