

Audion D547 AHS Horizontal Band Sealer

Designed for fast, dependable seals - every time

The Audion 547 AHS, an upgrade from the Audion 552, is a large continuous horizontal band sealer for bag and pouch sealing applications. Designed for speed and convenience, the D547 AHS horizontal band sealer has an integrated conveyor that may be tilted down as much as 30° to facilitate easier bag handling. Adding to its feature-set, the seal head and conveyor can both be raised or lowered electrically via a motor to achieve an optimal loading height as well as seal position. These settings can be stored according to the selected recipe, ensuring fast job start-up.

Engineered for ease of use, the D547 AHS horizontal band sealer is equipped with a digital controller and display for precise temperature setting and monitoring. Additionally, it comes equipped with an automatic cool run shutdown feature that is designed to protect the seal belts and extend their life. The standard version of the band sealer comes with locking casters to make moving and securing the sealer an easy task.

This versatile continuous band sealer can be fitted with several options, including an ink jet printer and embosser. To withstand the hygienic demands of the food industry, the D547 AHS is constructed with a stainless steel frame (IP 20).

The Audion D547 AHS horizontal band sealer is an extremely reliable sealer that includes an industry-leading 3 year limited warranty. The D547 AHS is used by companies of all sizes and throughout a range of industries for hermetically sealing pouches.

For a band sealer that will last you decades, is easy to maintain, and is easy to operate, choose the Audion D547 AHS

Set-Up Benefits

- Quickly dial in sealing parameters and store up to 9 recipes
- Motorized (electrical) height adjustment of the seal head as well as the conveyor
- Adjustable seal pressure on pressure roller as well as heating and cooling jaws
- Seal speed up to 400 in/min
- Digital temperature controller with max temp of 480° F
- Conveyor lowers vertically up to 2.5" from the seal position to accommodate thick packages
- 10" wide conveyor slides out horizontally up to 4" to accommodate long bags
- Position the seal up to 1.5" down from the top of the bag

Heating and cooling bars and the V-belt used to transport the bags are easily accessed with the safety cover in the open position

User Benefits

- Straightforward user controls help assure excellent results
- Adjustable sealing head conveyor for added versatility
- Use standing or seated

Operating Benefits

- Precise controls for every function
- Requires minimal maintenance
- Ready light indicates operation within the set parameters
- Set seal position from 33" - 41" from the floor
- Seal head tilts down up to 30° for processing products with liquids
- Locking casters add mobility

Safety Benefits

- Cool run shutdown to lengthen the life of the seal belts
- Adjustable height for improved ergonomics and ease of use
- Emergency stop button ensures quick machine shutdown
- CE compliant design
