What is 3D Printing.

Teach 3D Printing to Students in Sri Lankan Schools.

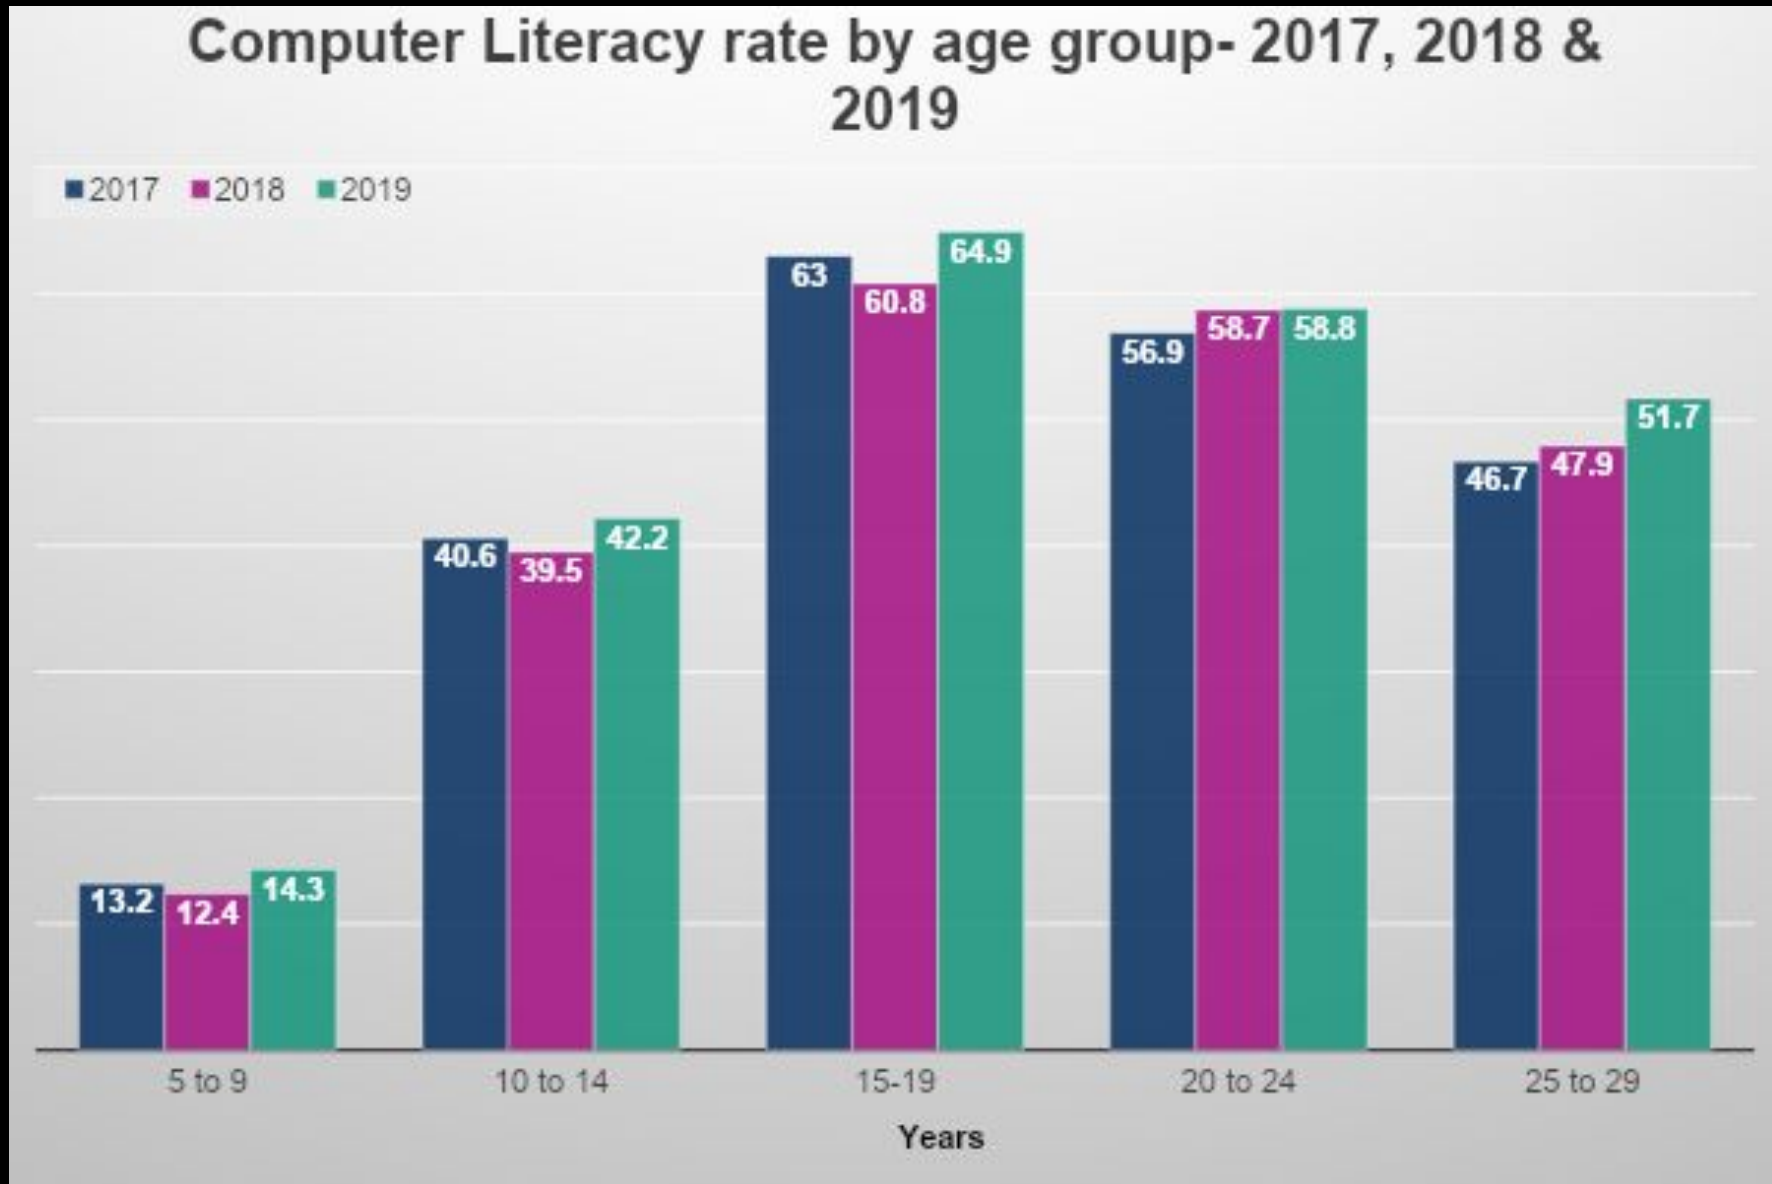

HOW TO TEACH 3D PRINTING TO STUDENTS

- ▶ Make learning active
- ▶ Encourage real-world understanding
- ▶ Augment the educational process
- ▶ Boost digital engagement

Targeted Age Groups For 3D Printing

Strengths to teach 3D printing to Students.

Strengths to teach 3D printing.

Open software are available.

Blender.

