- John Gray

Focus on

Learners

You are a student:

Why do you want to come to school?

What does a 'culture of learning' look like?

How do the future needs of a 21st century learner differ from today?

What makes a school healthy, both physically and emotionally?

Where is your favorite place to learn?

Educational Specifications

What are District-wide Educational Specifications (Ed Specs)?

The purpose of educational specifications is to define and communicate the district's goals and requirements for what a given facility should be to accommodate their program.

The Ed Specs are the standards that identify the type, size, number and principal features of all of the spaces that constitute a school.

What is Site Specific Programming?

The site specific programming process will test and adapt the District-wide Educational Specification to the specific goals, needs and requirements of a particular elementary school.
