KNOWLEDGE BASE

- Microsoft Stack(C#, .NET, EF, Dapper)
- Rest, Restful Services
- MS-SQL, PostgreSql, Oracle
- Microservices, Event Driven Arc. Monolith, Modular Monolith, CQRS
- DDD, TDD, Unit test, Nunit, Moq, Ocelot etc.
- Clean Code, Clean Arch.
- RabbitMQ, Hangfire, Reddis
- Identity Server, Oauth2, JWT
- Javascript(React)
- Agile, Scrum, Jira

EDUCATION

- Uskudar University, Master of Computer Engineering (w/o thesis)
- Anadolu University, MIS
- Balıkesir University, Computer Programming
- Tuzla Technical High School, Computer Programming

INTERESTS

- Product Management
- Docker, K8s
- Writing
- Finance, Economy

HOBBIES

- Tennis, Basketball, Cycling, Hiking
- Reading
- Music Producing

PROFILE

Software developer with over 6 years of professional experience in backend development, having worked on various projects and collaborated with diverse teams. I apply a crafter's mindset, a growth mindset, and a customer-first perspective in both my programming and everyday life.

EXPERIENCE

○ **Senior Backend Developer**

Borda Technology - April 2023 to Present

Developed a hospital asset management product with using clean arch., microservices with event based communication.

- Unit testing on every microservices up to %90 coverage.
- Refactoring the app microservices to modular-monolith.
- Developing a workflow, actions mechanism to extend user functionality (similar to N8N)

○ **Senior Backend Developer**

HangiKredi - November 2021 to April 2023

Added features like financial assistance and budget management to the app that compares credit products.

- Refactoring the current custom authentication system to Identity Server.
- Added a new gateway using Ocelot, and also a BFF layer added to the app that serves 10+ microservices.

○ **Backend Developer**

Acıbadem Technology November 2020 to November 2021

Playing a significant role in the increasing performance of some modules in the app like Stock Counting, and Stock Transaction Management at Material Management Team.

- Leading the junior developers at learning dotnet & ef core
- Helping teammates about understanding DDD & Modular-Monolith arch.

○ **Full-Stack Developer**

PAK Group July 2018 to November 2020

Working with co-workers in different departments and helping them digitalize their work developing fast-paced, various applications.

- Creating an architecture purposed fast-paced development.
- Developing a Dynamic Form Builder tool with no code using React.
