#15: Mon, Mar 22, 2021

As of Round 2

11 people have passed >=3 tasks (Congrats!)

5 more have passed 2 (Congrats!)

In round 1, 19 tasks were passed.

In round 2, we increased that to 30 (none should have been tasks previously passed)

Today -

We’re going to try to use this as a studio to figure out what may be going wrong for tasks that aren’t passing.

30 minutes - in groups work on each others’ tasks (make it so that at least two people see each task)

10 minutes - identify any tasks where you aren’t sure (as a group) why they aren’t working.

We’ll use the rest of the time to go through as many of the “what the heck!?” tasks as we can as a full class.

In groups

In your google doc, write the list of tasks that you'd like feedback on. Include a link to your pages site.

Then, for the other members of your group, go through their trouble tasks.

Write down:

- What information patches you perceive on the index page and give them a title.
- What patches/links seem to have high/low information scent for the target task.
- Follow the links that have high scent and repeat the process.
- At the end, summarize the advice you'd give to improve it.
