

# smart-me Pico stand

## Metal stand for the Pico EV charging station

The Pico stand is a robust and technically sophisticated stand. There is the possibility of a single or double mounting. For that purpose, an attachable stand head system is used, which can be easily exchanged. The stand is made of hot-dip galvanized and powder-coated steel and therefore corrosion-resistant. Due to the stable welding seams and robust shape, the stand is safe from vandalism. The charging cable can be suspended using an additional metal hook and unused plugs can also be stored safely and watertight using the optional cable docks integrated in the head.

### Technical Data

Mounting	Floor mounting according to OPI20 standard
Installation type	floor screw connection
Power connection	Floor guide
Safety	Grounding
Impact resistance	IK10
Material	Hot-dip galvanized and powder-coated steel
Color	RAL 9004 S
Dimensions	Stand: 1321 x 101 mm Base plate: 250 x 250 mm 1-way head: 228.6 x 117.7 mm 2-way head: 228.6 x 338.6 mm Total height screwed: 1353 mm
Weight	Stand with base plate: 15 kg way head 1x: 5,1 kg way head 2x: 7,25 kg

### Functions

- Base plate according to OPI20 standard
- Stand head system for one-sided or two-way mounting of the Pico charging stations
- Corrosion resistant
- Robust welded seams
- Metal hook for the charging cable
- Metal roof as weather protection
- Water protected screw connections

Optional:

- Cable docks for safe storage of free plugs

### Order information

Pico Stand	212070-PL
Pico Stand head 1x	212070-PL/PH1
Pico Stand head 2x	212070-PL/PH2
Pico Stand head 1x with cable dock Type 2	232070-PL/PH1
Pico Stand head 2x with cable docks Type 2	232070-PL/PH2
