The Cyber Safety Cop Plan

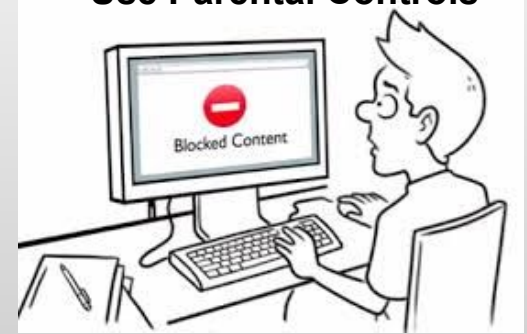

Educate Yourself

Talk with your child

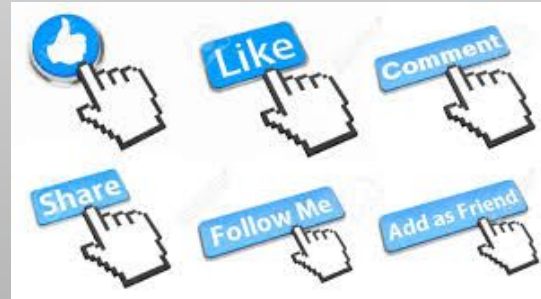

Use Parental Controls

Set Rules and Expectations

Friend and Follow

Create Balance

Managing Online Reputation & Privacy

Keys for a Positive Digital Reputation

(1) Be careful what is published online

Would you post it on a freeway billboard for all to see?

(2) Assume your posting is permanent

(3) Privacy is an illusion

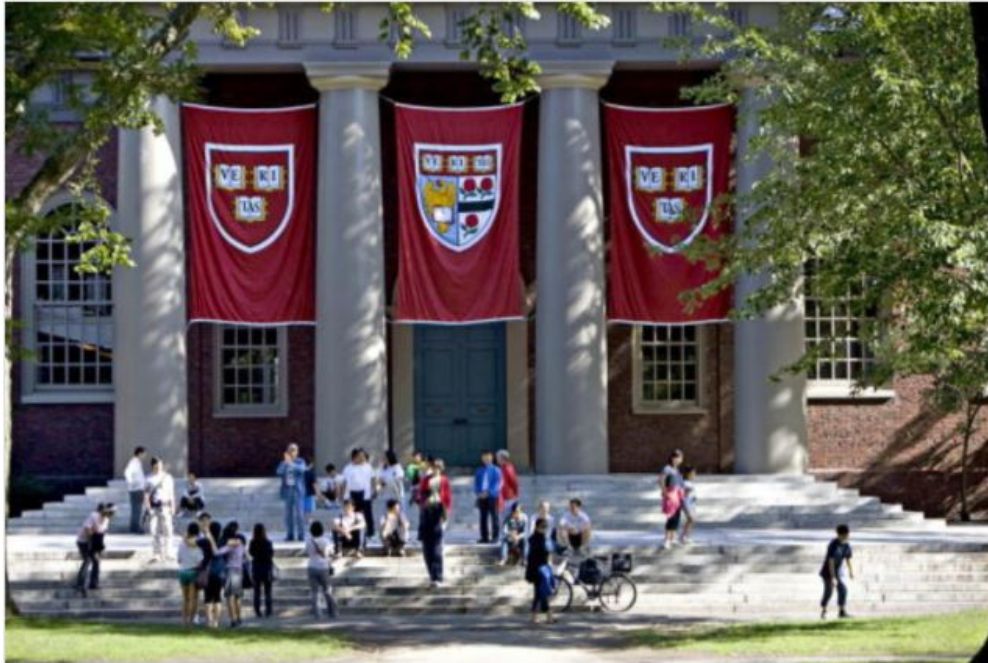

(4) Manage your digital reputation

Harvard Pulls Admission Offers After Explicit Posts

Prospective students allegedly traded obscene and offensive messages in an online Facebook chat.

By [Megan Trimble](#), Associate Editor, Social Media | June 5, 2017, at 10:15 a.m.

Creating Balance In Your Child's Tech Life

According to the Pew Research center, 92% of teens go online daily with 24% of those saying they are online “almost constantly”.

Kids ages 8 - 18 are spending an average of 44.5 hours per week in front of screens. (Assuming they sleep for 8 hours a day, this represents about 40% of the time they're awake.)

Creating Balance In Your Child's Tech Life

Nearly 23% of youth report that they feel “addicted to video games”.

Suggestions

- Use social media as a tool for promoting a charity or social cause
- Likes should not equal self-esteem
- Be the person you want your child to be
- Don't be afraid to be the bad guy
- Create limits

Use parental controls on your iPhone, iPad, and iPod touch

10 Second Summary

1. Open **Settings**.
2. Tap **General**.
3. Tap **Restrictions**.
4. Tap **Enable Restrictions**.
5. Enter a passcode.
6. Limit App Store access.
7. Tap **Apps**.
8. Select age restrictions.

Use parental controls on your iPhone, iPad, and iPod touch

Turn on Restrictions

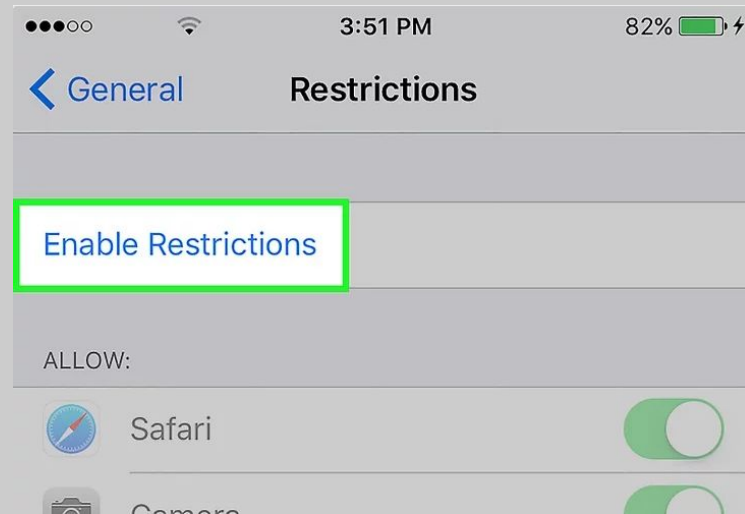

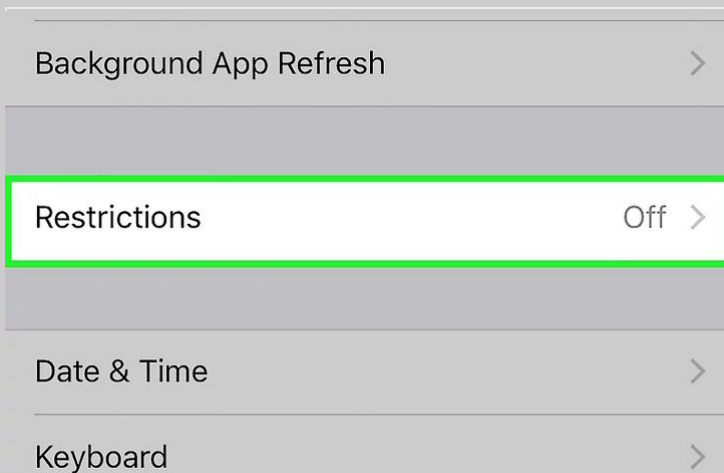

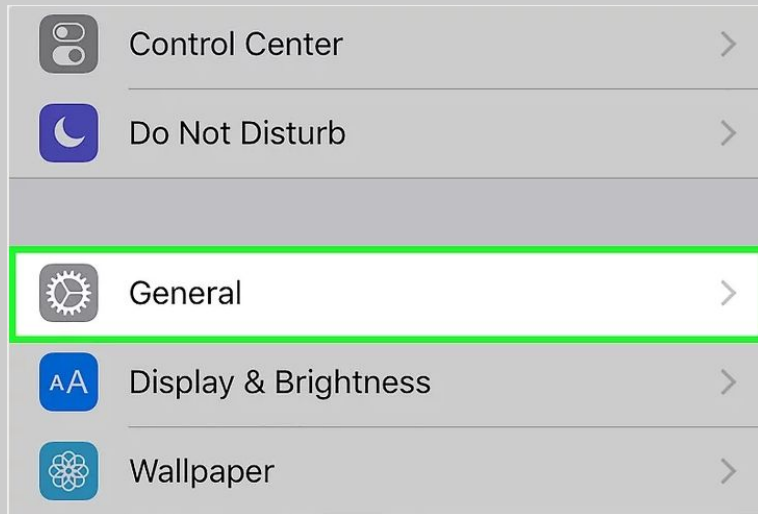

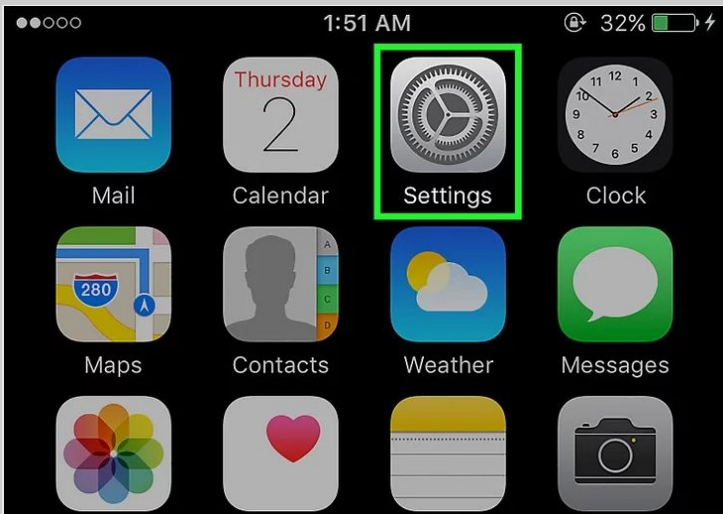

1. Tap Settings > General > Restrictions.

2. Scroll down and tap Restrictions, then tap Enable Restrictions.

3. Create a Restrictions passcode. You need your Restrictions passcode to change your settings or to turn off Restrictions.

