FEATS OF EXPLORATION: A-TEAM

Procedure: Total the sum of how much XP all PCs need to advance from the start of the level at which they are currently to the next level. That number is constant until a PC gains a level. When a PC achieves a feat, the entire party is awarded the percentage listed of that total. Divide that number by the number of players present during the session to arrive at the per-PC share.

How to Use the Sheet: 1) Input the Total Party XP Needed into the outlined cell. The four award percentages will populate in their respective fields. 2) Note the number of instances of feat achievements in the appropriate fields. Blacked out fields indicate that level of award does not apply for the given feat. XP values will populate in their respective fields, and then output a Total XP award for the party. 3) Input the number of players who attended. This will divide the Total XP award and output a per-PC XP award.

Session: 57 | Total Party XP Needed: #REF!

FEAT	DEFINITION	2% No. of Instances	#REF!	5% No. of Instances	#REF!	10% No. of Instances	#REF!	15% No. of Instances	#REF!	DESCRIPTION
Rumor	Confirm a rumor's veracity	1	#REF!							Craas has made a deal with the WDC
Quest	Complete a quest	■	■					■	■	
Location	Discover an important location					■	■	■	■	
Trap	Overcome a trap					■	■	■	■	
Puzzle	Solve a puzzle			■	■	■	■	■	■	
Secret	Find a secret or interpret hidden lore			■	■			■	■	
Faction	Manipulating or crippling a faction to your benefit	■	■					■	■	
NPC	Interact beneficially with an important NPC when stakes are at play			1	#REF!	■	■	■	■	Conversed with Craas without getting killed
