Status Sub Projects & Working Groups EdgeCloud

Scope, Meetings, Mailing list: https://github.com/camaraproject/EdgeCloud

Deliverable	R/O	Current status / Achievements
API Definition	R	• **Traffic Influence:** v0.9.3 is in progress including user mobility cases. Adding UE mobility notification & automatic mobility capabilities. Discussion to add a new requirement Device Source IP Port. • **Simple Edge Discovery API** v1.0.0 released. A new repository for this API has been created only for release management purposes, the API Definition is still under the Edge Cloud API Family. • **EdgeCloud_LCM API** (release v0.9.3-wip) To add 3-Legs auth and to fix minor formatting corrections to pass the Megalinter and Spectral tests.
API doc/user stories/testcases	R	• Documentation has been provided for all 3 APIs. However, there is a new way to include the current documentation information in an md document in the API yaml as Commonalities has defined. We have decided to keep the current md documentations for the APIs but, in future versions, add all the information in the API yaml and remove the md document. • Work on a general user story to explain the use of all the Edge Cloud Family APIs.
Implementation	R	• **Traffic Influence**: Implementation under validation by Telecom Italia (TIM): • **Simple Edge Discovery**: Validated by Vodafone and Telstra
API Reviews and extensions	O	• A new API will be created to allow end-users to retrieve the endpoint of the Edge application instance. • In process of reviewing conformance with API Design Guidelines in all 3 APIs to release stable version. • Restructuring of the Edge Cloud repository folder directory and cleaning it up