Set Passcode

Cancel

Enter a Restrictions Passcode

How to use Android parental controls

First, drag down from the top of the screen, then drag down further if a settings cog icon doesn't appear. Tap on the icon to open the Settings app.

Scroll down until you see Users. If your phone has a Settings [app](#) split into sections, you might have to search other tabs to find the Users menu.

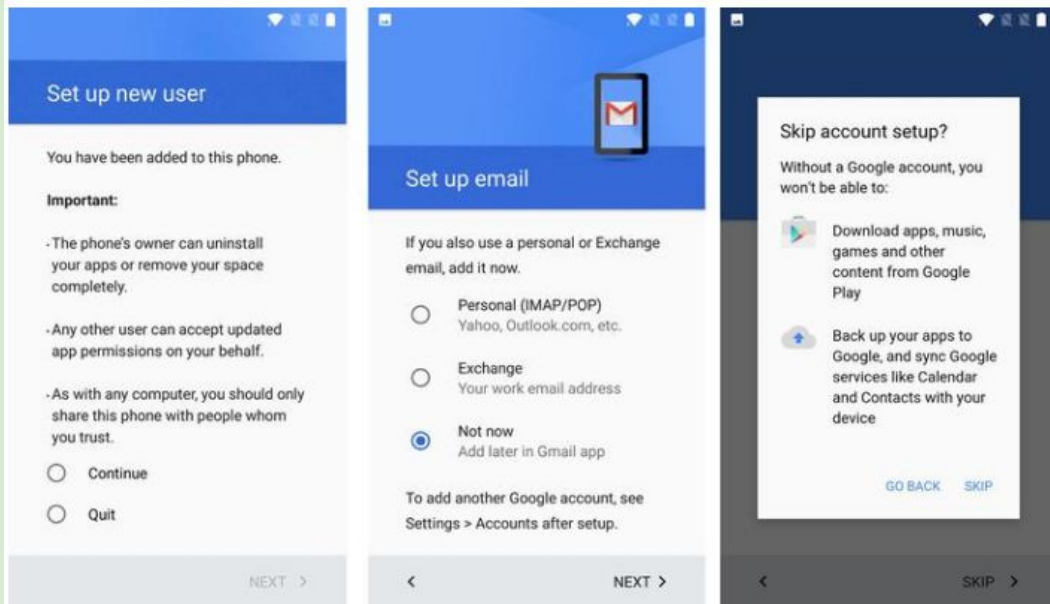

In Users, you'll see your own account, or the main account of the [owner](#) of the phone. There will be an 'Add user' option, so tap on this.

Accept the message by tapping 'OK' then tap on 'SET UP NOW'

How to use Android parental controls

The device will log you out and ask you to sign into the new user's account. As that's for a child in this case, you'll continue to make the settings.

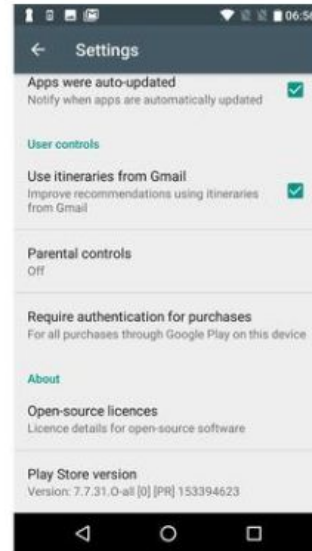

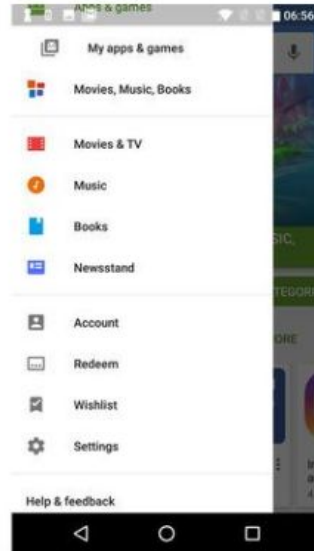

Tap Continue, as in the image above left, then you'll be asked if you want to sign into an Android [account](#). If you want to prevent your kids from downloading apps, games, music, videos and TV shows through Google Play, just tap on Skip Setup. You will still be able to download apps etc. via your own user account.

You'll also have the option to set up their email account, or tap Not now if you don't want to.

How to use Android parental controls

How can I restrict content in Play Store?

Assuming you *do* want to give your child access to the Google Play Store within their account, either sign in with your own Google account when prompted during the setup, or use their account if they have one.

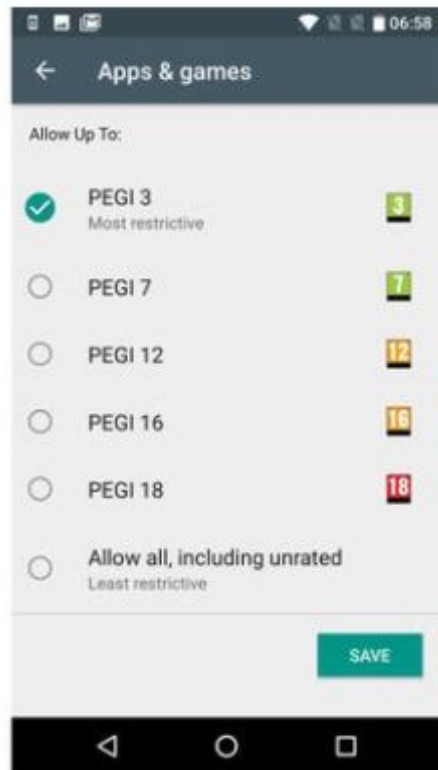

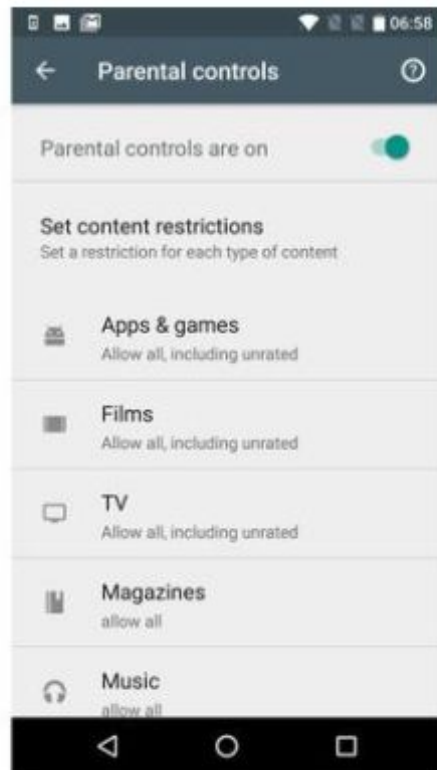

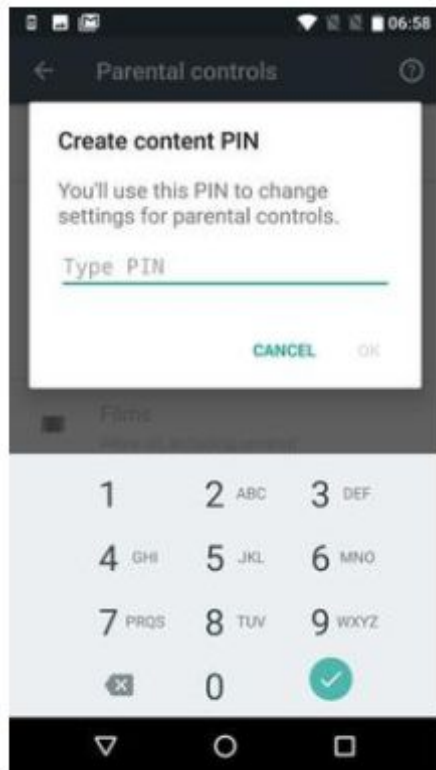

Then, launch the Play Store app (this is in their user account on the phone or [tablet](#) still) and tap the 'hamburger' - the three horizontal lines at the top left.

Scroll down and tap Settings, then scroll until you see [Parental](#) controls.

Tap it, and you'll have to create a PIN code. Enter this twice.

