Virtual orientation

This is an interactive PowerPoint that will assist you with figuring out for which modules you should register. If you follow the prompts on this PowerPoint, you will have clarity on the modules for which you should register. Certain slides require you to click a specific option (e.g. where you have to select your campus and year). There are also some slides that contain voice notes. Be sure to click on the voice note sign and listen to these. I hope you enjoy the presentation!

Specifications for ALL first-year students

Total credits for the year: 124

Total amount of modules: 12

Please note that the next slide provides you with a list of modules that are compulsory for all first-year students (6 modules). You will then be required to select your first specialisation subject and your second specialisation subject, after which you will be taken to a slide that lists the remaining modules for which you should register (6 modules). That gives you a total of 12 modules for which you should register.

Specifications for ALL second-year students

Total credits for the year: 128

Total amount of modules: 11

Please note that the next slide provides you with a list of modules that are compulsory for all second-year students (6 modules). You will then be required to select your first specialisation subject and your second specialisation subject, after which you will be taken to a slide that lists the remaining modules for which you should register (5 modules). That gives you a total of 11 modules for which you should register.
