Chat GPT ….

Chat AI GPT is built on upon the foundation of GPT, the language model that gained widespread attentions for its impressive ability to generate human like text language

However, while ChatGPT was primarily designed for the single-turn tasks, such as answering questions or completing AI prompts, Chat GPT takes in this capability to the next level by enabling multi-turn conversations

It is a future of tech …. You can ask countless/endless questions….

Working/Functionality

Chat GPT takes your questions or requests and quickly answers them

This tool answered your questions using its database. The model is trained using text databases from the Internet.

It contains 570 GB of data sourced from books, web texts, Wikipedia, articles, and other pieces of writing on the Internet. To be even more precise, 300 billion words have been fed into the system

It works on algorithms…

Operating Model

OpenAI trained Chat GPT using reinforcement learning from human feedback

It's a method through which a machine learns by observing human intervention to achieve a realistic result. It is based on the GPT-3.5 architecture

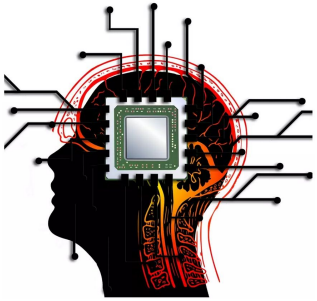

Right now, Chat GPT version 3.5 is available free of cost for all users, However the advance version 4.0 is available on paying @ $20 Per Month

Will it impact Employment Opportunities

It is an established fact that people in the content development industry will be rendered obsolete in the coming years as Al powered bots are expected to take over the writing job because they are trained to produce more human-like and error-free text than any other content producer

However, the chatbot lacks critical-thinking skills or ethical decision-making ability, which are essential for quality content. As we can see that Chat GPT can also provide "incorrect or nonsensical answers," and the company is working to fix the issue at its earliest

To Reach 1 million users:

Internet took	-	4 years
Face Book	-	3.5 years
Instagram	-	2 years
Google	-	1.5 years
ChatGPT	-	5 days
