

**UNIVERSITY
OF ALBERTA**

Research Technologies Seminar Series

Topic: Single Cell Transcriptomics

Nov. 23 | 1 - 2 p.m. | ECHA 2-140

Mike Wong
Coordinator, Advanced Cell Exploration Core

“Overview of single cell sequencing at the Advanced Cell Exploration Core”

Dr. Jason Plemel
Assistant Professor, Dept. of Medicine

“Using single cell RNA sequencing to understand the complexity of the microglial response”

The Research Technologies Seminar Series is designed to highlight core facility infrastructure and services to increase the visibility of these important resources on campus. The seminar series provides attendees the opportunity to learn how to incorporate instrumentation and services into their research programs, and also learn about the innovative research supported by our facilities.
