Filecoin Plus Community Governance Meeting

2024 June 11

Agenda

01	**Program Updates**

- FIL Dev Summit
  - July 9-11 in Brussels
- Inactive Allocators
  - 18 who have not onboarded
- DataCap refresh
  - Allocator responsible diligence
- Diligence Reviews Process
- Rolling Applications

02	**FAQ**

- Spark Retrieval
- LDN Sunset
  - How to apply for Open Pathway from FIDL
- Trigger Refill

03	**Discussion**

Inactive Allocators

Inactive Allocators

There are 18 organizations who after 90+ days have not setup an onboarding pathway or made any allocations.

Allocators who wish to have their DataCap remain active need to provide a timeline or start client support by June 24 in order maintain DataCap.

https://github.com/filecoin-project/Allocator-Governance/issues/6

Filecoin PLUS

Inactive Allocators

Action

Organizations should comment in Allocator-Governance Issue 6 with their timeline for onboarding pathway or start allocating data.
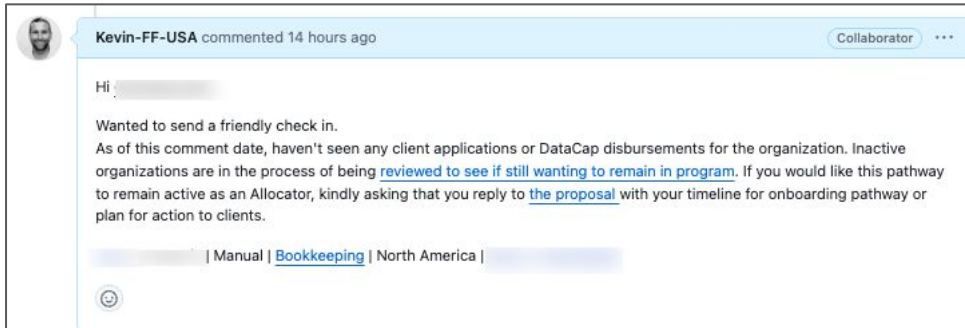

If no response, organization will remain in the Allocator comms, but have their DataCap rescinded and <u>have to reapply</u> in order to receive an initial allocation.

https://github.com/filecoin-project/Allocator-Governance/issues/6

Filecoin PLUS

Inactive Allocators

Impacted organizations received a comment posted in their application seeking timeline for onboarding.

Kevin-FF-USA commented 14 hours ago — Collaborator — ···

Hi [redacted]

Wanted to send a friendly check in.
As of this comment date, haven't seen any client applications or DataCap disbursements for the organization. Inactive organizations are in the process of being reviewed to see if still wanting to remain in program. If you would like this pathway to remain active as an Allocator, kindly asking that you reply to the proposal with your timeline for onboarding pathway or plan for action to clients.

[redacted] | Manual | Bookkeeping | North America | [redacted]

1. Web3mine | f03019928
2. Nebula Block | f03019861
3. TopBlocks | f03019931
4. QC Data Center | f03014608
5. FBG Capital | f03019934
6. ZhongYiGuoLian | f03019935
7. XnMatrix | f03019938
8. SUPERB GRACE LIMITED | f03018026
9. New Web Group | f03015081
10. Lighthouse.Storage | f03019939
11. IPFSCN | f03019942
12. ANTPOOL | f03019944
13. ZetaCube Inc | f03018530
14. Power Meta Corp | f03019948
15. Twinquasar - CIDgravity | f03019296
16. Twinquasar - CIDgravity | f03019298