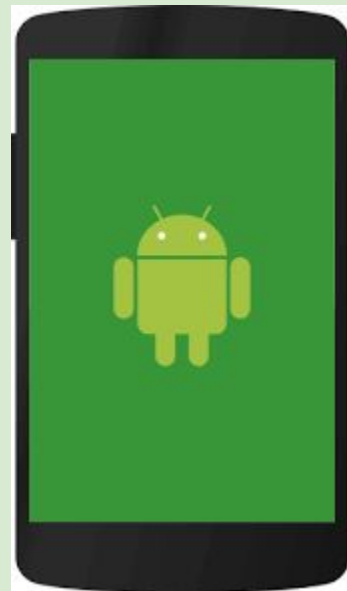

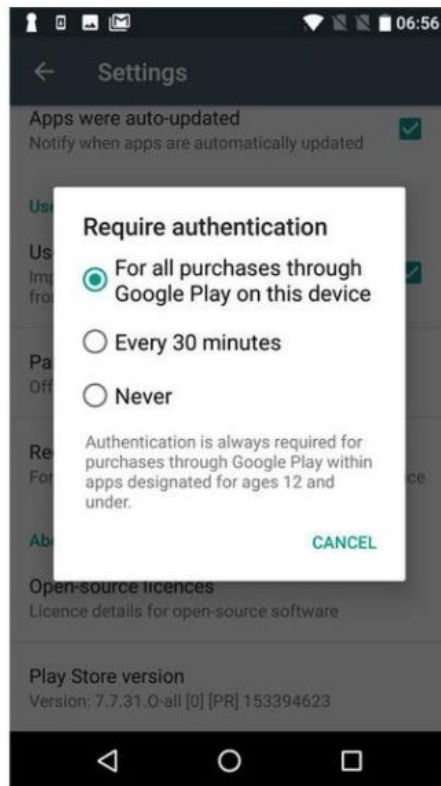

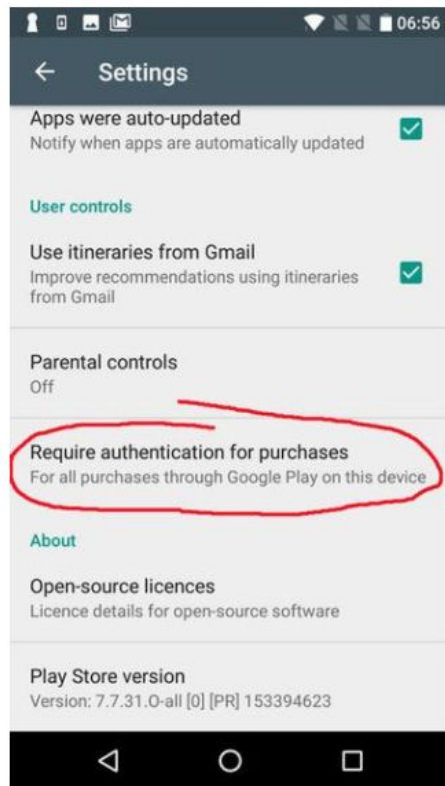

How to use Android parental controls

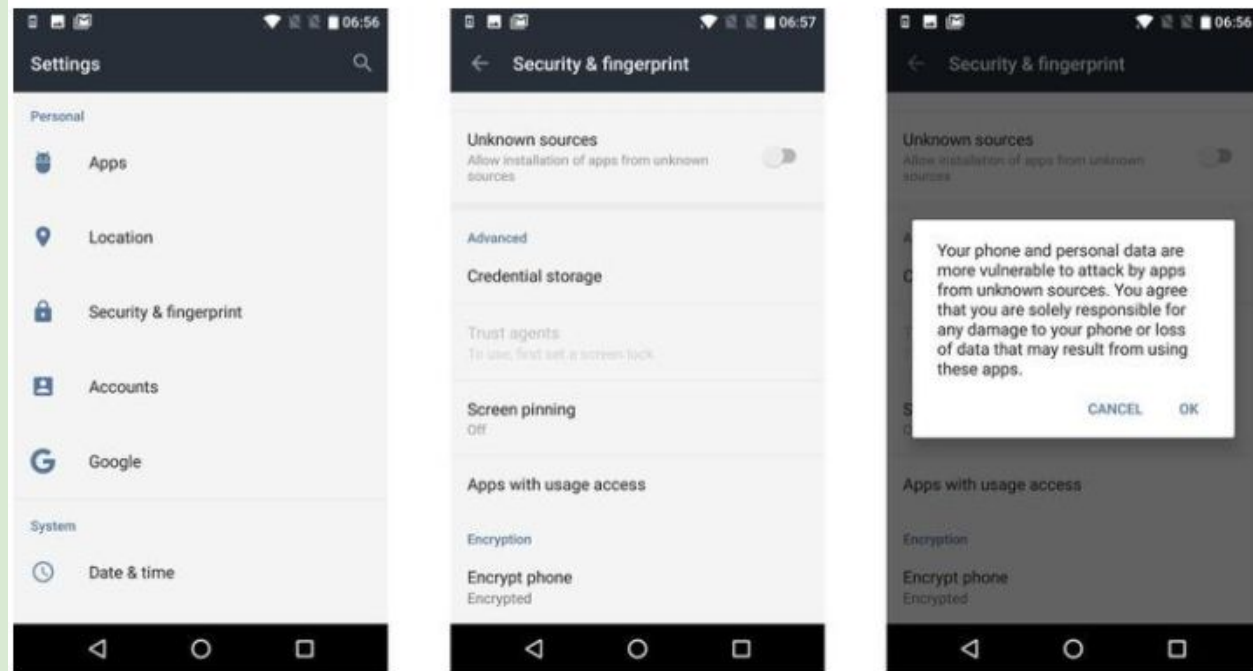

How to use Android parental controls

If you want to prevent kids from buying content freely, you can set a PIN that only you know which will be asked for when they try to download anything that costs money. To do this, go back to the main Play Store settings menu and tap on 'Require authentication for purchases'. Then you'll see a screen like the one below, right.

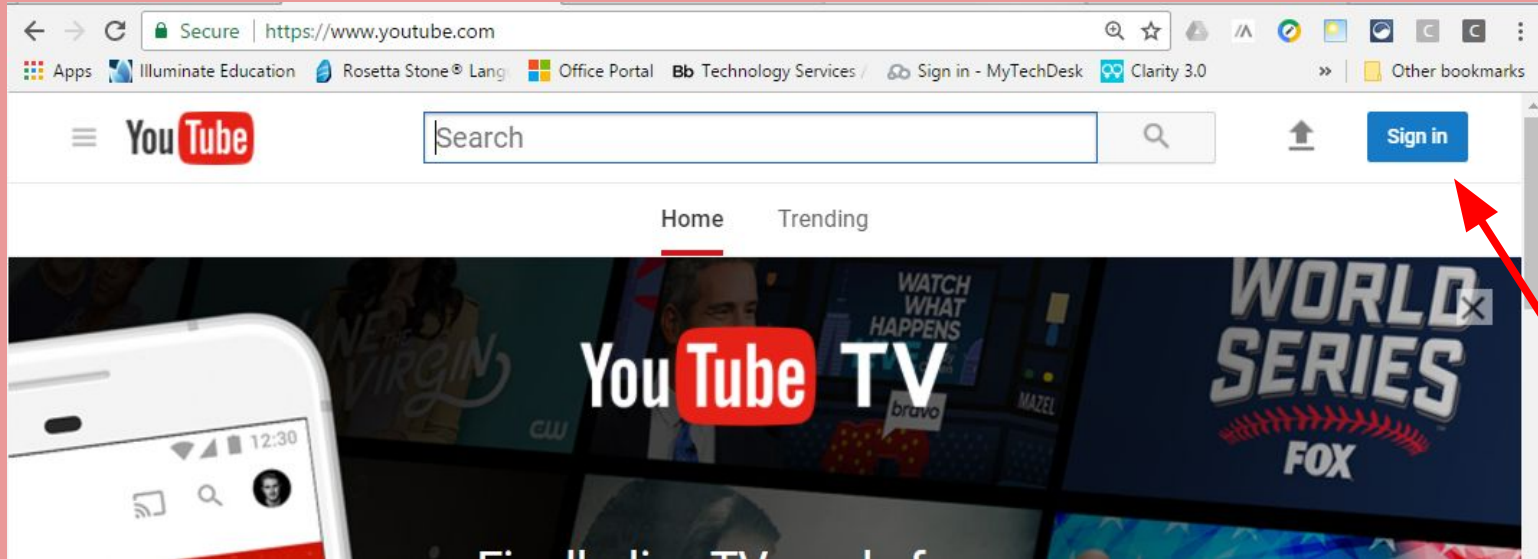

How to use Android parental controls

The Play Store isn't the only place to download apps and games, so it's important to make sure other sources are blocked. To do this, go back to the device's home screen, and drag down from the top of the screen again to get to the cog icon - tap it to open the Settings app.

Find the Security section (called Security & fingerprint on our phone), tap it and then check to make sure the Unknown sources switch is turned off (which it probably will be).

