Workflow for building up a prompt:

- 1 Subject: subject term (i.e. space whale) *required
- 2 Style: style modifier (i.e. in the style of art nouveau) or artist (i.e. by alphonse mucha)
- 3 Format: type of image (i.e. photograph of)
- 4 Booster: quality booster (i.e. trending on artstation)
- 5 Solidifier: repetition (i.e. space whale, a whale in space)
- 6 Vibe: moods or emotions (i.e. control the soul)
- 7 Weights: exclusion (i.e. --no plants) and mixing (i.e. by alphonse mucha:75 | by andy warhol:25)
- 8 Perspective: viewpoint (i.e. through a porthole)

Source: <https://www.saxifrage.xyz/post/prompt-engineering>

Template: [format] of [subject term], a [solidifier], [perspective], by [artist:75] | by [artist:25] / in the style of [style], [variant], [booster], [exclusion]
Example: photograph of a space whale, a whale in space, through a porthole, by alphonse mucha:75 | by andy warhol:25, control the soul, trending on artstation --no plants

Hints and tips:

- Provide as much detail as possible
- Go as abstract and absurd as you like
- Doesn't do realistic human faces well
- Celebrities are purposefully scrambled
- Most images don't stand up to close scrutiny
- Anything disturbing, distressing, or offensive
- Make multiple variations to find one you like
- Remember to upscale the image you select
- Check copyright and commercial use restrictions
- Text always comes out as garbled gobbledygook
- Look at what others are doing for inspiration
- Use this to ideate and write better creative briefs
- It's all about trial and error - keep experimenting!
- Prompts must be 400 characters or less
- Style changes also change what objects are in the image
- Steal the look and feel of popular films / TV shows
- Fix parts of images by uploading, erasing and reprompting
- Use outpainting to extend images then stitch them together later
- Keep images "on brand" by using a consistent seed image
- Make variations of variations to "evolve" into unexpected territory
- Multiple characters in a scene tends to merge their features
- Use GPT-3 (AI Text Generation) to come up with prompts

Terminology:

- | | |
|---------------|--|
| Prompt | text you input to get image |
| Zero Shot | no example given |
| One Shot | upload a seed image |
| Inpainting | fill in a section of an image |
| Outpainting | fill in around an image (also called "zoom out") |
| Infinite Zoom | keep outpainting to "zoom out" of an image |
| Unbinding | describe a style (i.e. "using thick swirly brush strokes") |
