

Green Fleet Dashboard

Insights for reduced emissions and increased fleet savings

01

Sustainability and Reducing Cost

Sustainability and Reducing Cost

Geotab – a global leader of connected vehicle telematics committed to making real progress towards climate action goals.

We reveal insights from real-world data that helps fleets reduce emissions and costs while improving operational efficiency. This helps our customers implement effective carbon reduction strategies so they can remain focused on their business.

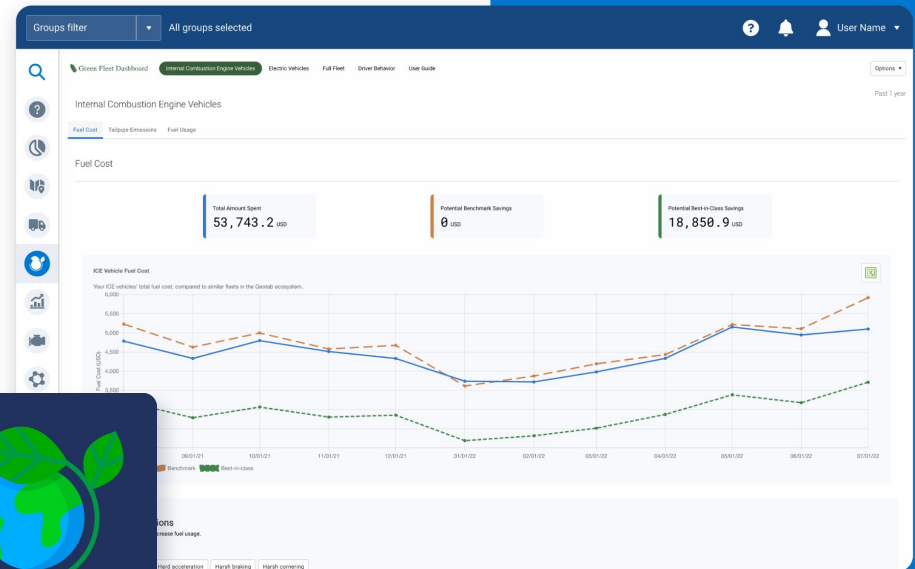

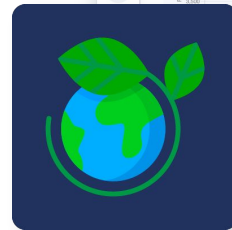

02

Introducing the Green Fleet Dashboard

Introducing the Green Fleet Dashboard

The [Green Fleet Dashboard](#) is a free* Add-In within MyGeotab that delivers fleet sustainability insights to allow you to monitor your fleet cost and environmental performance over time, and identify opportunities for improvement.

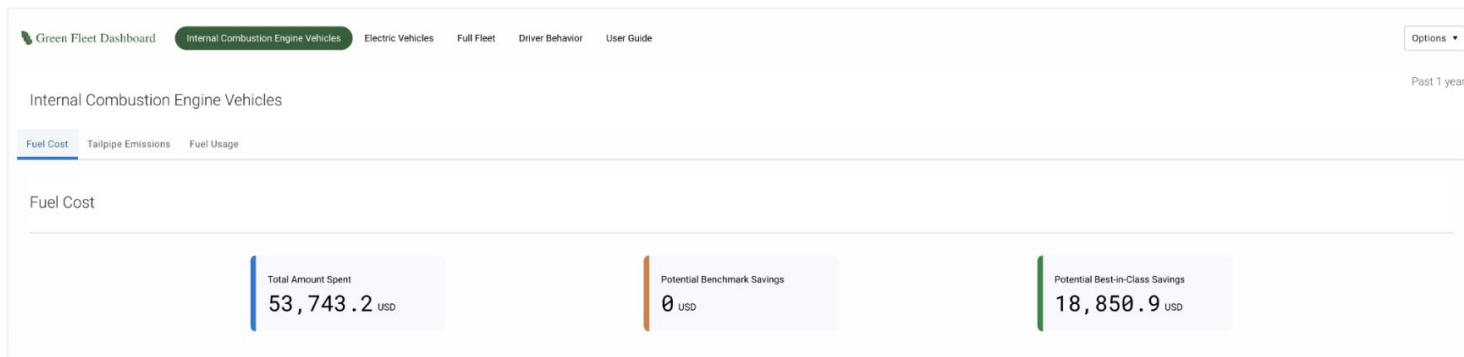

NOTE: The Green Fleet Dashboard is only free for Geotab Customers.