YouTube Safe Search - Desktop

(1) Sign into a youtube account

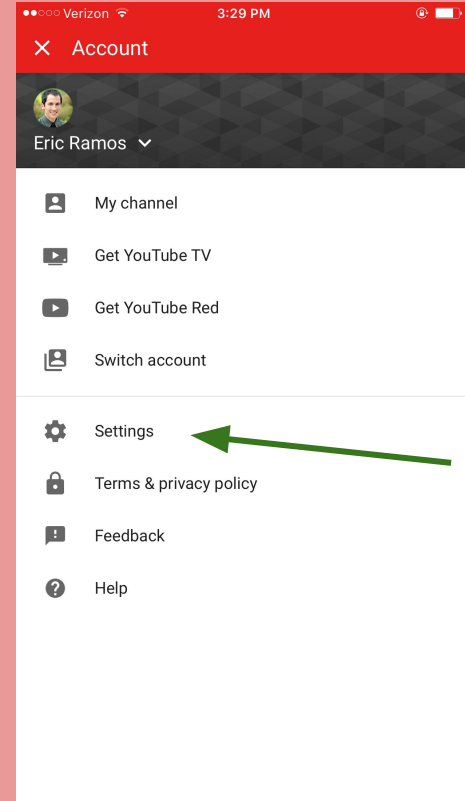

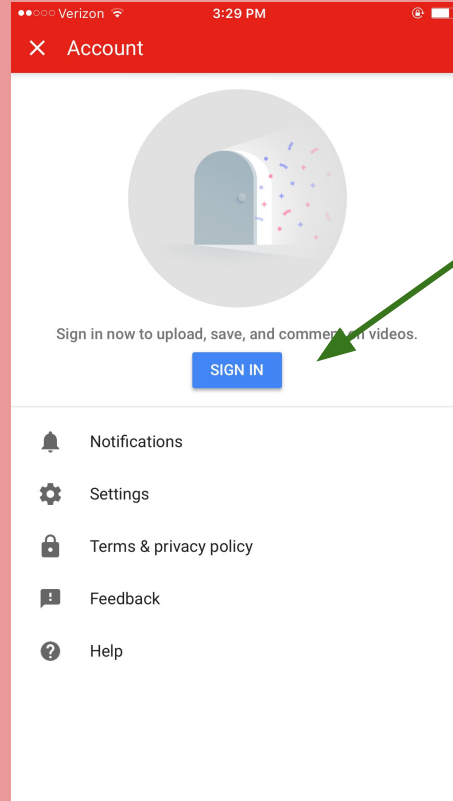

YouTube Safe Search - Desktop

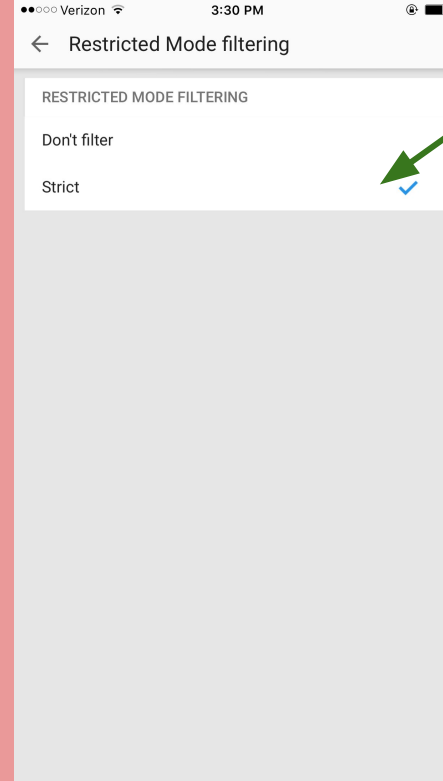

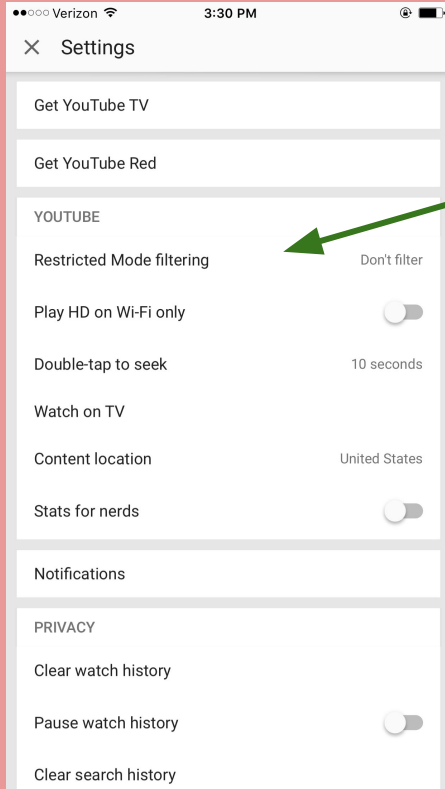

The YouTube desktop header navigation bar. From left to right: the YouTube logo, a language dropdown menu set to "English", a content location dropdown menu set to "United States", a "Restricted Mode: Off" dropdown menu (highlighted by a red arrow), a "History" button with an hourglass icon, and a "Help" button with a question mark icon. Below the navigation bar are links for "About", "Press", "Copyright", "Creators", "Advertise", "Developers", and "+YouTube". At the bottom of the header are links for "Terms", "Privacy", "Policy & Safety", "Send feedback", "Test new features", and "© 2017 YouTube, LLC".

The YouTube Restricted Mode settings page. At the top is the same navigation bar as in the previous image. Below it is the "Restricted Mode" section, which includes a list of bullet points: "Restricted Mode hides videos that may contain inappropriate content flagged by users and other signals. No filter is 100% accurate, but it should help you avoid most inappropriate content." and "Your Restricted Mode setting will apply to this browser only." Below the text are two radio buttons: "On" (selected) and "Off". There is a blue link that says "Lock Restricted Mode on this browser". Below the link is the text "Restricted Mode lock prevents others from changing the Restricted Mode settings on this browser." At the bottom left is a "Save" button (highlighted by a red arrow).

How to set

Parental Controls on PS4

<http://www.wikihow.com/Set-Up-Parental-Controls-on-PS4>

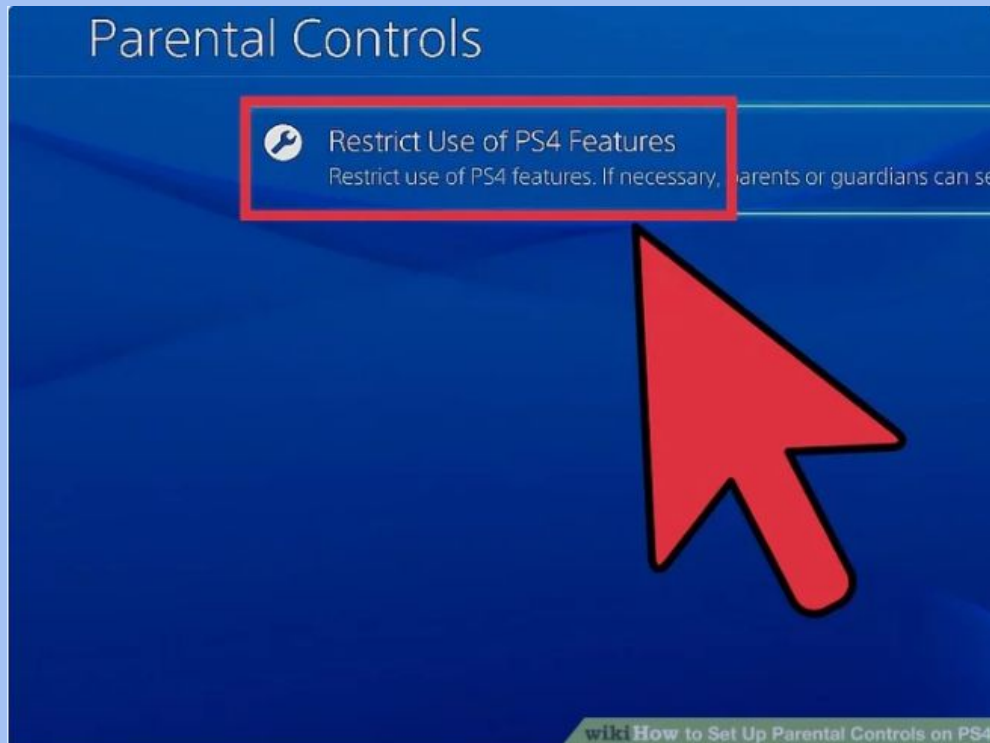

h PS4

1 Log into your PS4 profile (assuming this is the main account on the console).

How to set Parental Controls with PS4

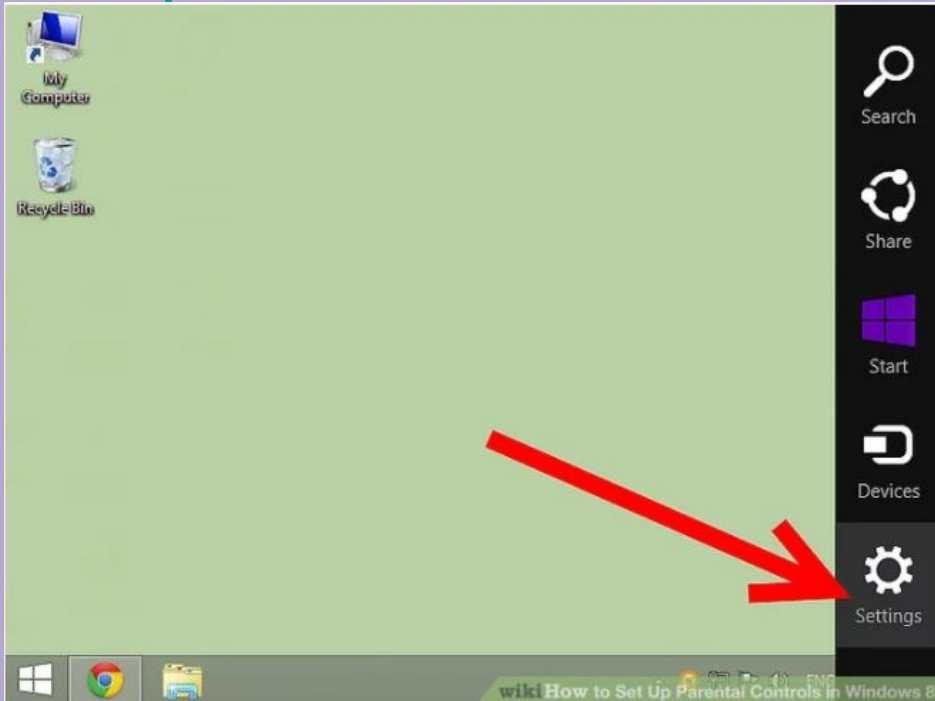

4 Select "Restrict Use of PS4 Features." From this point on, you can select the feature you would like to restrict from your child.

- All settings of the Parental Controls can be configured here.

