What we'll do:

- Discover how to use a **roadmap** to plan for work and contribution on your open project
- Look at examples

Assignment: Create or revise your Roadmap

Open Leaders **design** and
build projects that **empower**
others to collaborate within
inclusive communities.

[Open Leadership Framework](#)

	Understanding	Sharing	Participation & Inclusion
Design for...	<ul style="list-style-type: none"> ● Content focus ● Community interactions <ul style="list-style-type: none"> ○ Learning through use ● Storytelling 	<ul style="list-style-type: none"> ● Information-sharing focus ● Community interactions <ul style="list-style-type: none"> ○ Gifting ○ Enhancing value exchange ○ Networking common interests 	<ul style="list-style-type: none"> ● Governance focus ● Community interactions <ul style="list-style-type: none"> ○ Creating together ○ Soliciting ideas ● Project identity
Build for...	<ul style="list-style-type: none"> ● Communication ● Design ● Facilitation ● Maintenance ● Project management 	<ul style="list-style-type: none"> ● Commons-based production ● Data stewardship ● Documentation ● Licensing ● Networking 	<ul style="list-style-type: none"> ● Decision-making ● Delegation ● Event planning ● Community Management ● Mentoring
Empower for...	<ul style="list-style-type: none"> ● Maintains clarity of vision & purpose ● Maintain authenticity & integrity ● Stays curious 	<ul style="list-style-type: none"> ● Makes connections ● Resilience ● Self-care 	<ul style="list-style-type: none"> ● Embraces failure ● Ensures safety ● Inspires contribution

Welcoming spaces..

- Make a good first impression so you know you are in the right place!
- Explain how you can get involved
- Let you know what is happening now, and next...

What's goes in a roadmap?

1. Project Summary & Welcome
2. How to Get Involved
3. Timeline

1 - Project Summary & Welcome

Welcome and orient visitors to your project

- Important to help them understand where they are
 - Often they have been linked directly to the roadmap
- Having the project summary first
 - Help to give a clear focus when writing the rest of the roadmap

2 - How to Get Involved

New contributors might want to jump in right away!

- Point to parts of the project they can immediately work on
- Point to documentation they should check out

3 - Timeline

The Star of the roadmap!

- Organize tasks to complete your project around milestones
- Map what you are working on now and where it is going next

3 - Timeline - Milestones

Significant turning points or events that will move the project forward

- Status goals (feature release, MVP, etc)
- Dates / Events (Hackathon, etc)
- Timeframes (short, medium, long term)

Pick 1-3 milestones for your timeline

3 - Timeline - Tasks

- List tasks to complete for each milestone
- Include information with each task to make it easy for contributors
 - What needs to be done
 - What does success look like
 - Pointers to get started
 - Why this task is important, reinforce your vision

How to store the roadmap?

- In a separate file (ROADMAP.md)
 - [Open Discovery](#)
- In the README file
- In an issue
 - [Applications for Open Life Science](#)
- In the “Projects” tab in GitHub
 - [Peer-produced science](#)
 - [LA-CoNGA physics](#)

Thank
you!

The Open Life Science program helps **early stage researchers and potential academic leaders** in becoming **Open Science ambassadors**.

What Open Science dreams will
you achieve?