Green Fleet Dashboard

The [Green Fleet Dashboard](#) delivers data on:

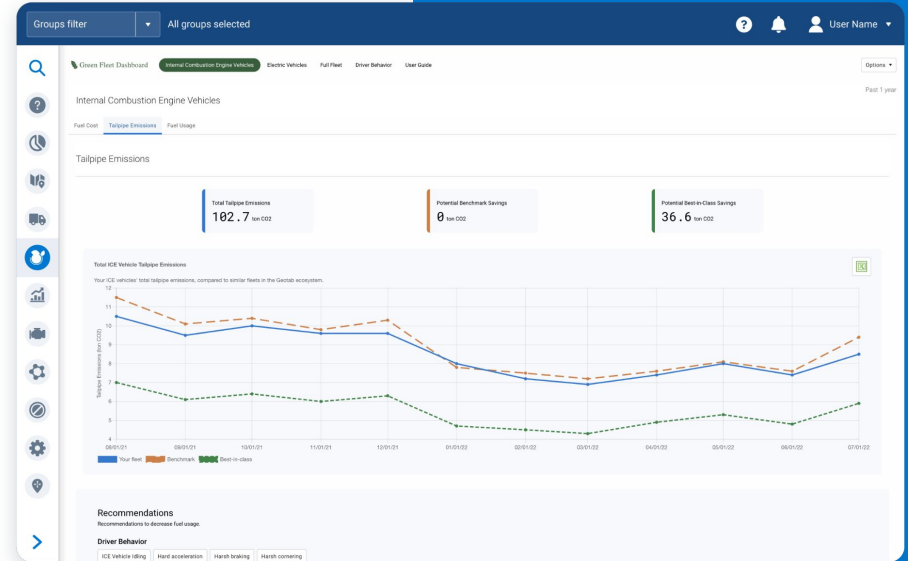

- Fuel usage*
- Emissions*
- Operational costs*
- Electric Vehicle (EV) usage*
- Driver behavior
- Idling

*NOTE: Only available on Pro and ProPlus rate plans.

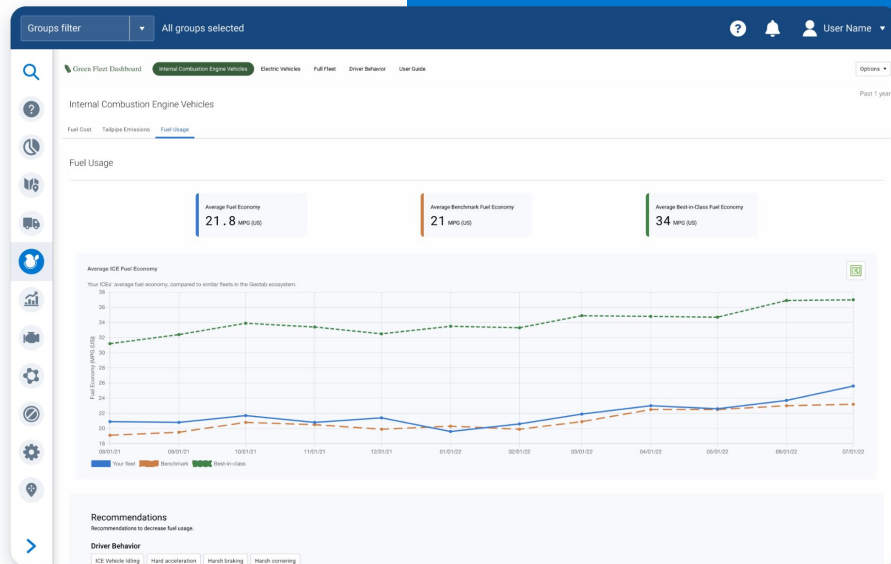

Identify cost and emissions savings

Gain insights of the potential cost and emission savings to drive initiatives.

