

# Connie White

Chemistry major, masters in science education -

Taught HS - Chemistry, Physics & Math for several years - loved finding ways to motivate and engage my students

Early adopter of technology and my first conference invitation was at the National Physics Conv in CA. on the use of data collection probes using the station approach.

This led to consulting with IBM to help teachers use technology to enhance instruction and student learning. More consulting and then I was recruited as the Technology Director at Lakeview Academy (one of the first 1:1 programs in the country)

Director of Technology & Learning - Lakeview Academy 2001

Director of Learning & Innovation - Woodward

Connie White - to help schools and individuals constantly grow.

Consulting in student-centered approaches (constructivist) using technology.

Created training manuals for educational software, wrote lesson plans and trained teachers all over the country.

After 2007, started working with Educational Collaborators and have led dozens of school audits, worked to help schools develop strategic plans, offered pd, online classes for teachers, worked with schools in Doha, India, Germany, Taiwan, Turkey, Canada, Bermuda, Puerto rico, and more.

# Facebook post -> radio interview....

Economic downturn in 2008 - led to faculty meetings asking teachers to work on ourselves.

Launched Moodle LMS

In preparation for H1N1 to get teacher buyin

Prepared for Snowstorm in Jan 2011

*“Very cool, Lakeview turned snow days into school days from the privacy of our own home..in our pj’s”*

### "Ice-proof" learning happens at Lakeview

A Gainesville prepares for winter storm, but the learning continues for its Middle and Upper School students. For the very first time, Lakeview is implementing its "Remote School".

Lakeview Academy teachers and administrators had already developed wiki pages and other online access tools for their students to use in case school needed to be closed, tools that are accessible from the school's website.

"We just came off a long t had three great days of sc, ice has come and we can't, Berry said. "We don't want t process, and this will allow u where we were last week."

Lakeview student Thomas Paris checked the online assignment the morning and found a history assignment, so he wouldn't fall b Advanced Placement course.

# Snow days virtually eliminated with Web tools

- Relationship Skills

- Emotional Well-Being, Fairness and Belonging, and Academic Engagement

# Engagement By Design Strategies

Students who are both challenged and love the classroom experience are engaged students; engaged students are students who are doing their best learning. Research confirms that effective classrooms must be led by teachers who deeply know their craft and understand the essential nature of the interactions between student, teacher, and content.

# What is Woodward Academy's Portrait of a Learner?

A Portrait of a Learner represents Woodward Academy vision for the development of the Social Emotional Competencies, character traits and/or 21<sup>st</sup> century skills that our students will need to succeed in college, career and life.

It is one of the most powerful things that we can do to launch Woodward on its journey to redefine student success.

# Learning Targets - Higher Levels of Thinking

## Ethical Dilemmas in Science & Technology

**Example Learning Target:** *I can develop and use critical thinking skills to analyze information and situations to respond and act ethically concerning scientific research, practice, and technology.*

Assessment(s):

- Students will present a 2-3 minute persuasive speech about a topic in bioethics as part of a Senate Hearing (examples: clone living organisms, restore extinct species or edit our DNA)
- Students participate in a bioethical mock trial - Should the US government approve and fund the release of genetically modified *Aedes aegypti* mosquitoes to suppress the mosquito population? (Students will be assigned a role)
  - Ex. Director of CDC, Secretary of Commerce, Governor of Florida, Ecologist, Secretary of the Interior, CEO of Biotechnology Company, Bioethics Professor, etc.

# Providing choice in assignments and projects: Based on student interests and passions.

Card Sort

What are values, morals and ethics in a multicultural context?

Company Code of Ethics

**Be flexible and respond to student's needs. Be open for changes in curriculum and teaching methods to cater to student's needs and interests.**

After studying the ethical dilemmas of self-driving cars, my class is building two electric cars. They are programming Arduino Sensors and Raspberry Pi's to create a car for a blind person.

Infento Kits

<https://bit.ly/Infento23>

Implementing student-led discussions and presentations: Allow students to lead class discussions and presentations, giving them the opportunity to share their knowledge and insights with their peers.

### Chat Assignment

Have your students engage in a conversation with an AI to assess and deepen their understanding on a topic of your choice.

### Learning Objectives

Students will engage in a conversation with an AI to assess and deepen their understanding of the role of Jennifer Doudna, a biochemist at Berkeley, and the discovery and development of the gene-edited technology known as CRISPR.

Developing critical thinking and ethical reasoning skills empowers students to make well-informed and ethical decisions.