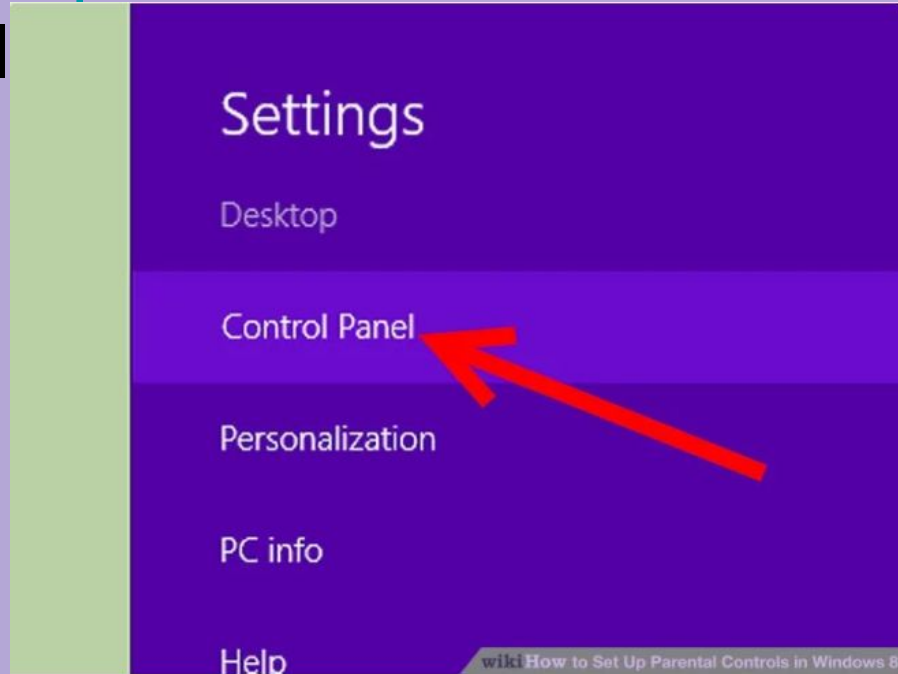

How to set

<http://www.wikihow.com/Set-Up-Parental-Controls-in>

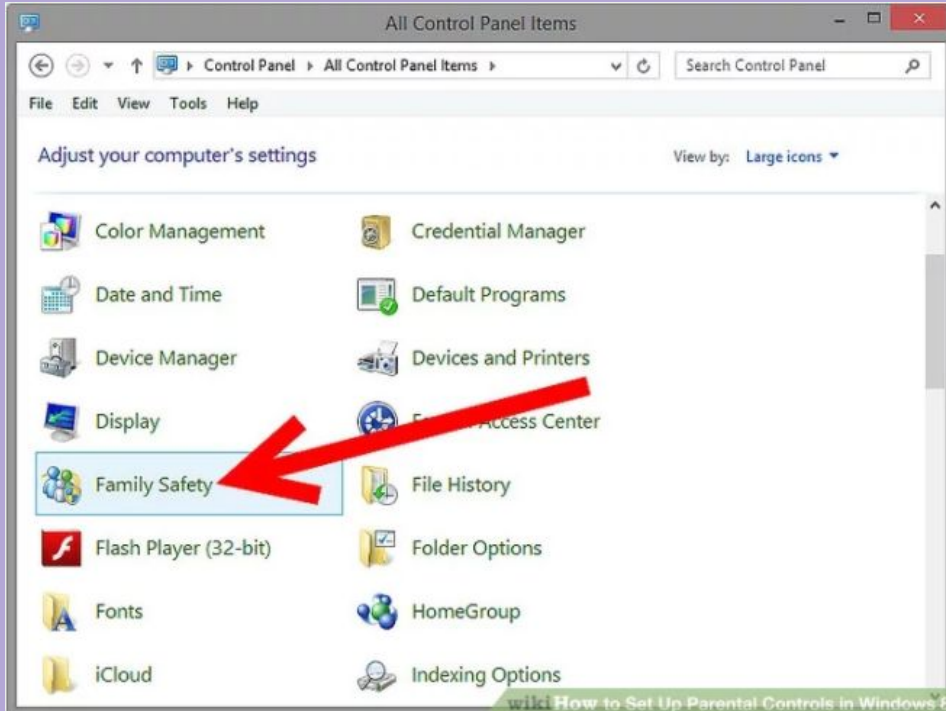

- 1 Move your cursor all the way to the right in the Windows 8 Desktop, and then select "Settings" when the Charm bar appears.

rol

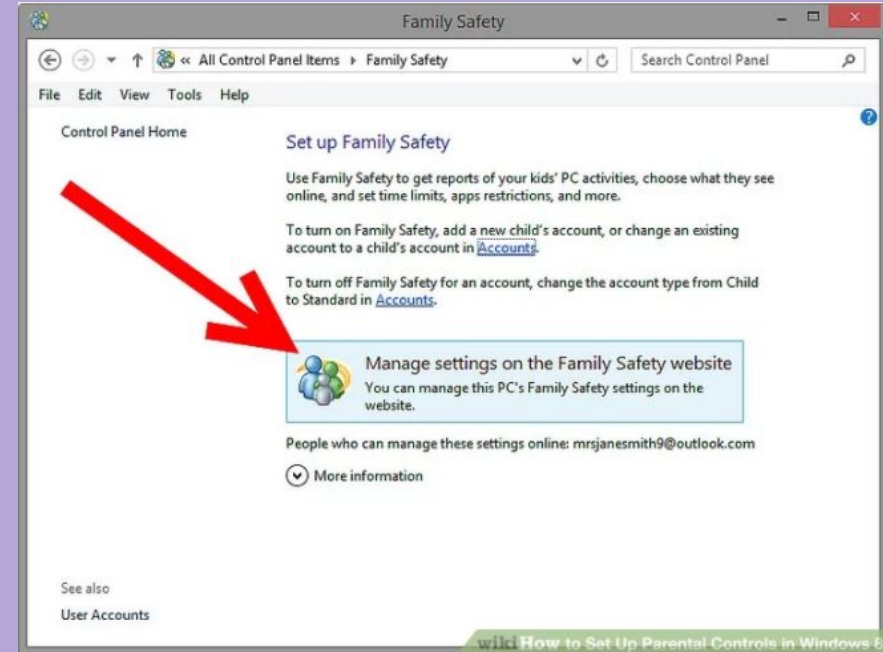

- 2 Select "Control Panel" from the options under Settings.

