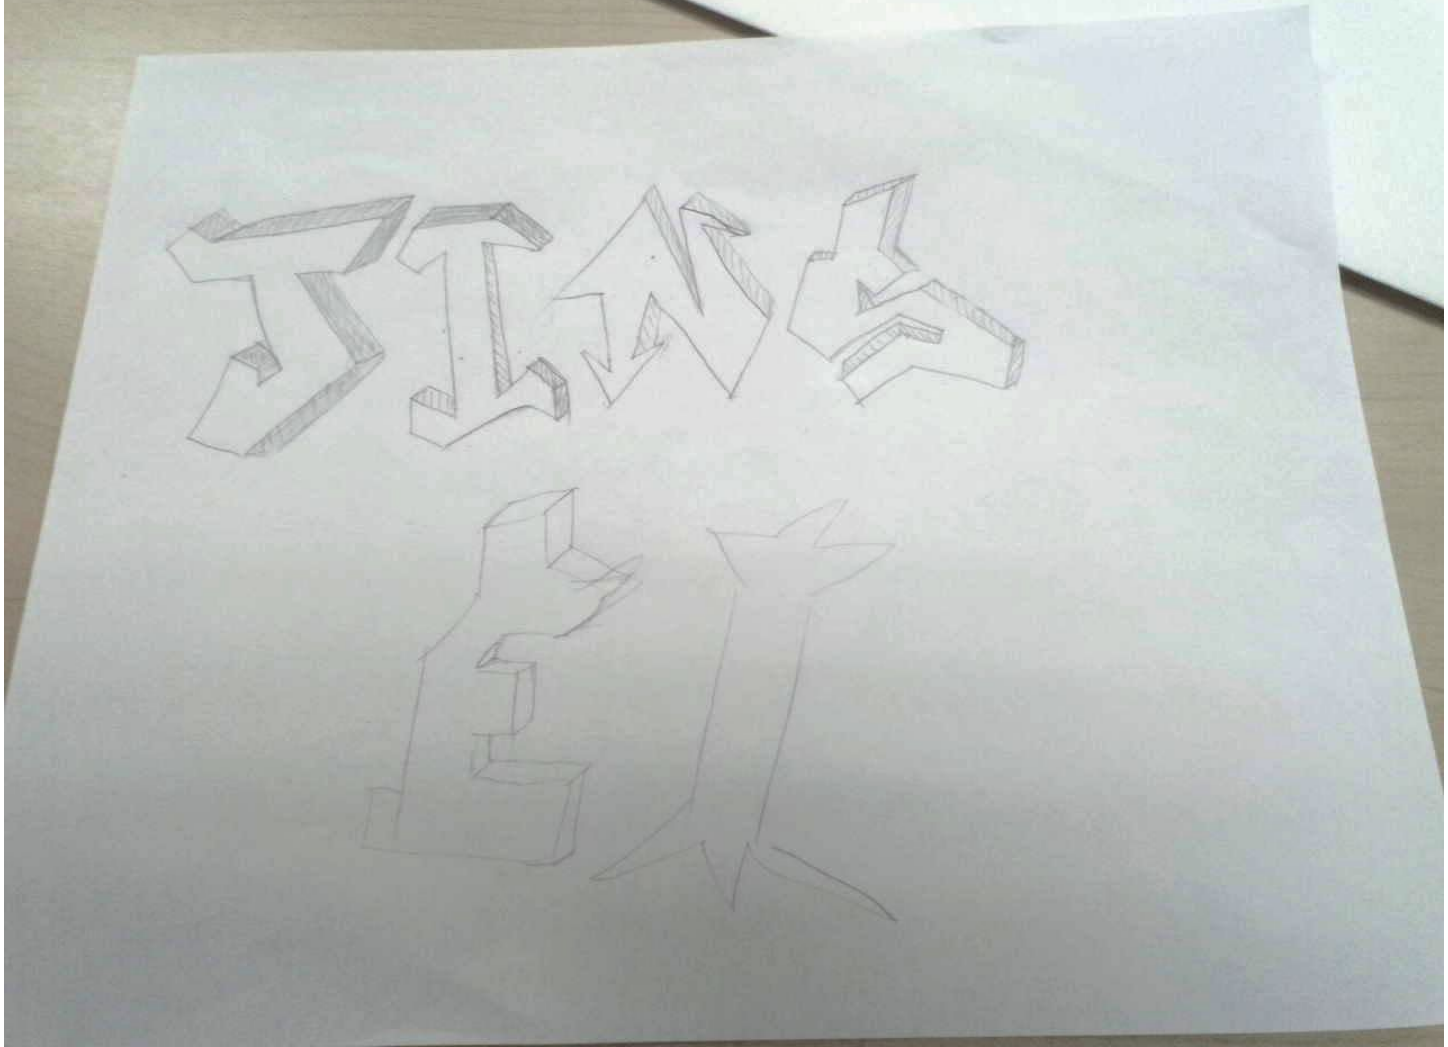
My topic sunrise
Theme start of the day

