

**Identify each of the following organisms as photosynthesizers or non-photosynthesizers.**

- Number a piece of paper 1-26.
- Each of the following pictures is numbered.  
Decide if the organism can photosynthesize, or not.
- Write “P” for those capable of photosynthesis and “Non: for those who are not.

- Write a description of how you decided with category each organism fit into.
- Compare your observations to another student or team's list. Circle any number(s) you disagree on.
- Discuss your reason for placing those organisms in the category and make any changes you need to.
