

Eko 16.14

Enhancement

- **Workflow template access permission**

A permission that allows specific workflow template on admin panel to be visible and accessible for user in specific directory group.

***Remark:** The UI to enable workflow permission will be available for clients on admin panel in future version. The permission can now only be enabled by system configuration. To receive an assistant with the configuration, please contact your account manager, customer success manager or send a ticket inquiry to our support team to make a request.
