

Five effective ways for parents to support students with AI

1

Build background knowledge with Chatbots

Use chatbots like Microsoft CoPilot, ChatGPT and Google Gemini to help you understand concepts yourself.

Sample Prompt

"I am a parent helping my 6th grader study. Explain photosynthesis to me in a way that helps me understand and teach it to my child."

2

Get instant homework help

Use Google Gemini to assist your child with homework. Ask the AI to guide them without giving them the answer.

Sample Prompt

"My child is struggling with this math problem $3x+5=53$ on her homework. Can you help her solve it without giving her the answer?"

3

Create study guides with digital or written notes

AI assistants like Google Gemini can identify text from an image and turn it into a study guide.

Sample Prompt

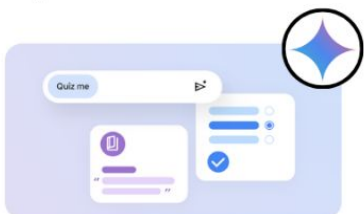

After uploading a picture of written notes. "Create a study guide for me using these notes."

4

Get "just right" resources in seconds

Utilize the academic textbooks Google Gemini can pull information from with OpenStax to create resources on any topic.

Sample Prompt

"@OpenStax I am a 9th grader. Please teach me about atoms."

5

Introduce pre-programmed AI Tutors

SchoolAI's Spaces allow your child to interact with safe, subject specific GPT-powered AI tutors.

For subject specific tutors go to app.schoolai.com/discover/subject-tutors
