## DEPARTMENT OF HUMANITIES IGCSE Y11 GLOBAL PERSPECTIVES AND RESEARCH Ms. Ruby and Amanda

IGCSE Level Global Perspectives & Research aims to encourage young people to think about and explore issues of global significance. It enables them to explore and make judgements about global issues of relevance and importance to their own lives. It offers learners opportunities to acquire, develop and apply skills in critical thinking, problem-solving, research, communication and collaboration.

Global Perspectives is assessed on three objectives. Remember this is a skill based subject and requires practise.

**AO1:** Research, analysis and evaluation

**AO2:** Reflection

**AO3:** Communication and Collaboration

The subject demands two courseworks and one written exam. The coursework components will be completed over the period of the course and it is imperative that learners complete this promptly as it makes up 65% of the IGCSE Global Perspectives Grade.
