

# **Entrepreneurship will Change Delaware (if you take part)**

@christopherwink // @technicallyDE

# Entrepreneurial Renaissance

- Post-recession jobs buildup
- R&D becomes M&A
- Resumes to be replaced with business plans
- Normalizing the act
- Fashionable trend

# **We must develop a new workforce**

- Knowledge economy requires new skills
- We choose where to be with emotions:  
where are like-minded people living?
- Innovation hubs and growth pipelines
- Heavy retention, light attraction
- Who will stay here and make it easier for the  
next wave

# Storytelling creates community

- Common Set of Facts: what does it mean to be part of the tech-entrepreneurship community of Delaware?
- Who are our leaders; what events do we attend; where do we congregate; how have we come to be?
- Technical.ly: news(letter), events, resources

# Choose

We once built companies wherever was best for the business. Increasingly, we build companies wherever is best for the people.

**We must create the best version of ourselves.**