DataCap Refresh
 - Allocator Responsibilities

DataCap Refresh

Organizations will begin receiving next rounds of DataCap refresh from the Root Key Holders.
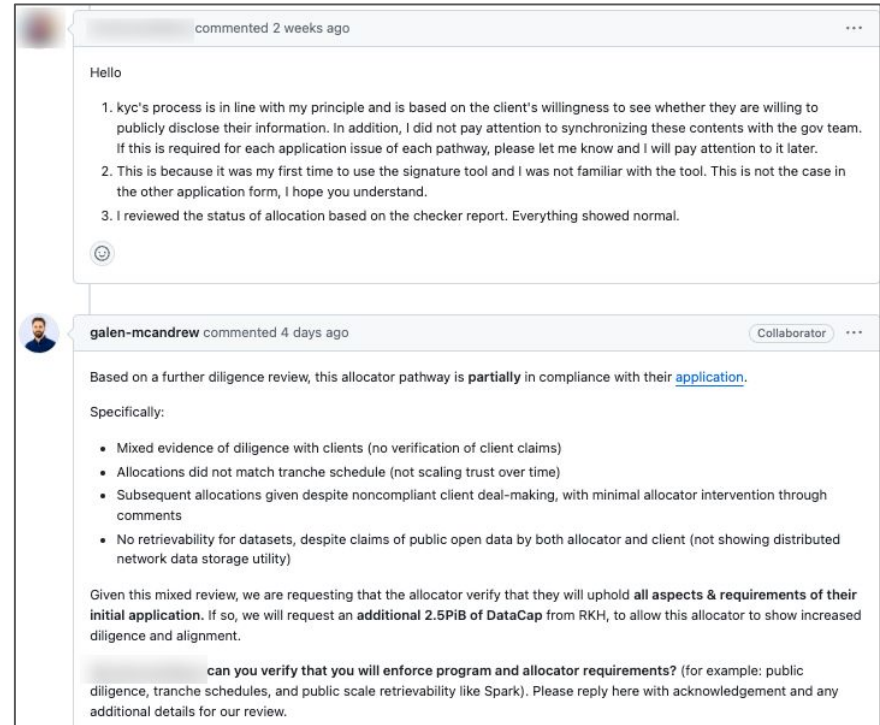

Please see your open diligence review for action or comments needed.

https://github.com/filecoin-project/Allocator-Governance/issues

Filecoin PLUS

DataCap Refresh

Organizations received a comment in the Allocator-Governance repo with comment indicating refresh grant and required diligence requirements.

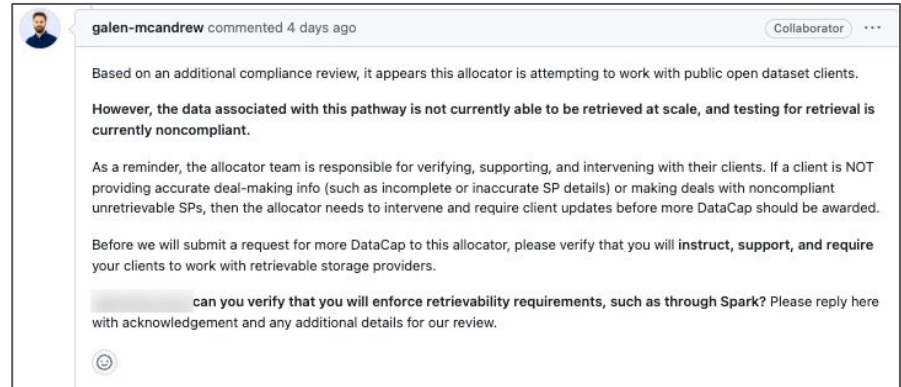

https://github.com/filecoin-project/Allocator-Governance/issues

DataCap Refresh

If diligence standards were not met or maintained in initial allocation, comment left with specific action items required to be eligible for refresh.

galen-mcandrew commented 4 days ago   Collaborator ...

Based on an additional compliance review, it appears this allocator is attempting to work with public open dataset clients.

However, the data associated with this pathway is not currently able to be retrieved at scale, and testing for retrieval is currently noncompliant.

As a reminder, the allocator team is responsible for verifying, supporting, and intervening with their clients. If a client is NOT providing accurate deal-making info (such as incomplete or inaccurate SP details) or making deals with noncompliant unretrievable SPs, then the allocator needs to intervene and require client updates before more DataCap should be awarded.

Before we will submit a request for more DataCap to this allocator, please verify that you will **instruct, support, and require** your clients to work with retrievable storage providers.

_____ can you verify that you will enforce retrievability requirements, such as through Spark? Please reply here with acknowledgement and any additional details for our review.

Allocator Applications
- Initial or reapplying

Apply (or re-apply)

If an Organization wishes to apply or reapply to become an Allocator, there is now a rolling application process.

No longer need to wait until an open election period.

Detailed guide posted to the FIDL blog.

1. **Create a Pull Request:**
   - Visit the Allocator Governance GitHub page.
   - Create a new pull request by adding a new file to the repository.
   - This file can be empty; just name it appropriately, like "Allocator application".
   - Commit the change and add it as a branch, then click "Create pull request".