How to set Parental Control on Windows

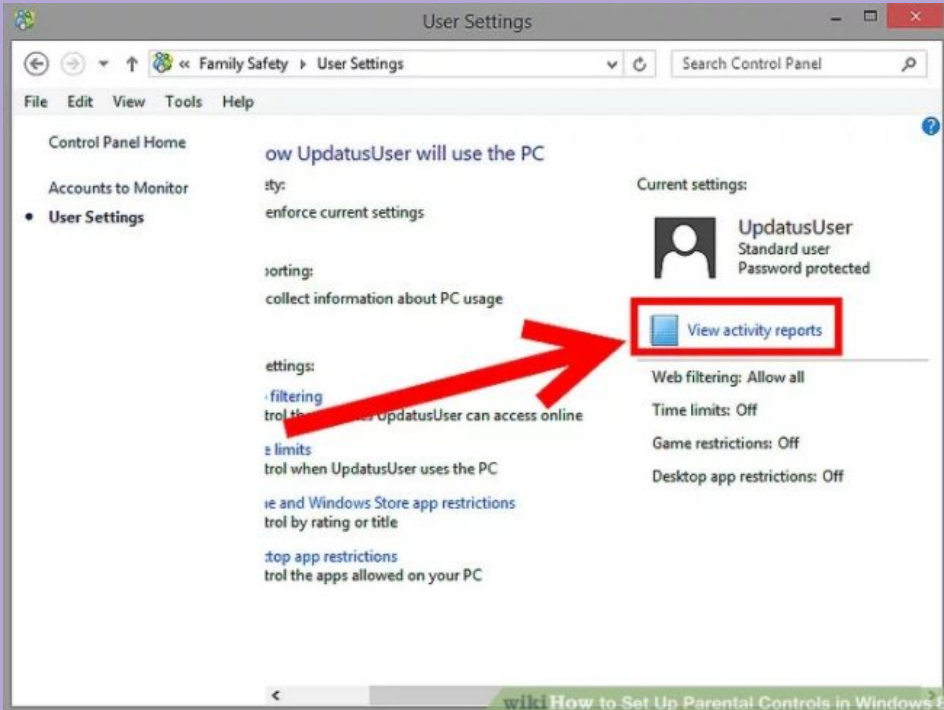

3 Click on "Family Safety" where it appears over on the left in the Control Panel.

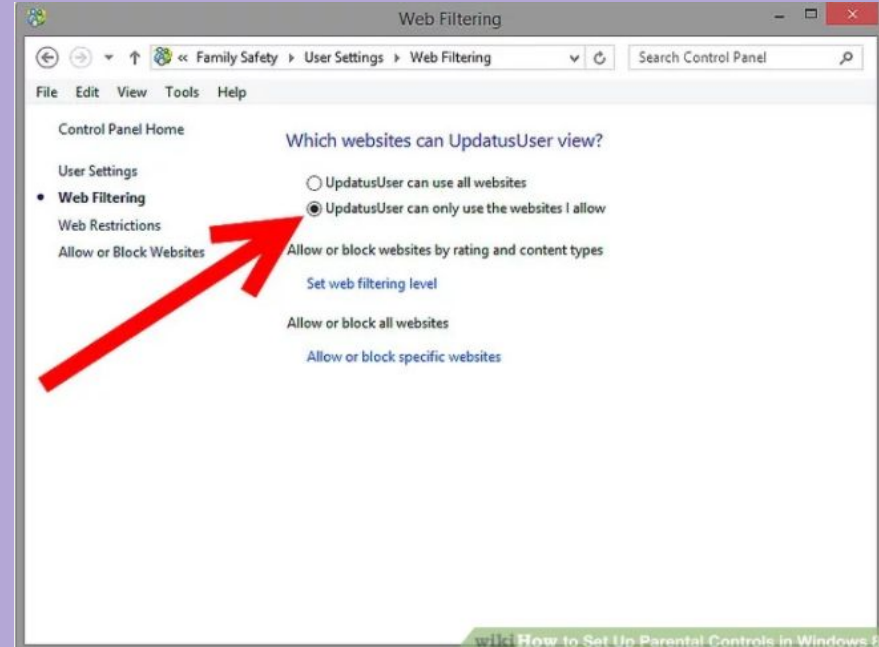

4 Click on "Manage settings on the Family Safety Website."

How to set Parental Control on Windows

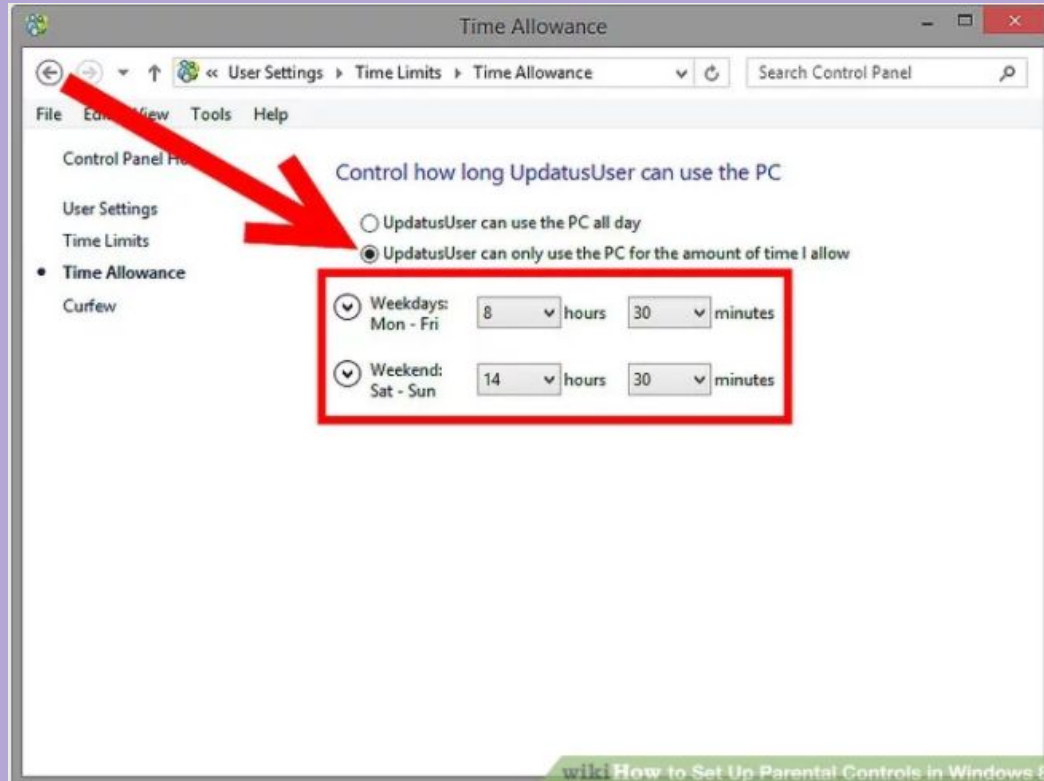

5 Login to the family safety account using the same user password as is on your computer. Click "view activity report" on the user you want to set up parental controls for.

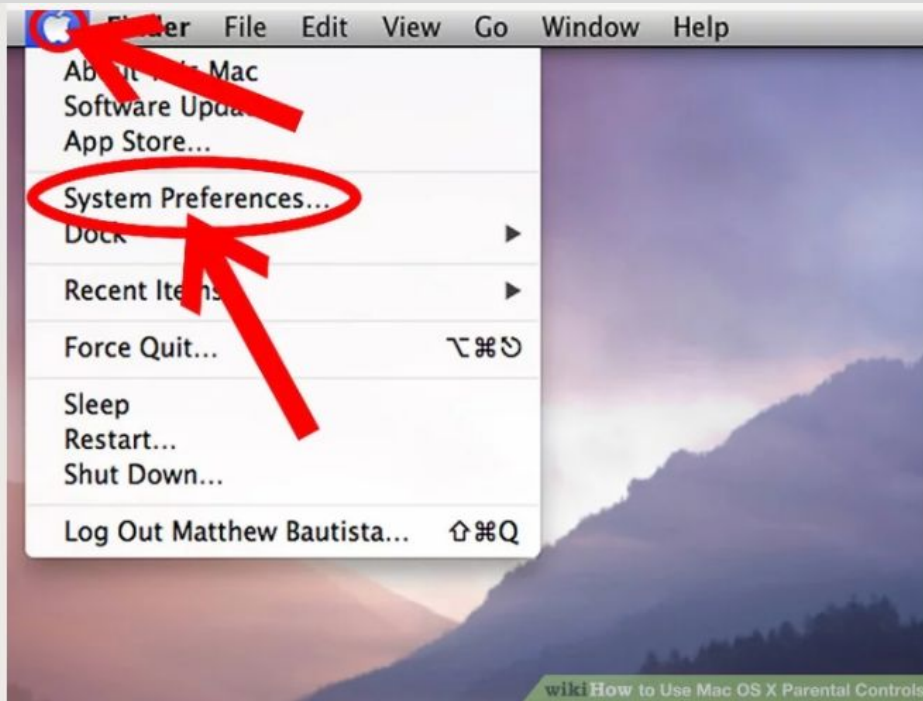

6 Click on "Web Filtering," and select "Turn on web filtering" to filter what the user can access on the Internet. Select the "designed for children" option and click "save."

How to set Parental Control on Windows

- 7** select another parental control option, like "Time limits." Set the limits you want on the computer use, and click "Save." again.

How to use Parental Controls with Mac OS

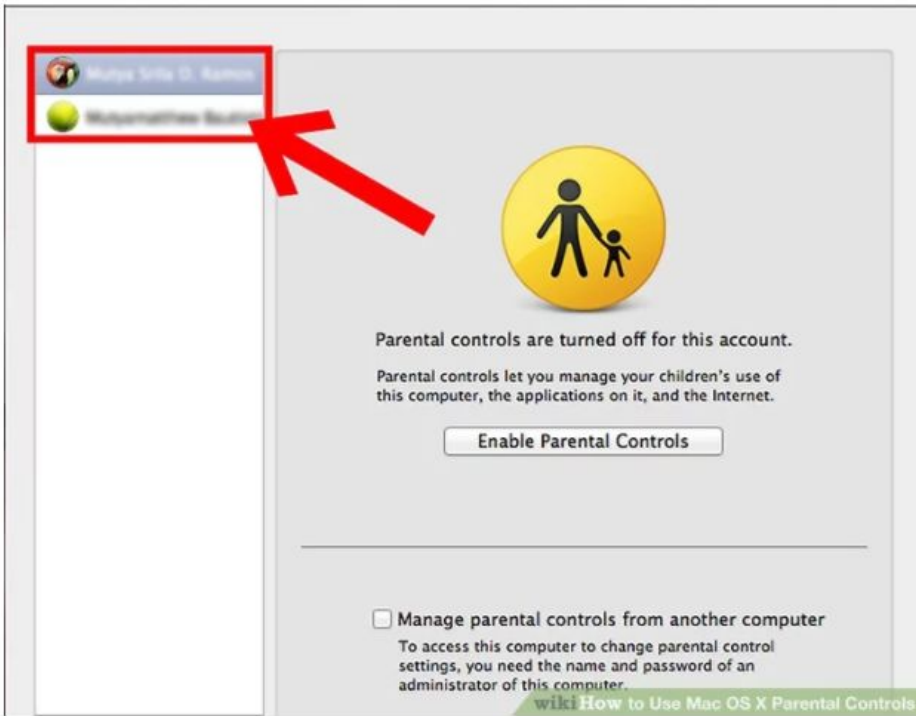

1 Navigate to Apple > System Preferences.

2 Under the System submenu, choose Parental Controls.

How to use Parental Controls with Mac OS

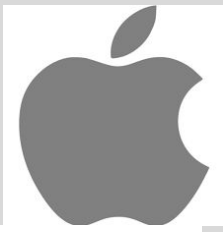

3 Choose the user account which you want to apply Parental Controls to. You can not apply Parental Controls to administrator users.

