Google

Google Search

I'm Feeling Lucky

# Tip 1: Start with the basics

- No matter what you're looking for, start with a simple search like **where's the closest airport?**. You can always add a few descriptive words if necessary.
- If you're looking for a place or product in a specific location, add the location. For example, **Multan**.

## Tip 2: Search using your voice

To search with your voice, say "Ok Google" or select the Microphone

## Tip 3: Choose words carefully

When you're deciding what words to put in the search box, try to choose words that are likely to appear on the site you're looking for.

For example, instead of saying **my head hurts**, say **headache**, because that's the word a medical site would use.

## Tip 4: Don't worry about the little things

- **Spelling:** Google's spell checker automatically uses the most common spelling of a given word, whether or not you spell it correctly.
- **Capitalization:** A search for **New York Times** is the same as a search for **new york times**.

Tip 5: Find quick answers

# weather

weather okara,punjab

Search

# image

- Google finds images just as easily and lists them at the top, when you add **image** to the end of your search.

The screenshot shows a Google search interface. The search bar contains the text "flower image". To the right of the search bar is a "Search" button and links for "Advanced Search" and "Preferences". Below the search bar, there are radio buttons for "the web" (selected) and "pages from Pakistan". A "Web" tab is visible with a "Show options..." link. Below this, a yellow banner displays "Flower Image" in blue, "images.google.com" in green, and the text "Search over a billion pictures and images using Google." Below the banner, the text "Image results for flower image - Report images" is shown. At the bottom, four image thumbnails are displayed: a pink flower, a black and white abstract image, a white floral pattern on a black background, and a purple flower.

# Expert search tips

# Search Operators

You can use symbols or words in your search to make your search results more precise.

- Google Search usually ignores punctuation that isn't part of a search operator.
- Don't put spaces between the symbol or word and your search term. A search for **site:nytimes.com** will work, but **site: nytimes.com** won't.

# Refine image searches

## Overall Advanced Search

- Go to [Advanced Image Search](#).
- Use filters like region or file type to narrow your results.
- At the bottom, click Advanced Search.

## Advanced Image Search

Find images with...

all these words:

this exact word or phrase:

any of these words:

none of these words:

Then narrow your results by...

# Search for an exact image size

Right after the word you're looking for, add the text **imagesize:widthxheight**. Make sure to add the dimensions in pixels.

Example: **imagesize:500x400**

# Common search techniques

# Search social media

Put @ in front of a word to search social media.

For example: **@twitter**.

# Search for a price

Put \$ in front of a number. For example: **camera \$400.**

# Search hashtags

Put # in front of a word. For example: #islam

# Exclude words from your search

Put - in front of a word you want to leave out.

For example, **jaguar speed -car**

# Search for an exact match

Put a word or phrase inside quotes.

For example, "**tallest building**".

"**tallest \* building**"

# Search within a range of numbers

Put .. between two numbers.

For example, camera **\$50..\$100**.

# Combine searches

Put "**OR**" between each search query.

For example, **marathon OR race**.

# Search for a specific site ...

Put "**site:**" in front of a site or domain.

For example, **site:youtube.com** or **site:.gov**.

# Search for a specific site ...

- Interaction sidebar:** "About Wikipedia", "Community portal", "Recent changes", "Contact Wikipedia", "Donate to Wikipedia", "Help".
- Toolbox sidebar:** "What links here", "Related changes", "Upload file", "Special pages".
- Today's featured article:** "The fauna of Scotland is generally typical of the north-west European part of the Palearctic ecozone, although several of the country's larger mammals were hunted to extinction in historic times and human activity has also led to various species of wildlife being introduced. Scotland's diverse temperate environments support 62 species of wild mammals, including a population of Wild Cats, important numbers of Grey and Harbour Seals and the most northerly colony of Bottlenose Dolphins in the world. Many populations of moorland birds, including Blackcock and the Red Grouse, live here, and the country has internationally significant nesting grounds for seabirds such as the Northern Gannet. The Golden Eagle has become a national icon, and White-tailed Eagles and Ospreys have recently re-colonised the land. The Scottish Crossbill is the only endemic vertebrate species in the British Isles. Scotland's seas are among the most biologically productive in the world; it is estimated that the total number of Scottish marine species exceeds 40,000. An estimated 14,000 species of insect, including rare bees and butterflies protected by conservation action plans, inhabit Scotland. Conservation agencies in the UK are concerned that climate".

Search with an image on Google

# Search with an image on Google

You can learn more about an image or the objects around you with Google Lens. **For example**, you can take a photo of a plant and use it to search for info or other similar images.

## What you find when you search

Your results can include:

- Search results for objects in the image
- Similar images
- Websites with the image or a similar image

# Upload an image

1. On your computer, go to a web browser.
2. Go to [Google Images](#).
3. Click Search by image Google Lens. 
4. Click **Upload a file**.
5. Select an image.
6. Click **Open** or **Choose**.

# Drag & drop an image

1. Drag & drop an image
2. On your computer, go to a web browser.
3. Go to [Google Images](#).
4. On your computer, find the file with the image you want to search with.
5. Click the image.
6. Hold down the mouse, drag the image, and then drop it into the search box.

# Search with a URL

1. On your computer, go to a web browser and access the website with the image you want to use.
2. To copy the URL, right-click on the image and click Copy image address.
3. Go to Google Images.
4. Click Search by image Google Lens and then Paste image link.
5. In the text box, paste the URL and click Search.

Tip: Browsers don't save the URLs you search within your browsing history. Google may store the URLs to make our products and services better.

Search any image with Google Lens

Drag an image here or [upload a file](#)

OR

Paste image link

Search

<https://images.google.com/>

# Search with an image from a website

1. On your computer, go to the Chrome browser.
2. Go to the website with the image you want to use.
3. Right-click the image.
4. Click **Search Image with Google Lens** to display results in a sidebar.

# Search with an image from search results

1. On your computer, [go to Google Images](#).
2. Search for an image.
3. Click the image.
4. At the top right, click Search inside image .
