W3C Community Group Hangout

2021-09-29

Background

- Developed chiefly in response to MCRActive and Active Westminster projects
- Github issue 120 - Customer Authentication (Nov 2019)
- Evolving into (lengthy) proposal Open Booking API: Proposal to facilitate walk-in and online booking via a membership scheme
  - Three related concerns addressed
    - Customer account management
    - Barcodes
    - Entitlements and pricing

OpenActive

Agenda (Q4)

1. **Requirements validation**
   a. Ensure that all requirements are captured and understood by all parties
2. **Technical analysis and trial implementation**
   a. Ensure proposal meets requirements within system limitations
   b. Address technical issues arising in the Implementation Forum
3. **Formalisation and Ratification**
   a. Integrate with standards documents where relevant
   b. Ratify standards formally

OpenActive