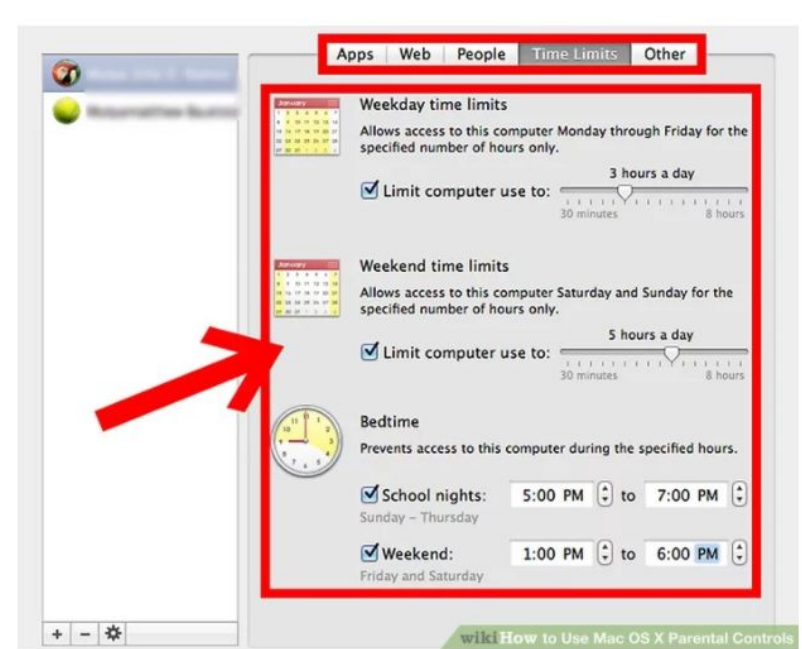

- If you can't make changes, make sure the lock icon at the left-bottom corner of the screen is Open. If not, click on it and enter your computer password to allow changes.

How to use Parental Controls with Mac OS

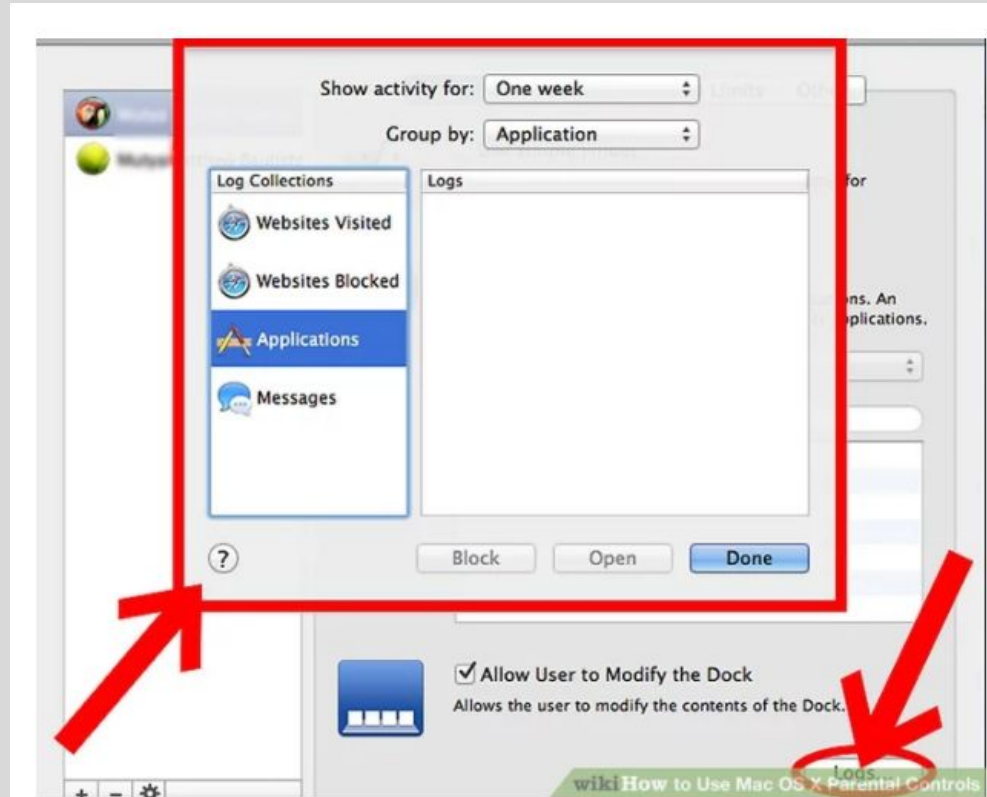

4 Click on Enable Parental Controls.

5 From the tabs located at the top of the window, you can edit permission and settings for the user. You can even monitor the user's iChat and Mail and filter Web Content. The best function is limiting usage time by giving it a schedule. For example, if you set 17:00-21:00 as the time that allows the user to login, the user will be automatically logged out at 21:00. This function is good to limit your children's playtime so they don't skip their homework.

How to use Parental Controls with Mac OS

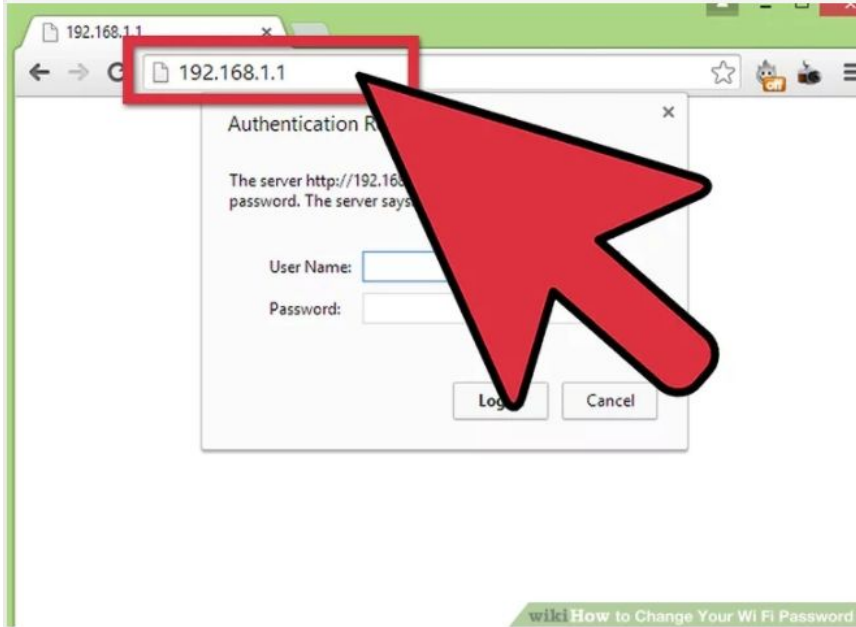

- 6** To check the user's recent activity on the computer, switch to the Logs tab. All the info is recorded there.

The ULTIMATE POWER - Change the Wi-Fi password

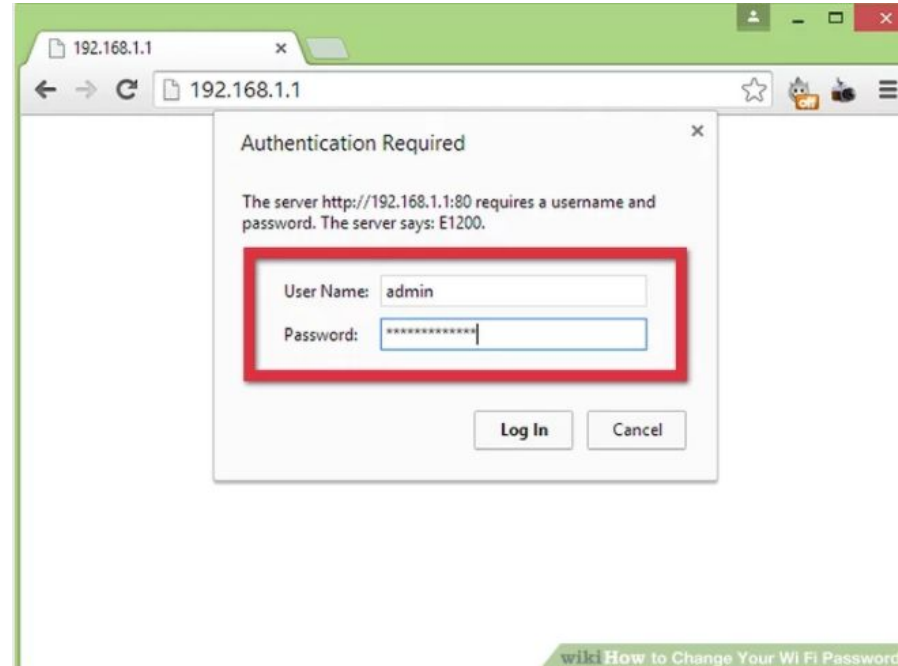

How to change your Wi-Fi password

wiki How to Change Your Wi Fi Password

1 **Open your router's configuration page.** You can access your router's configuration page through a web browser on a computer connected to your network. If you can't connect via Wi-Fi because you don't know the password, use an Ethernet cable to connect your computer directly to the router. This will bypass the need for the Wi-Fi password.

