

Rollbag™ R1075 Automatic Bagger

Performance package—air expeller, bag support, and flat seal assist!

The Rollbag R1075 is a fully automatic tabletop sealing machine designed for fast, efficient operation. This bagger is now equipped with our top three options: Articulating Bag Support, Flat Seal Assist, and an Air Expeller to remove excess air from the package before sealing. This cost-effective automatic bagger is compact, lightweight, fast, and easy to use.

Works with a wide variety of bags

The Rollbag R1075 Automatic Bagger combines a powerful electric drive motor with pneumatic force to open bags for filling, then seal and separate the filled bag. The flexible R1075 works with Rollbag brand pre-opened bags on a roll, ranging in size from 2" x 3" to 10" x 20". Poly bags can be presented one at a time or in attached sets of strip packages for kit packaging.

User friendly controls

A simple interface for storage of 10 job profiles enables fast and easy changeover for bagging different products. This automatic bagger can be triggered with the control panel or foot pedal, to leave the operator's hands-free for increased product loading. Simple maintenance combined with quality parts and technical support maximize dependable production time.

Safety features and extended warranty

Safety features include low-pressure jaw closure, jaw obstruction detection, unobtrusive guards, and a prominent emergency stop button. Simple maintenance combined with quality parts and technical support maximizes dependable production time. The Rollbag R1075 Automatic Bagger is made in the USA and includes a 1-year limited warranty, extendable up to 5-years when exclusively using Rollbag brand pre-opened bags on a roll or poly tubing!

Sealing Features

- This Air Expeller Bag Deflator mounts to the pressure bar and compresses the air out of the bag just prior to the sealing process
- The Articulating Bag Support is a pneumatically operated shelf that supports the bottom and back of the bag during the loading process. The shelf tips down and out of the way after the bag has been sealed
- Bag Spreader Seal Flatteners pull each side of the bag taught to decrease the possibility of wrinkles and increase seal integrity

Optional stainless steel table with adjustable funnel makes sorting and kitting product easy

Bag deflator gently forces excess air out of the bag just prior to sealing

Optional industrial quality mechanically adjustable stand designed for use with our tabletop baggers

Machine Features

- Capable of storing the sealing parameters for 10 jobs with on-board memory
- Automatically indexes the bag and positions it for fast loading and sealing
- Fastest bag changing capability in the industry
- Programmable time delay for operator pace control or integration with automatic feeding device
- Foot pedal, control panel, or optional photo-eye available to trigger bagger
- Strip Packaging

Rollbag R1075 Automatic Bagger Specifications

Speed	Up to 30 bags/min
Bag Width	2"–10"
Bag Length	3"–20"
Seal Width	1/8"
Film Thickness	1–5 mil
Dimensions	26" W x 28" D x 22"H
Electrical	120V, 5 amp option 220V, 3.5 amp
Air	80 psi @ 2–5 CFM
Weight / Ship Weight	75 lbs / 180 lbs
Shipping Dimensions	30" x 26" x 34"
Origin	Made in USA
Warranty	up to 5–years when exclusively using Rollbag brand bags on a roll

Extend the Rollbag R1075 warranty up to 5–years when exclusively using Rollbag brand pre-opened bags on a roll—from 2" x 3" to 10" x 20"

Maintenance Benefits

- Designed to minimize maintenance costs
- Self diagnostics ensure quick problem solving
- Off the shelf components

Safety Benefits

- Low-pressure jaw closing with an obstruction detection system for operator safety
- Unobtrusive guards
- Prominent emergency stop button
- 220 Volt version designed to meet CE requirements

Options

- Adjustable Funnel with Preparation Table / Work Sorting Table—Stainless Steel table mounted above the machine that allows for sorting, storing and kitting of product before manually pushing the product into the adjustable funnel which guides the product into the bag
- Additional Parts Funnels—Wide variety of standard and custom funnels to assist product handling
- Tabletop Console Stand is a mechanically adjustable stand for all the tabletop machines
