OpenActive Community Group Hangout

Facilities, the return!

2018-06-20

Agenda

- Facilities proposal

- Developer site

- AOB

Facilities proposal review

Facility Use primary use cases

A. Publish opportunities to book a facility at a leisure centre
B. Publish availability of individual slots
C. Publish default and slot specific pricing
D. Publish opportunities to book an individual facility, e.g a specific tennis court

Facility Use recently proposed use cases

E. Publish opening times of the facilities at a
    leisure centre

F. *Allow users to book longer slots, e.g. full hour
    rather than default 30 min slot*

G. *Allow users to book adjacent courts*

Facility Use draft model

- Facility use description

- Facility use data model

- Fusion examples

  - Example data

  - Published data

OpenActive

Developer site

OpenActive

Hello, world!

This is the developer area for OpenActive. Whether you're a consumer of activity data or a provider, this is the place to learn about the underlying data models, become a part of the specification process, check your feed or read the API documentation.

Learn more »

Data models

OpenActive's data models for activity data build on excellent community work from SKOS and Schema.org.

View details »

Specifications

OpenActive's specifications are created in an open and collaborative process. You can view the current and past versions of the specifications, get involved in the process, create issues and read editor's drafts for the next versions.