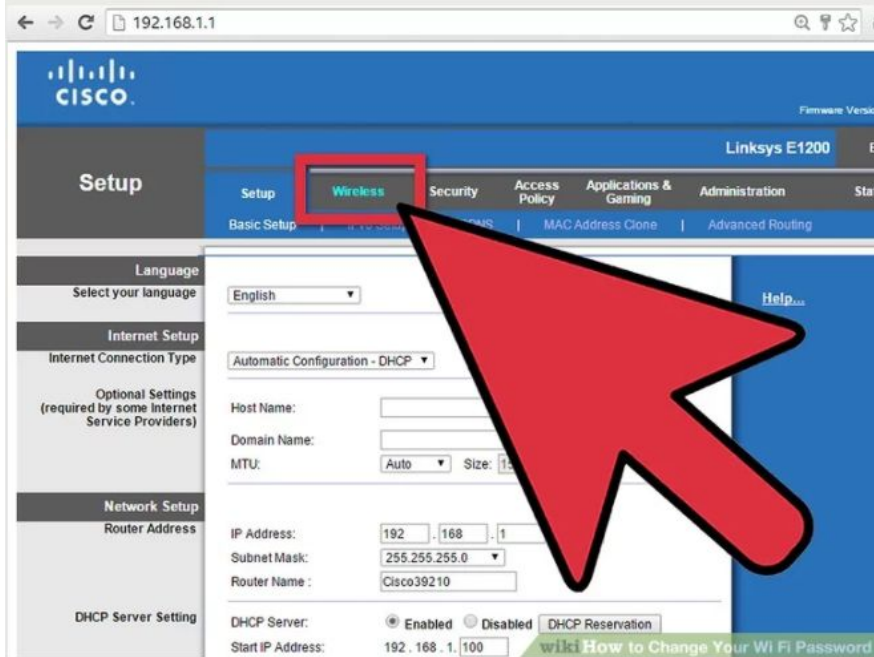

- Standard router addresses are `192.168.1.1`, `192.168.0.1`, `192.168.2.1`, or `10.0.1.1` (Apple) or `10.0.0.1` (Xfinity). Enter the address into your browser's address bar.

wiki How to Change Your Wi Fi Password

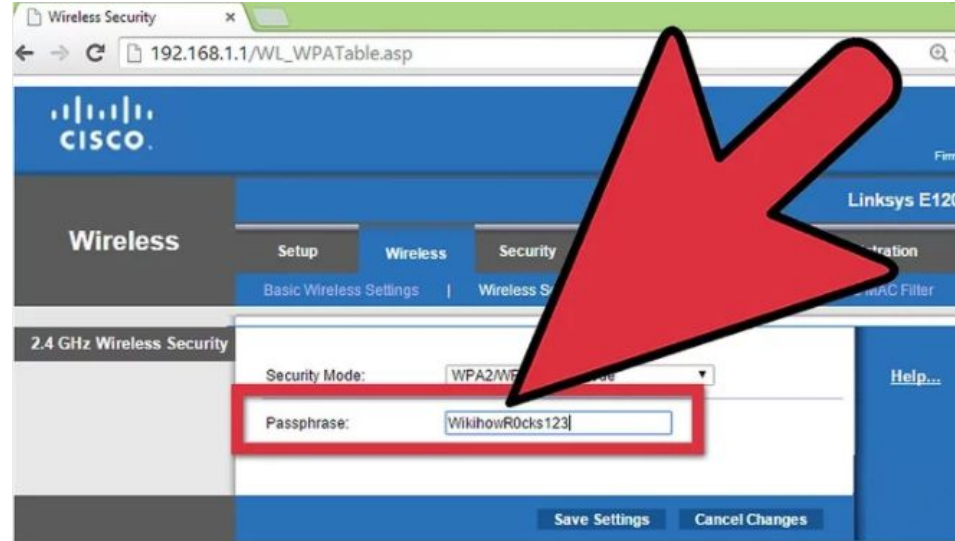

2 **Enter your router's username and password.** Every router will require a username and password before you can access the innards. If you never changed this when you first configured the router, chances are the username is "admin" and the password is "admin" or "password". Of course this varies from model to model, so you should search your model online to see your exact login info.^[2]

How to change your Wi-Fi password

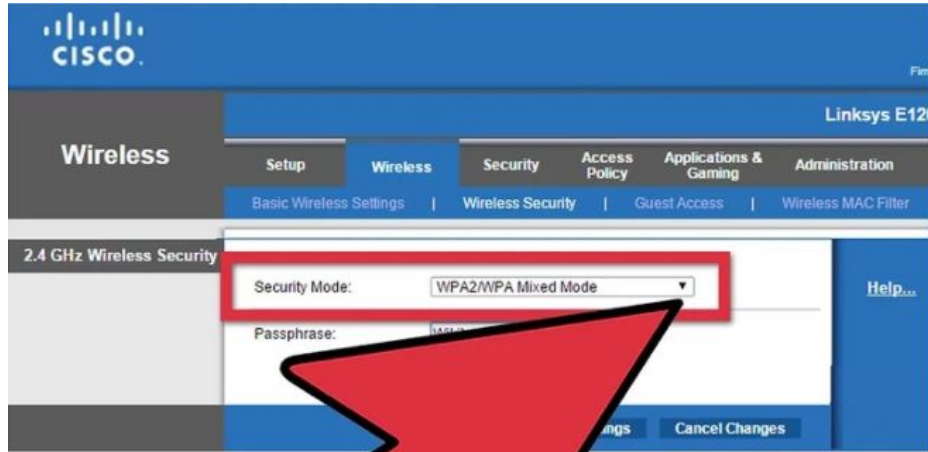

3 Open the Wireless section. Once you are logged into your router, you will need to find the Wireless section of the configuration page. The exact name changes from manufacturer to manufacturer, but generally you are looking for a "Wireless" or "Wireless Settings/Setup" tab or button.

- If your "Wireless" section has multiple subsections, open the Wireless Security page.

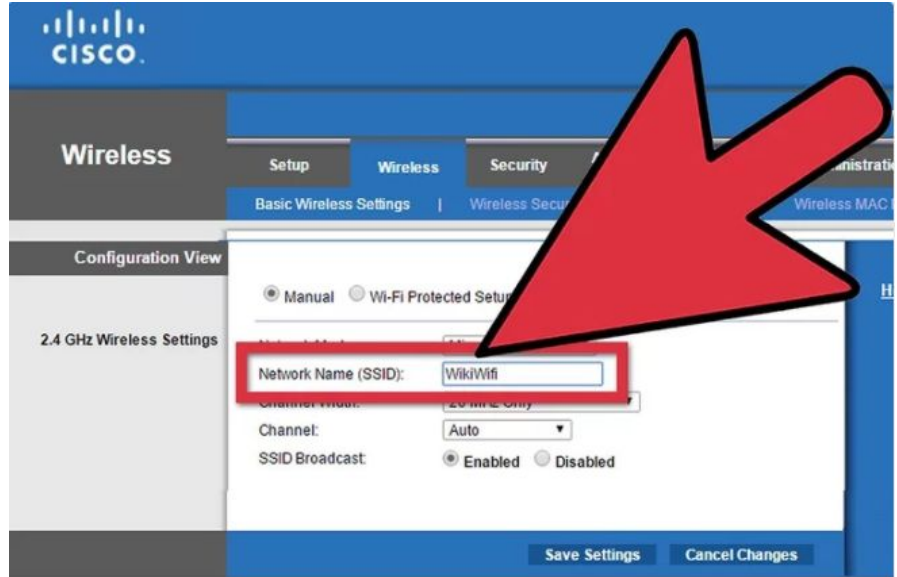

4 Change the password. Look for the box labeled "Password", "Passphrase" or "Shared Key". You can enter your new password into this box. Some routers will ask that you type the password again to ensure that you entered it correctly.

How to change your Wi-Fi password

wiki How to Change Your Wi Fi Password

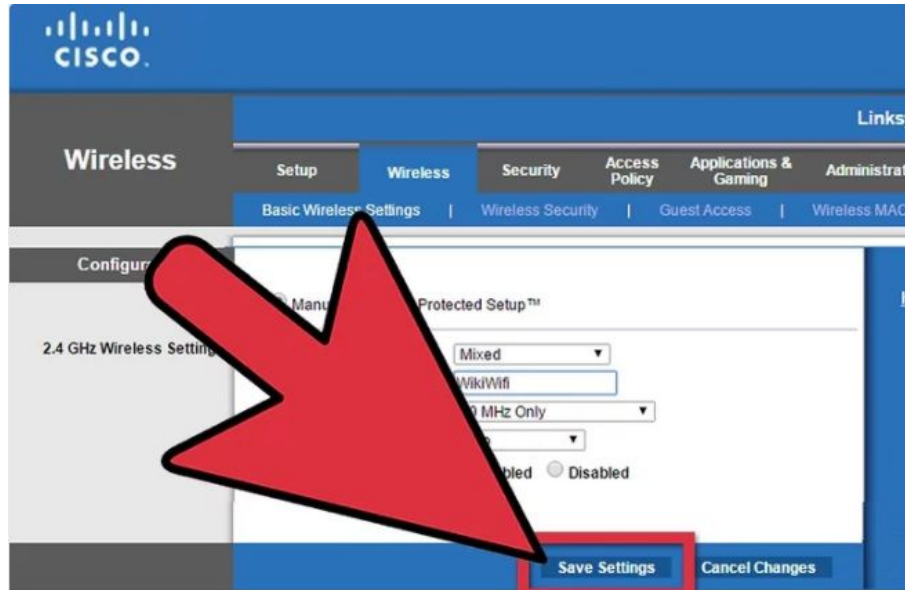

5 Check out your security type. There are three main types of wireless encryption: WEP, WPA, and WPA2. For the most secure network, you should be using WPA2. You may run into issues connecting older devices, however, in which case you could switch to WPA or WPA/WPA2. Selecting WEP is NOT recommended, as WEP encryption is very easy to break (it can take less than 30 minutes to crack a WEP password).

wiki How to Change Your Wi Fi Password

6 Change your network name. While you're here, take a moment to change your network name if you have not already. The name should not include any personally identifiable information, as the name will be publicly broadcast. Changing the name will help deter people from trying to break into it. Routers with default names are seen as easier hacking targets.

How to change your Wi-Fi password

How to Change Your Wi Fi Password

7 Save your settings. Once you are done entering in your new password, click the Apply or Save button. The button's location is different for every router, but is typically located at the top or bottom of the page. The router will take a few moments to process the change, at which point any devices currently connected would be disconnected.

- After your settings are changed, you can connect to your wireless network using your new password.
