5Rs

Retain	• Make, own, and control your own copy of the content
Reuse	• Use the content in its unaltered form
Revise	• Adapt, adjust, modify, improve, or alter the content
Remix	• Combine the original or revised content with other OER to create something new
Redistribute	• Share your copies of the original content, revisions, or remixes with others

"I look forward to buying college textbooks each semester," said no one ever.

NYS OER Funding = $8 Million

- $4 Million to SUNY
- High Enrollment, General Education Courses

Baseline funding	Individual sections	All sections of a course
$20,000	$8 per student enrollment	$15 per student

$4 Million to SUNY OER

- SUNY covers enrollments for initial sections in year 1
- Campuses develop a model to sustain OER adoption/creation (care & feeding of the puppies)
- Classes run for 3 years to ensure enrollments increase & research can be conducted
- This funding is the most any state has given to General Education OER to date

Thinking Beyond Textbooks

- Organize OER making it discoverable (Librarians + metadata standard = MAGIC
- Digital Humanities = OER (can we wrap metadata around digital assets)
- Student undergraduate research as OER
- UFS Open Access Resolution

About this Guide

Open educational resources (OER) are tools that educators can use to supplement or build a course. OER are free for anyone to reuse, revise, remix and redistribute and are a low-cost, tailored solution for faculty and students.

This guide provides an overview of OER, how and why it is used, and resources to find OER for your courses.

- An Open Educational Resource Supports a Diversity of Inquiry-Based Learning
  There have been numerous calls for research that demonstrates how open education resources (OERs) are actually being used. This case study sought to shed light on the users of a well-visited set of modular music-education materials.
