

**Challenge_**
Advanced

Using Scratch, present at least one idea or concrete action you can take to help achieve the **Sustainable Development Goal**.

To take on this challenge, you will need to follow certain criteria.

Content of the animation or game

Your animation or game should include the following elements :

☐	at least one action or idea to improve city planning
☐	at least two backdrops
☐	at least two sprites
☐	at least one sound or audio recording
☐	at least one dialogue between two sprites
☐	one interaction (e.g., question) with the user

Content of your Scratch program

Your program should include the following elements :

☐	motion blocks to animate your sprites
☐	at least one sensing block (e.g., to ask a question to the user)
☐	at least one conditional statement
☐	at least one loop
☐	at least two different event blocks
☐	an animation between 2 and 4 minutes

Elements related to publication

To publish your project, you should:

☐	have a meaningful title followed by Kreocode 2023 (e.g., Game About Recycling - Kreocode 2023)
☐	use only images, photos or sounds that are copyright free (no photo or personal information of students)
☐	cite any sources used in the space reserved for <i>Notes and Credits</i>
☐	pay close attention to your use of language
☐	indicate how to start your program in the <i>Instructions</i> section (if it does not start with the green flag)
☐	share your completed project
