

6th Math to  
7th Math  
Summer 2024

Rising 6<sup>th</sup> to 7<sup>th</sup> grader,

It is important to keep your math skills sharp. The attached packet was created to not only help you review 6<sup>th</sup> grade math skills but also help make the transition to 7<sup>th</sup> grade easier. To provide the maximum benefit, it would be best to complete one page (front/back) a week for 8 weeks of your choice over the course of the summer. I realize that things come up and some weeks it may not be possible to complete a page but there are more weeks in your summer than pages in this packet.

The material in this packet should be review and as such you should be able to complete almost all of the work independently.

The summer packet is due the first **full** day of school in August. Make sure to **document your thinking, work should be completed on these pages**. If you need more room, attach your work.

Have a great summer!  
Mrs. Woodard