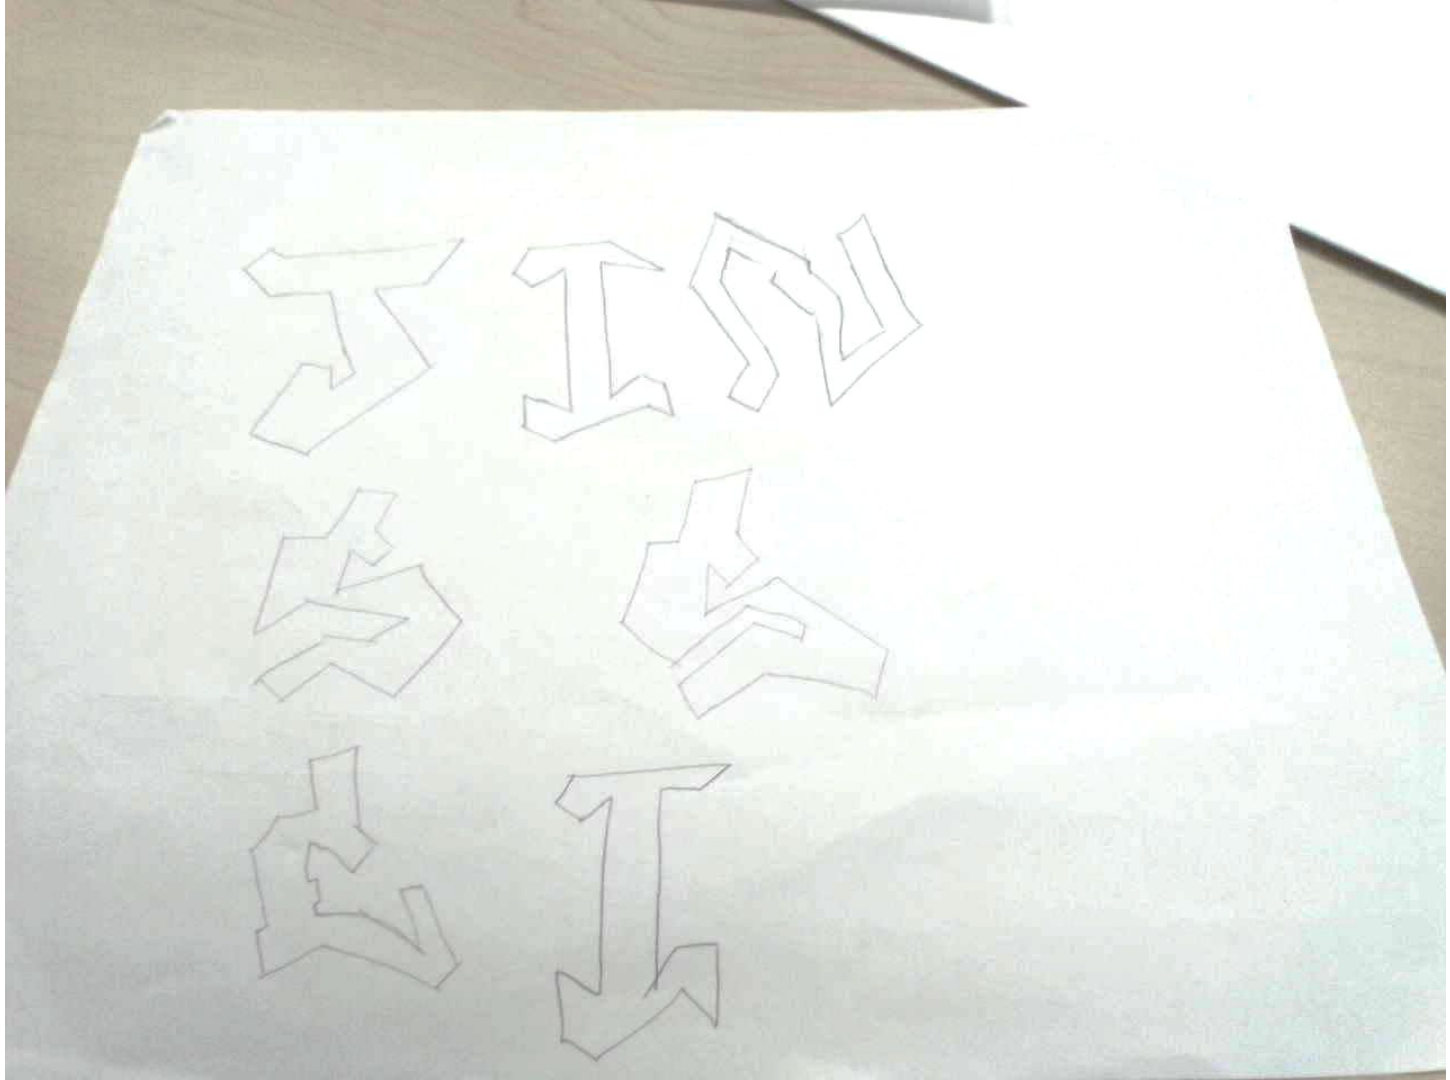
Final Artwork picture.

