

Lamp & Ray Time

Idea

Show time flashes of light.

Flash on the Earth, in orbit of the Earth and the Moon.

Time source: GPS and GLONASS.

Production of watches working on this principle.

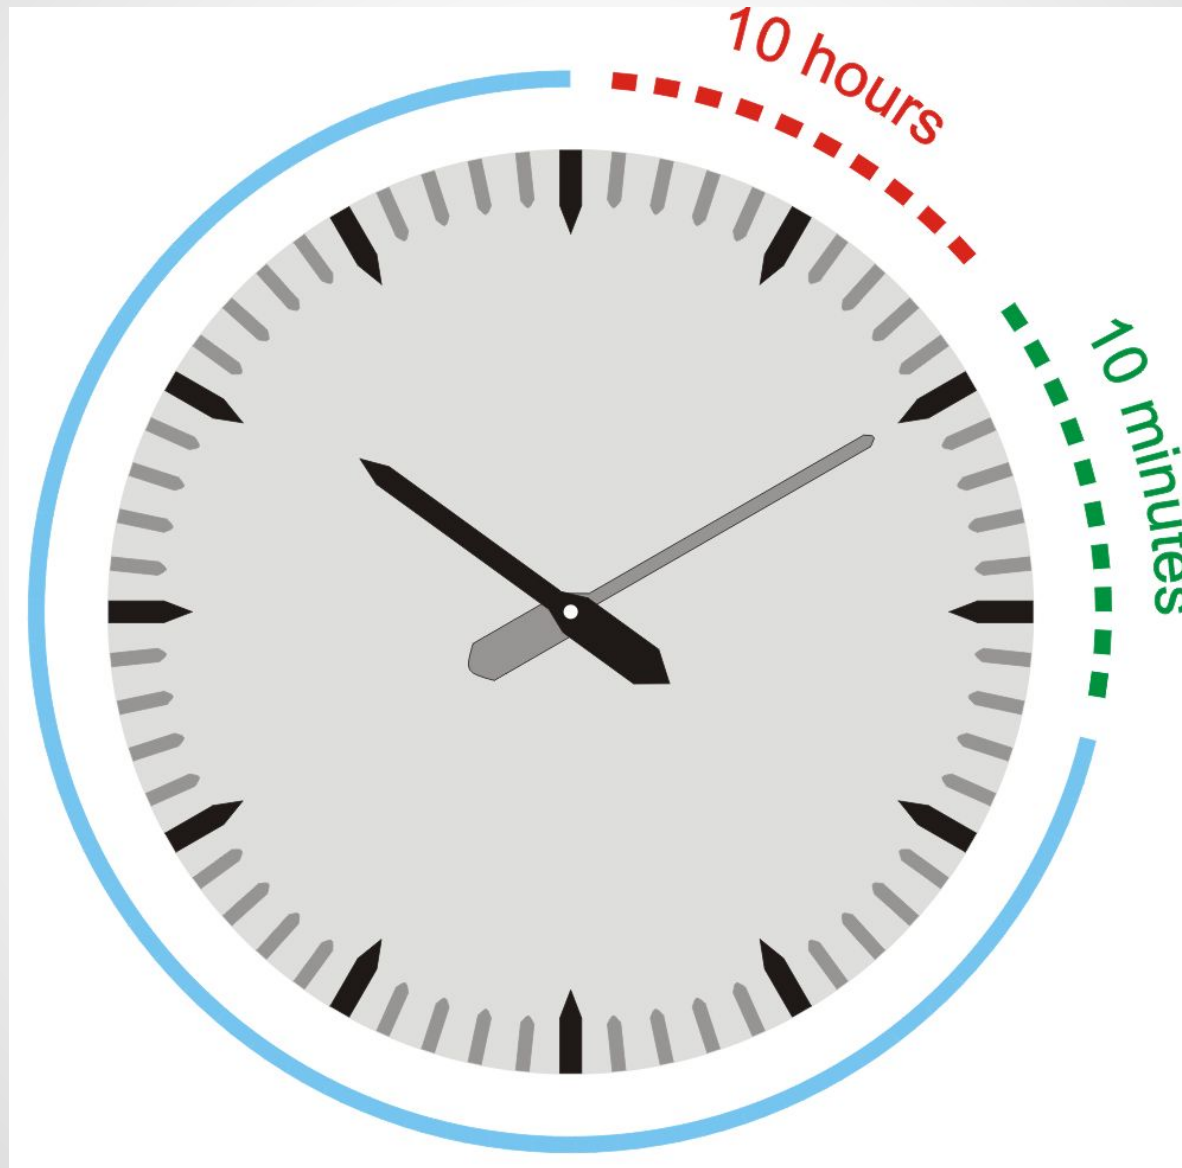

Option 1. The hours and minutes are different color.

Amount of red flashes - hours,

amount of green flashes - minutes.

Option 2. The hours and minutes are characterized by long bursts. The color does not change.

The principle of the time display, option 1

The principle of the time display, option 2

Episode IV. Time on the Moon

Video. [The time of landing of "Apollo-11" 8:17 PM.](#)