Meshlab

Meshroom

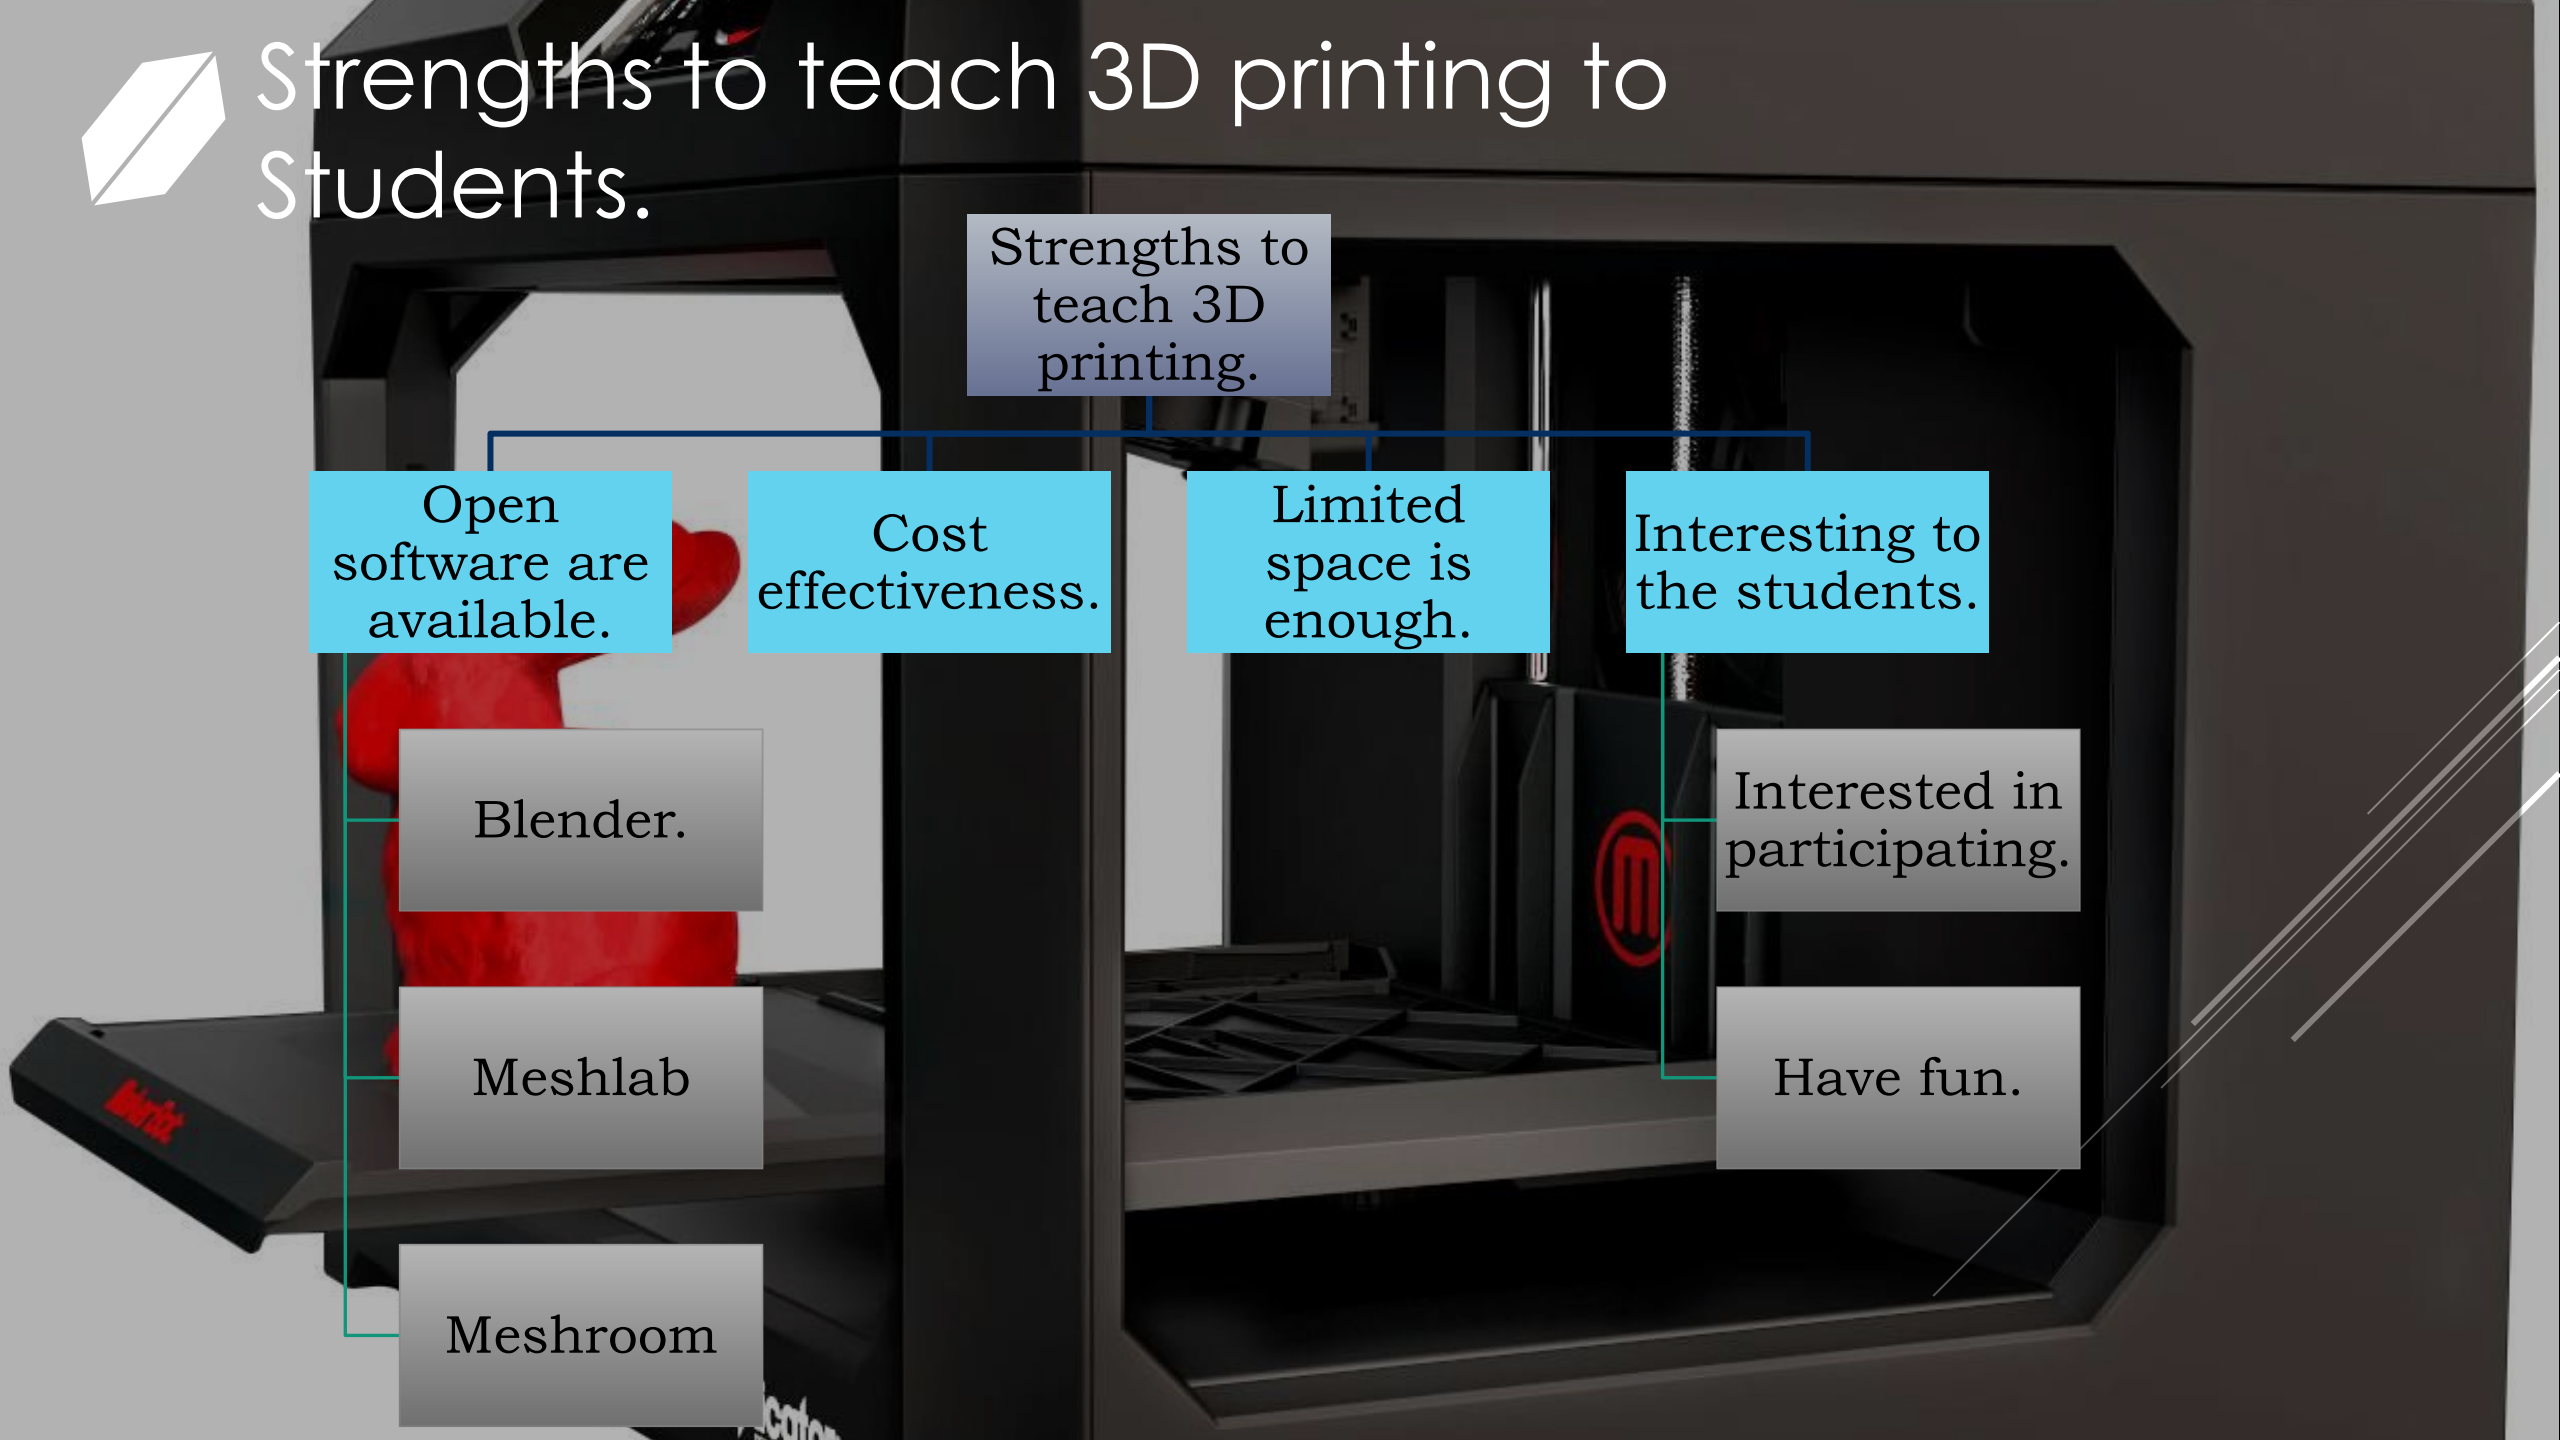

Cost effectiveness.

Limited space is enough.

Interesting to the students.

Interested in participating.

Have fun.

Constraints to Face while teaching 3D printing to students.

- there are many barriers that we must face in Sri Lanka to the integration of new technologies into the education system.
- The lack of readiness.
- Sri Lanka is still a developing country.

THANK YOU!