Theme - start of the day. sunrise.

The big idea

My big idea is start of the day because it means everything is new and chance for happiness and improvement. This idea is very important to me because every night I’m really tired and when I woke up and see the sunrise I feel beginning of the day, everything is new, and my tiredness goes away. All those reason I chose to draw sunrise.





SWEET

What are the fundamental differences between a “thoughtful” and a “thoughtless” critique?

Difference between thoughtless and thoughtful are that the meanings because thoughtful means careful/caring and thoughtless means they don’t care/don’t think deeply and try to understand.

Can all people be artists?

Yes, because art can be anything and it doesn't have to be good.

How to make an object 3 dimensional?

To make an object 3 dimensional, you have to draw shadow or draw vertical line to look like it real.

What is a theme?

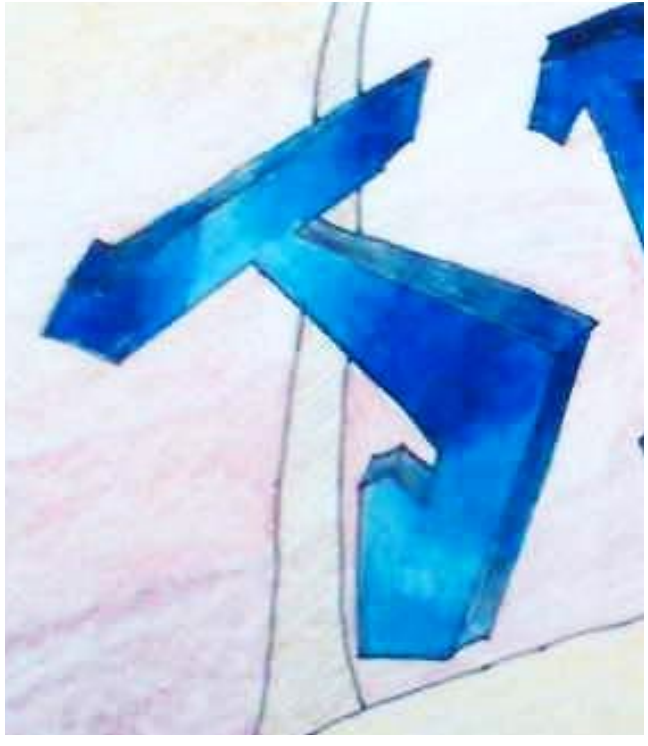
Theme is main topic that tell you the messages to understand that object/drawing.

How is a theme different than a topic?

Difference between theme and topic is theme is more detailed than topic and it has some meanings (messages).

Colored pencil technique critique

- I used shading, Burnishing.



Conclusion

Over all, I think I did pretty good because I learned and used a lot of coloring techniques and drawing 3 Ds by using shadow or drawing diagonal line. Also, I succeed to drew my background to show my topic and theme, which is sunrise and it means beginning of the day and reset everything you did in past.

What was good?

I think my coloring technique that I used in name was good because it looks really cool about how color changes as place.

How could I improve?

I think I could improve my backgrounds because I rushed through it and it could be a little bit better than that and font of my name because i feel like it not matching with my topic and my background.

Things that I discovered through this project are my coloring was not as bad as I expected and it was actually not that bad. I like how I used shadow to show 3 d and it was really cool.
