## *Keliling Persegipanjang*

$$\begin{aligned} \text{Keliling} &= 10 + 10 + 5 + 5 \\ &= 2 \times (10 + 5) \\ &= 2 \times 15 \\ &= 30 \end{aligned}$$

*Jadi Kelilingnya 30 cm*

## *Keliling Persegipanjang*

$$\begin{aligned} \text{Keliling} &= 4 + 8 + 4 + 8 \\ &= 2 \times (4 + 8) \\ &= 2 \times 12 \\ &= 24 \end{aligned}$$

*Jadi Kelilingnya 24 cm*

## *Keliling Persegipanjang*

$$\begin{aligned} \text{Keliling} &= 12 + 12 + 7 + 7 \\ &= 2 \times (12 + 7) \\ &= 2 \times 19 \\ &= 38 \end{aligned}$$

*Jadi Kelilingnya 38 cm*

## *Keliling Persegipanjang*

$$\begin{aligned} \text{Keliling} &= 15 + 8 + 15 + 8 \\ &= 2 \times (8 + 15) \\ &= 2 \times 23 \\ &= 46 \end{aligned}$$

*Jadi Kelilingnya 46 cm*

# *Keliling Persegipanjang*

$$\begin{aligned} \text{Kel}_p &= 2 \times p \times (p + l) \\ \text{Kel} &= 2p + 2l \end{aligned}$$

*Keliling Persegipanjang =  $2p + 2l$  atau  $2 \times (p+l)$*

Diketahui: Keliling ABCD 26, hitunglah panjang BC

Penyelesaian:  $8 + l = \frac{1}{2} \text{ Keliling}$

$$8 + l = \frac{1}{2} \times 26$$

$$8 + l = 13$$

$$l = 5$$

Diketahui: Keliling KLMN 20, hitunglah panjang KL

Penyelesaian:

$$p + 3 = \frac{1}{2} \text{ Keliling}$$

$$p + 3 = \frac{1}{2} \times 20$$

$$p + 3 = 10$$

$$p = 7$$

# *Keliling Persegi*

5 cm

$$\begin{aligned} \text{Keliling} &= 5 + 5 + 5 + 5 \\ &= 4 \times 5 \\ &= 20 \end{aligned}$$

*Jadi Kelilingnya 20cm*

# *Keliling Persegi*

$$\begin{aligned} \text{Keliling} &= 9 + 9 + 9 + 9 \\ &= 4 \times 9 \\ &= 36 \end{aligned}$$

*Jadi Kelilingnya 36cm*

Jika keliling persegi = 24 cm, berapa panjang tiap-tiap sisinya?

Penyelesaian:

Misal panjang tiap sisi = s

$$s + s + s + s = \textit{Keliling}$$

$$s + s + s + s = 24$$

$$4 \times s = 24$$

$$s = 24 : 4$$

$$s = 6$$

*Jadi panjang tiap sisi 6cm*

$$\begin{aligned} \text{Keliling Segitiga} &= 9 + 6 + 8 \\ &= 23 \end{aligned}$$

Jadi keliling ABC 23 cm

$$\text{Keliling Segitiga} = 8 + 10 + 6 \\ = 24$$

Jadi keliling KLM 24 cm

$$\begin{aligned} \text{Keliling Segitiga} &= 12 + 9 + 12 \\ &= 2 \times 12 + 9 \\ &= 24 + 9 \\ &= 33 \end{aligned}$$

Jadi keliling RST 33 cm

$$\begin{aligned} \text{Keliling Segitiga} &= 10 + 10 + 10 \\ &= 3 \times 10 \\ &= 30 \end{aligned}$$

Jadi keliling RST 30 cm

$$a + b + c$$

*Keliling Segitiga RST = a + b*  
**+ c**

$$AB = BC$$

Segitiga ABC SAMA KAKI

$$KL = LM$$

Segitiga KLM SAMA KAKI

$$AB=AC=BC$$

Segitiga ABC SAMA SISI

Contoh Soal:

Hitunglah keliling segitiga di bawah ini!

Perhatikan tanda berkedip!  
ABC Sama sisi!

$$\begin{aligned}\text{Keliling} &= 15 + 15 + 15 \\ &= 3 \times 15 \\ &= 45\end{aligned}$$

Jadi Keliling ABC 45 cm

Contoh Soal:

Hitunglah keliling segitiga di bawah ini!

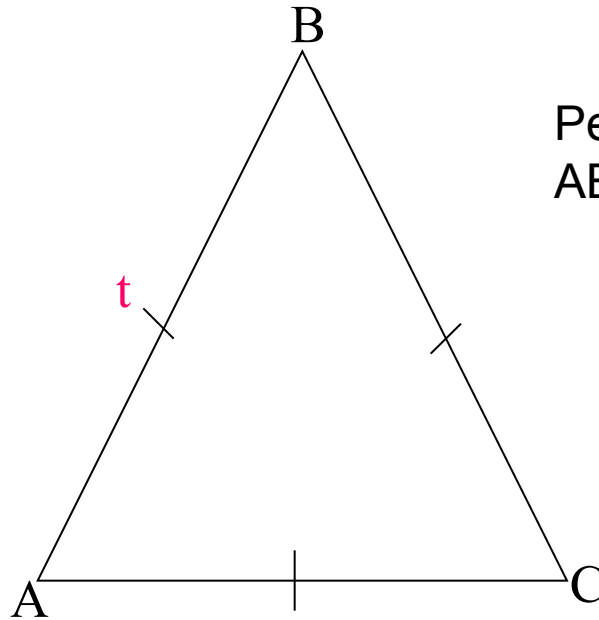

Perhatikan tanda berkedip!  
LM=MK, Jadi sama kaki.

