**Looking Forward**

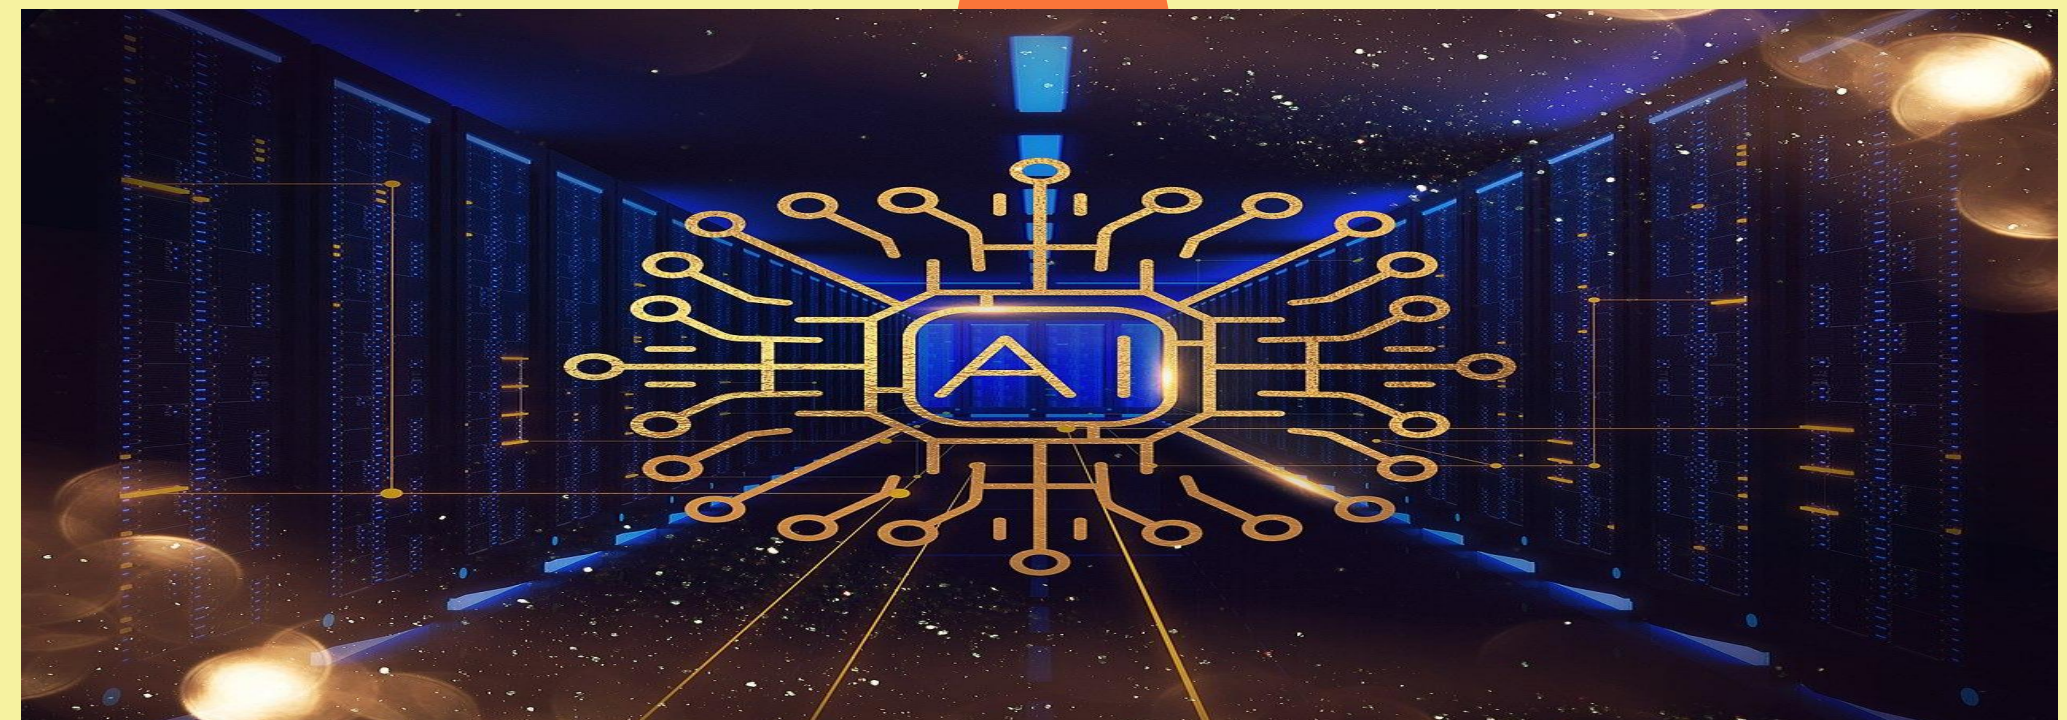

# INTRODUCTION

# Introduction

At the beginning of this class I had no idea how much technology could affect and be used in our classrooms. I didn't know what to expect of the course and was excited to see what I would learn.

This semester had many highs and few lows. I was excited to attend class and learned more about technology, the internet and social media than I even thought possible in seven weeks.

02

**Takeaways**

# Main Takeaways

Amanda Todd

The story of Amanda Todd was something brand new to me.

Digital Literacy

Why it's important, how it affects us, why we need to teach it.

AI

AI is something fairly new and will continue to change for years to come. It has many pros and some cons as well.

# The Story of Amanda Todd

- The internet is forever

- We have to be safe online

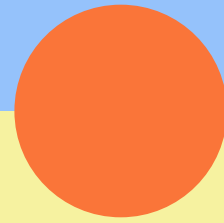

# Digital Literacy

The Jason Ohler article highlighted the importance of digital literacy. To have a understanding of how to have a positive digital footprint you need digital literacy.

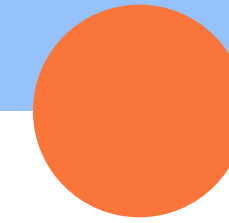

# Pros and Cons of AI (Artificial Intelligence)

## Pros

- Lesson Planning
- Idea soundboard
  - Starting point
  - create activities
- Relieve pressure

## Cons

- Lack of emotion
- Can be used in negative ways
  - (cheating)
  - Unoriginal

# Opportunities

# Opportunities

## Connections

We made connections with the people in our class through conversation, blogs, and online presence

## Creativity

We got to be creative in our work and chose something to learn using online resources.

## Resources

We were given many online resources that we can use in our future classrooms and careers.

# Moving Forward

In this class we were given the tools and resources to deepen our understanding of technology and the internet and this is knowledge we can carry with us through the rest of our schooling and into our career. The future is unknown especially when it comes to technology but now we are better equipped to handle it.