2. **Access Your Application Form:**
   - Wait for about a minute. A comment will appear with a link to the airtable, which serves as your actual application form.
   - Open this link in a new tab for easy access.

3. **Fill Out Your Details:**
   - Ensure you have your GitHub ID and the pull request number handy.
   - Complete the form with the required information. At the end, you'll find a section for your contact details. Rest assured, this information is solely for KYC purposes and won't be published.

4. **Confirm Your Submission:**
   - After submitting the form, return to GitHub to find an issue created on your behalf with all your application details.
   - Check the allocator registry GitHub for a new issue requesting to add you to the JSON file used by the governance team. This will also generate a pull request for easy merging.
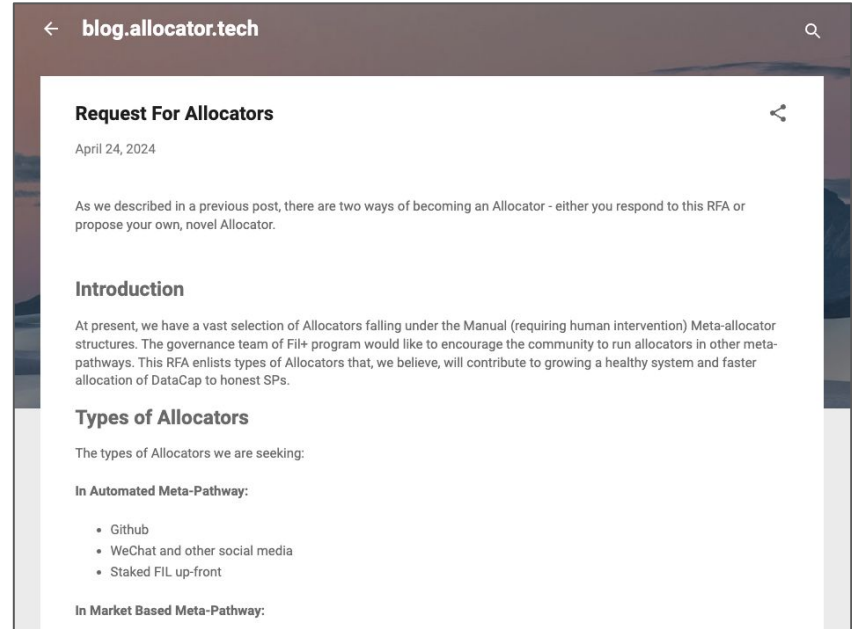

5. **Receive Confirmation:**
   - If you provided your email address, you'll receive a confirmation email with the details you submitted. This allows us to contact you quickly if there are any issues with your application.

Request For Allocators

April 24, 2024

As we described in a previous post, there are two ways of becoming an Allocator - either you respond to this RFA or propose your own, novel Allocator.

Introduction

At present, we have a vast selection of Allocators falling under the Manual (requiring human intervention) Meta-allocator structures. The governance team of Fil+ program would like to encourage the community to run allocators in other meta-pathways. This RFA enlists types of Allocators that, we believe, will contribute to growing a healthy system and faster allocation of DataCap to honest SPs.

Types of Allocators

The types of Allocators we are seeking:

In Automated Meta-Pathway:

- Github
- WeChat and other social media
- Staked FIL up-front

In Market Based Meta-Pathway:

FAQ

Spark Retrieval

Should be >85%

Miners Performance		
Rank	Miner Actor ID	Successful Retrievals ↓
0	f01861488	86.6%
1	f032824	86.4%

- **Process**
  - **IPNI to find cids within data that has been indexed.**
  - **Attempt to download and report aggregate success rate.**

- **SPs actions**
  - **Publish index to IPNI**
  - **Retrieval over HTTP (e.g. booster-http)**
  - **Public, non IP filtered access**

- **Metric**
  - **Of different retrieval attempts to miner/actor.**
  - **What % was successfully download.**

Filecoin PLUS

LDN Requests

- **The LDN pathway has been sunset**
- **All DataCap is now managed individually be each Allocator**
  - **VS a shared community pool in the LDN model**
- **FIDL has developed tooling and a public open data application.**

Have a Open Data or Private Data project that needs DataCap?

- First time users can get up to 50TiBs and make deals to build a reputation
- Trusted users can then apply for larger amounts of DataCap allocated over 4 segments

Just click the button below, fill in project details and the FIDL team will review and reply

Apply for DataCap

https://www.fidl.tech/apply-for-datacap
