[84] Similar to leather armor, this armor is a jacket made of leather stitched together. However, it adds more protection by using large metal rivets to reinforce and catch weapons. This armor has little drawbacks while grant some more protection than leather armor. It is a desirable choice for those still seeking maneuverability while gaining that little bit extra AC bonus.

Rune: Armor Potency  
abjuration, magical

Price: dependent

Bonus Value: dependent

You can attach an armor potency rune to a suit of armor and add the rune's bonus value to AC. For example, Padded Leather Armor with a +3 Armor Potency Rune would grant an AC bonus of +4, instead of +1. Unless otherwise listed, an armor potency rune is an uncommon item.

Minor (800 silvers, +1). +1 Armor Potency Rune.

[88] bomb, consumable, fire, splash

Alchemist's fire is a combination of several volatile liquids that ignite when exposed to air and is typically stored in a sealed flask. Alchemist's fire deals the listed fire damage, Persistent Damage, and splash damage. The target can end this Persistent Damage by normal means of removing the condition or by becoming submerged in water or otherwise entering an area deprived of air. Unless otherwise listed, an alchemist's fire is a common item, and all damage has the fire tag.

Lesser (10 silvers). 1d8 fire damage, 1 Persistent Damage and 1 splash damage.

[89] This bow uses a lock and trigger mechanism to shoot a shortened arrow, sometimes called a bolt, at a target. Unlike longbows or recurve bows, a crossbow only requires the user to pull the cording back into the lock. Once in place, the user does not need to hold the weight of the pulled cording to aim and fire. For this, the crossbow takes little training but more time to reload a bolt. A crossbow, while simpler to use, has a more complex design, with a lath, stock, and lock. The lath is the front cross piece and forms the arms of the bow from which the cording is drawn back. The stock is a straight or carved piece of wood extending backwards from the lath. Along the stock, the cording is drawn and then a bolt placed on top of notched into the back of the cording. Finally, the lock is the mechanism into which the cording is hooked and which, when triggered, releases the cording to let the attached bolt fly.

[90] A special classification within swords, a rapier is similar to a longsword with a blade length between three and four feet, however the blade is made thinner and lighter without sharpened edges. This makes it a choice weapon for combined defense and offense as well as a design choice. While they are considered closely related to the longsword through their length, the rapier has distinctive similarities with other swords. Many rapiers are forged with increasingly elaborate guards and shorter hilts, designed for single handed use similar to shorter bladed weapons.

[91] Agile. The multiple attack penalty you take on the second Strike each turn with this weapon is -4 instead of -5, and -8 instead of -10 on the third and subsequent Strikes in the turn.
