Using the magic of AI to help teachers!

Teachers experience burnout at high rates.

More than four in 10 K-12 teachers in the U.S. (44%) say they "always" or "very often" feel burned out at work—outpacing all other industries nationally. ([Gallup](#))

We built MagicSchool to help fight teacher burnout with AI tools!

- We are a team of lifelong teachers and principals focused on making relevant AI tools to your world!
- We're here to help lighten the load, so teachers can save their energy for where they shine best—in the classroom, in front of students.

How to Use MagicSchool Responsibly!

Check for Bias and Accuracy: AI might occasionally produce biased or incorrect content. Always double-check before sharing with students.

The 80–20 Approach: Use AI for initial work, but make sure to add your final touch, review for bias and accuracy, and contextualize appropriately for the last 20%.

Your Judgement Matters: See AI-generated content as a starting point, not a final solution. Always adhere to your school's guidelines.

Know the Limits: Our AI's knowledge stops at 2021, so be aware when dealing with recent topics.

Protect Privacy: Don't include personal student details like names or addresses. We strive to promptly remove any accidentally submitted information.
