kreo
code_

Using Scratch, present at least one concrete action you can take to help achieve the **Responsible Consumption and Production** goal.

To take on this challenge, you will need to follow certain criteria.

Content of the animation

Your animation or game should include the following elements :
❏   at least one concrete action you can take
❏   at least one backdrop
❏   at least two sprites
❏   at least one sound or audio recording

Content of your Scratch program

Your program should include the following elements :
❏   motion blocks to animate your sprites
❏   at least three speech or thought blocks
❏   at least one programming loop
❏   Make sure your animation does not exceed a maximum of 4 minutes.

Elements related to publication

To publish your project, you should:	
❏	have a meaningful title followed by ***Kreocode 20XX*** (e.g.: I recycle - Kreocode 20XX)
❏	use images, photos or sounds that are copyright free (do not use photos of personal information of students)
❏	cite any sources used in the space reserved for *Notes and Credits*
❏	pay close attention to your use of language
❏	indicate how to start your program in the *Instructions* section (if it does not start with the green flag)
❏	shart the project (* once your project is complete)