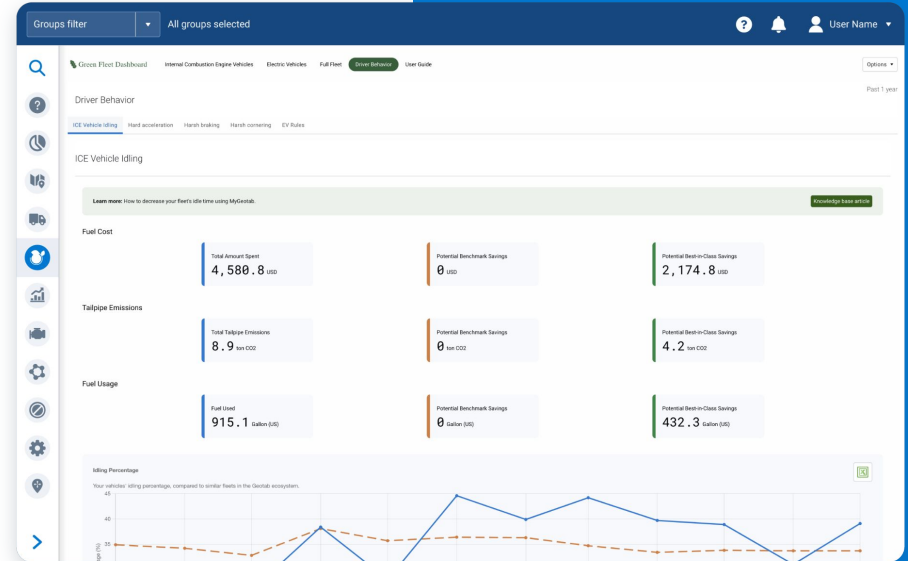

Monitor your fleet fuel economy

Compare your fleet fuel economy to a benchmarking of similar fleets in the Geotab ecosystem over time. See how you measure up among the rest!

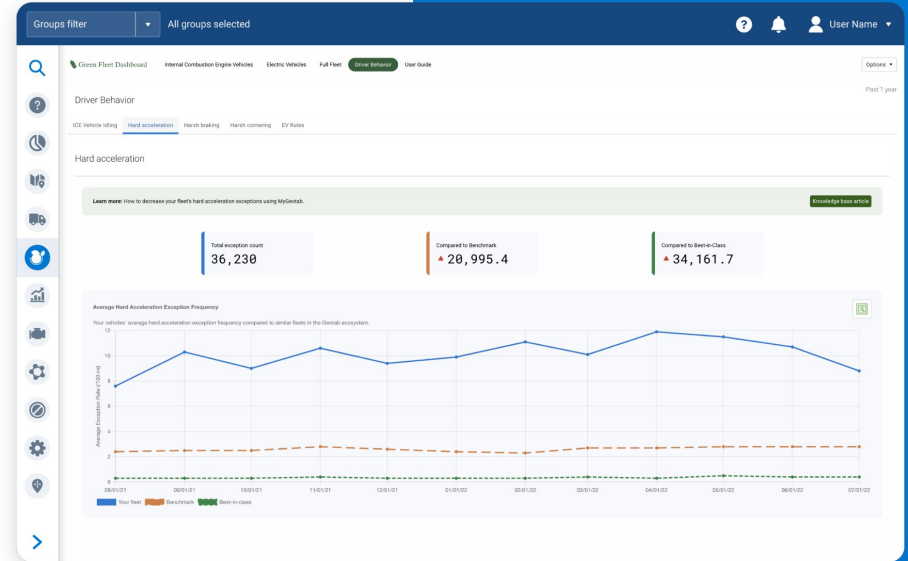

Identify the impact of idling

Pinpoint how much idling is impacting your costs and emissions.

Driver behavior

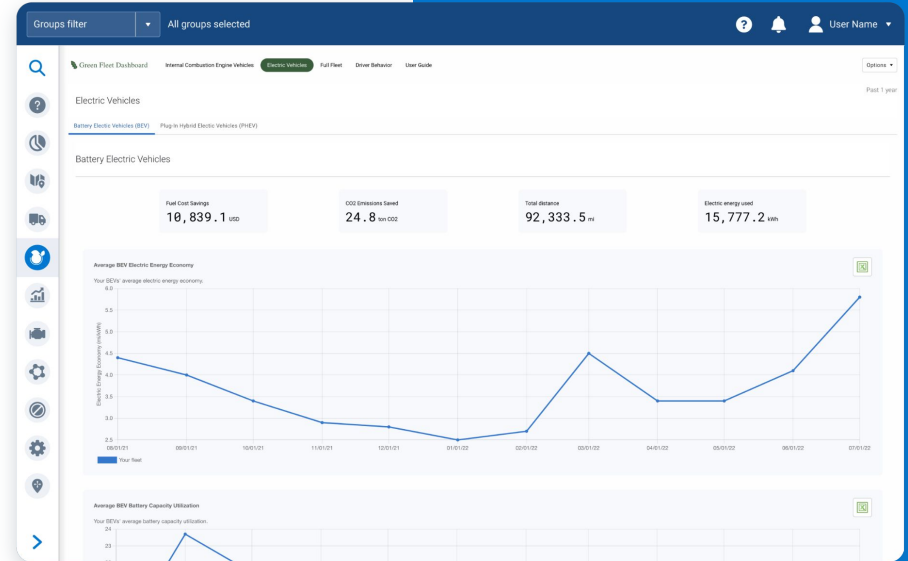

- Track key driver performance indicators related to fuel efficient driver behaviour, harsh events and charging exceptions
- Identify ways of improving cost and emissions using MyGeotab

Track BEV and PHEV performance and utilization

Monitor your electric vehicle performance and utilization:

- Energy and combined efficiency
- Daily battery utilization
- Report on your EV realized savings
