dakotah.redstone Yesterday at 12:48 AM

Do you like crispy deep fried haddock, with tartar sauce? How about honey glazed carrots, or lava-baked potatoes? Who can ignore fresh baked rolls slathered in real dairy butter? (ok, maybe vegans... real margarine?) All are cordially invited to "unofficially" kick-off the mooc with a social-gathering [and Dak might make you work a "little" 😊] arranged around

A VIRTUAL FISHPRY IN-WORLD on Tuesday Jan. 11th 1400-1600 UTC.

If you spawn in and follow the path around the Haiku Forest there is a cyan wool portal... or you can "/warp wellwell" to near the event (a short walk down a well marked path... see I told you Dak would make you work for everything...) There will be fish to catch and villagers to trade with and crops to tend and a whole menu of food to be prepared... bring your virtual chef's hat. (and your appetite) There is an notice and RSVP in the sesh-schedule channel (If Dak figured it out...) 😊

*[note: all references to "real" food in the accompanying announcement pertain to "real" virtual foods, no offer of actual nourishment is implied nor should be inferred, actual weight gain "may" occur but is not the responsibility of the event sponsors, individual experience may vary, not a guarantee] (edited)

Dakotah is hosting a Virtual FISHFRY In-World Party on January 16th. We had a pre-party gathering tonight. January is Minecraft Month, my favorite month because of EVO! We get to hang out with Minecraft friends and cook up some language teaching ideas. Tonight, Desto and Brocketcrafter joined us in-world and it was fun to watch them play, but I realized we need a lesson on "online voice communication etiquette." Tomorrow when Vance uploads our video, we'll see why.

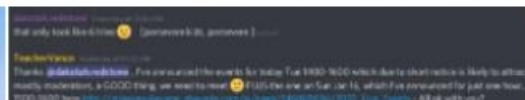

It's still not too late to join our session: EVO Minecraft MOOC 2022

http://evo2022proposals.pbworks.com/.../EVO_Minecraft... ✓

The real issue was promoting the 'unidentifiable' to speaking status in Discord. Then we found we need another rule about the kids in Discord not participating in the adult conversation (the kids were not 'hearing' the adults requesting help, but when they were asked to 'listen' for other voices, they apologized and attenuated their behavior that was preventing the 'adult' conversation). To address this problem we need to encourage the kids and adults to be in separate Discord channels in future so the one doesn't drown out the other.

When I post the recording you'll see what I mean, but we'll address this in good time in a way where all participants can meet their goals.

The image shows a Zoom meeting interface. At the top, there is a video gallery with six participants: Jane Chien, Vance Stevens, James York, Robert Swier, Robert Remmerswaal, and Robert Dykes (GR34TD3S...). Below the gallery is a window titled "Minecraft 1.17.1 - Multiplayer (3rd-party Server)". The Minecraft window shows a top-down view of a virtual world with a large wooden table and chairs. Several player avatars are seated around the table, with names like "Chien_jane", "bobbibear", "cheapshot", "Fluvi", and "dakotah_redstone" visible. A map on the left side of the Minecraft window shows the current location within the game world. At the bottom of the Zoom window, there is a chat bar that says "Chat Requires Login".

James York led a discussion on how we use Minecraft for language teaching and there was a debate going on with the just play approach or adopting teaching pedagogies such as task based learning or PPP. Interacting in-world in Minecraft while in zoom is more fun than just having discussions in zoom. 🐼🤗#EVOMC2002 #TESOLCALLIS #EVO2022

I liked how Dak crafted the table and chairs on the fly so we could all join the round table for the discussion. That could never happen in just Zoom 🤗. I've got all the videos from the conference embedded now at <https://learning2gether.net/2022/02/0>

 **Walton Burns**
By the way, everyone was correct. You cannot make NPCs in Java without a plugin, but you can leave signs or books and the plugin that is on the EVO MC server seems like it's way easier to use than vanilla Bedrock NPCs.

The image shows a video player displaying a Minecraft 1.17.1 multiplayer server. The browser address bar shows "mc.evomc.net". The game view features a player named "HeikePhilp" in a white armor set standing in a large, modern Minecraft building with blue and white walls and large windows. A chat message at the bottom of the game view reads "You are no longer AFK." The player's health and hunger bars are visible at the bottom of the game view. On the left side of the video player, there is a map overlay showing a location marked "bobbi hilp". In the top right corner of the video player, there is a small video feed of a woman named "Heike Philp". At the bottom of the video player, there is a yellow box containing the URL <https://youtu.be/h3BHX5fbZj4>. The video player interface includes a play button, a progress bar showing 7:40 / 2:58:45, and a search bar.