$$\begin{aligned}\text{Keliling} &= 9 + 20 + 20 \\ &= 9 + 2 \times 20 \\ &= 9 + 40 \\ &= 49\end{aligned}$$

Jadi Keliling KLM 49 cm

Contoh Soal:

Jika keliling ABC = 18, berapa panjang AB

Perhatikan tanda berkedip!  
 $AB=BC=CA=t$  ABC Sama sisi!

$$AB + BC + CA = \text{Keliling}$$

$$t + t + t = 18$$

$$3 \times t = 18$$

$$t = 18 : 3$$

$$t = 6$$

Jadi  $AB = 6$

Contoh Soal:

Jika keliling KLM = 29, berapa panjang KM?

Perhatikan tanda berkedip!  
LM=MK=**a**, Jadi sama kaki.

LK + KM + ML = Keliling

$$9 + a + a = 29$$

$$9 + 2a = 29$$

$$2a = 20$$

$$a = 10$$

Jadi KM = 10

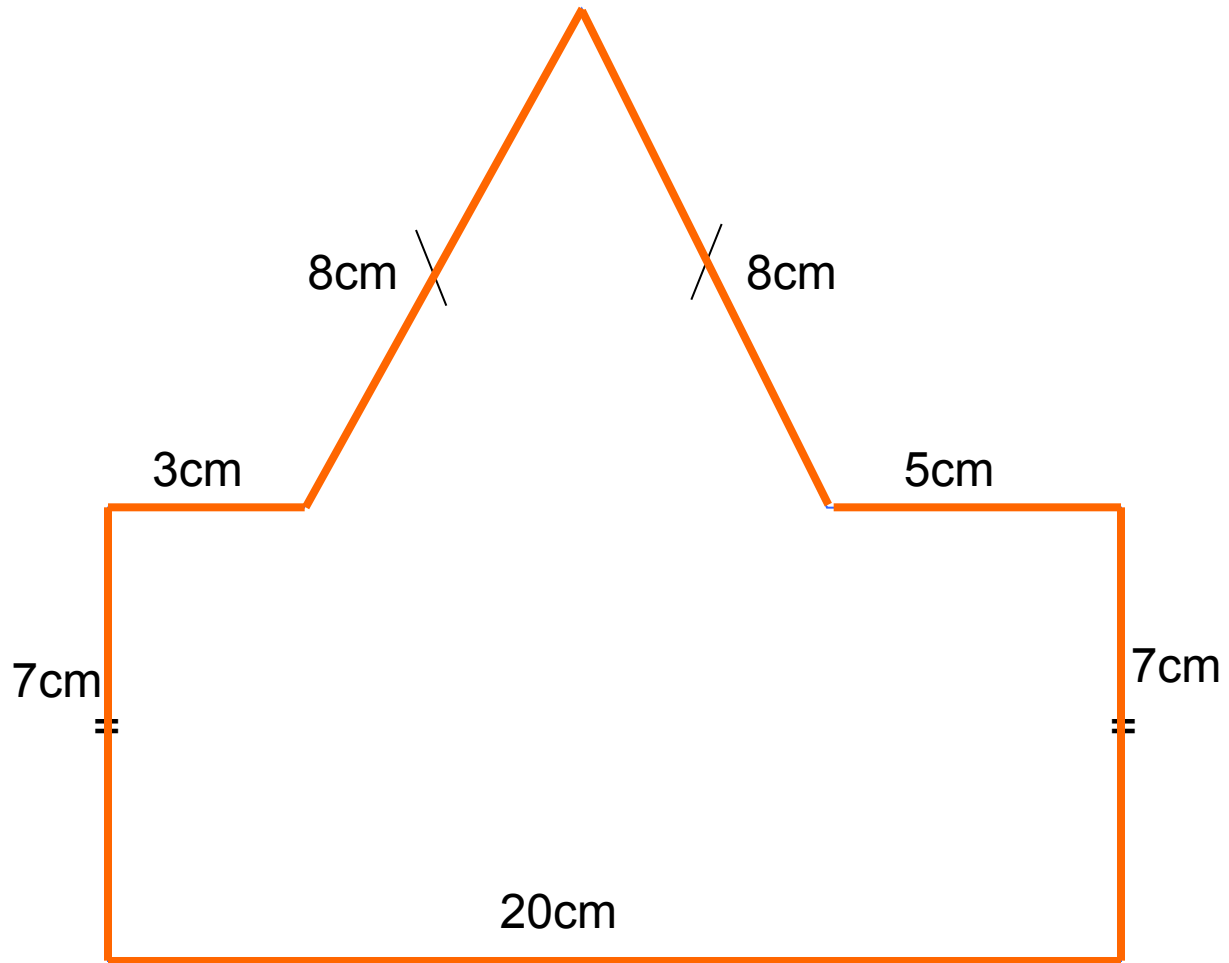

$$\text{Keliling} = 6 + 7 + 9 + 6 + (9+6) + (7+6)$$

$$\text{Keliling} = 56$$

Jadi Keliling bangun tersebut 56 cm

$$20 + 7 + 5 + 8 + 8 + 3 + 7$$

$$= 58$$

Jadi keliling bangun tersebut 58 cm
