jogurchak@stackpharmacy.com	<b>Jonathan Ogurchak</b>	STACK	Elective, non-patient: specialty pharmacy, technology, entrepreneurship	<b>Specialty Pharmacy</b> Through participation in this virtual APPE rotation, student pharmacists will -Discuss the functional, operational, and logistical aspects of the specialty pharmacy industry segment -Investigate the roles that a pharmacist can play in building clinical programs, drug commercialization strategies, and supply chain management -Strategize the roles of drug pricing, fee-for-service, and affordability as it relates to the patient experience  <b>Pharmacy Technology &amp; Entrepreneurship</b> Through participation in this virtual APPE rotation, student pharmacists will -Discuss hands-on aspects of starting, building, and running a pharmacy related enterprise -Build a sample business plan for a health-tech ideas -Gain an understanding of the elements needed to manage an organization, including interviewing, performance management, and goal setting		
ratim@sandiego.edu	<b>Regina Atim</b>	Clinicians Touch Healthcare Solutions	Healthcare Informatics			
mmelson@digitalpharmacist.com	<b>Mallory Nelson</b>	Digital Pharmacist	Product Management			I'm a pharmacist / product manager at Digital Pharmacist. My current product is a HIPAA compliant messaging tool. We work with over 500 pharmacies and help them communicate with their patients. The student would be communicating with pharmacies, understanding how we can improve the product and relationship with our pharmacies. This is a great opportunity to learn about technology and how it intersects with pharmacies and patients.
hillary.blackburn@dispensaryofhope.com	<b>Hillary Blackburn</b>	Dispensary of Hope	Management, Mission/Public health, Managed care	Dispensary of Hope is a nationally focused charitable medication distributor headquartered in Nashville, TN. We work with pharmaceutical companies to donate medicine and distribute it to hospitals, clinics, and pharmacies for their low income uninsured.		Available only in Spring 2021
seanoneill@bainbridgehealth.com	<b>Sean O'Neill</b>	Bainbridge Health	Informatics	Bainbridge Health is a startup that was spun out of the Children's Hospital of Philadelphia. We work with acute care hospitals and focus on taking data from technologies involved in medication administration to identify ways hospitals can a) prevent medication errors and b) identify waste and inefficiencies. The rotation would involve working with the clinical team to provide support to customer engagements. As a small startup, the student will also gain experience with what it is like to build a company from the ground up.	1	
aaguerra@dmacc.edu	<b>Tony Guerra</b>	Des Moines Area Community College	Academic	Academic Career/Teaching/Scholarship Preparation 1. Career – Finding/understanding future teaching/administrative/clinical opportunities inside and pharmacy academia and other. 2. Teaching – Teaching in residency as an instructor/preceptor, developing a potential residency abstract and teaching philosophy. An active participant and leader in preparing and presenting lectures, syllabi, quiz and exam questions, preparing lab equipment, grading assignments, evaluating course curricula. 3. Scholarship – Involved with reading, reviewing, revising, and writing submissions for publication.	4	I currently have agreements with Drake, University of Iowa, and Creighton but am willing to work with others. Follow up with a text/call to 410 299 7522 if you don't hear back from the email.
richard@vucahealth.com	<b>Richard Waithe</b>	VUCA Health	Digital Health	VUCA Health has the largest library of patient medication education videos that serves pharmacies, health systems, and health plans. Students will be able to create patient-centered content as the medication expert (collect and interpret evidence, prioritize, formulate, and communicate effectively). The student will also gain an understanding of operating a business, leading a team, and developing a marketing strategy, and media distribution.	1 per school	
sally@birthcontrolpharmacist.com	<b>Sally Rafie, PharmD, BCPS, APb, NCMP, FCCP</b>	Birth Control Pharmacist	Community Practice, Health Communications and Advocacy	The rotation can be tailored to meet the requirements for a community practice or elective rotation depending on student needs. Students will have the opportunity to practice clinical service delivery in a community pharmacy setting, as well as contribute to advocacy and educational efforts to advance pharmacist roles in contraception care nationwide. This rotation may be completed remotely (in which case there will be no direct patient care).	1 student per school	
hello@megannichole.com	<b>Megan Freeland</b>	StockRose Creative, LLC	health/medical writing	StockRose Creative, LLC is a healthcare copywriting and content marketing company. Through StockRose, students would write long-form health and medical articles, typically for a consumer audience. The process would entail detailed background research on pharmacy-related or medical topics, as well as drafting content and organizing it in an effective way.	No more than 2 students per rotation	
tmagnifico57@gmail.com	<b>Thomas Magnifico</b>	Keystone Pharmacy	Veterinary Pharmacy and Compounding	This virtual rotation would be focused on providing services to veterinary patients. What services are provided to patients and their owners, how to work and understand the world of veterinary medicine. Reviewing veterinary prescriptions for dosage, and how to counsel pet owners on administration. Both commercial medications, human and veterinary, and compounded medications would be part of the rotation.	1 at a time	Veterinary pharmacy is an ever growing segment of our profession. Presently pharmacists are not well trained in this area. If there is any instruction in our pharmacy schools, it is on an elective basis. We will be handling more veterinary prescriptions in the future for a number of reasons, so as pharmacists we must educate ourselves to provide quality care to these patients.
pam@mindfulmeds.com	<b>Pam Tarlow, Pharm.D.</b>	Santa Monica Homeopathic Pharmacy	Elective	Integrative health pharmacy Dash nutrition, vitamins, minerals, herbs, homeopathic, meditation, social media, branding, teaching.	2	Highly motivated and open minded students please. No previous experience in natural medicine needed.
monica.orsborn@ihs.gov	<b>Monica Orsborn</b>	IHS Fort Belknap Service Unit	Ambulatory	This rotation will provide a learning experience working with a unique underserved population. The student will be engaging with the Native American population while contributing to the expansion and growth of Pharmacy Clinical Services. The students will collaborate with primary care providers to optimize patients' ambulatory patient care. In addition to perform tasks such as educational in-service and journal club presentations.	1 student per block	We have been offering virtual internships for 2 years. This APPE's goal is to provide the students with opportunities to develop safe and effective pharmacotherapy skills while optimizing patients' outcomes.

<b>Background</b>	In order for pharmacy students to graduate from their respective schools, they must meet certain rotation hours. Due to the coronavirus, many students are seeking their rotations terminated!

3/29/2020 22:04:31	smorgan@340BCompliancePartners.com	Yes	Sherri Fabee	340B Compliance Partners	Management (Institutional) / Leadership			Own my own business but Institutional DOP for 13 years, range from small hospital to Academic Medical Center. I worked in WV, OH, FL and FL Consultant license
3/30/2020 7:16:23	kbackus@unc.edu	Yes	Kandis V. Backus	University of MS Medical Center	Out patient HIV and HIV prevention (PrEP)			
3/30/2020 8:32:35	ogurchak@stackpharmacy.com	Yes	Jonathan Ogurchak	STACK	Elective, non-patient: specialty pharmacy, technology, entrepreneurship			
3/30/2020 8:54:00	lelechagawa@hotmail.com	Yes	Kelechi Agawa	CVS Health	Leadership, Community			
3/30/2020 12:13:31	wilson.tam@chchealth.com	Yes	Wilson Tam	CHC Health	MTM - Med Sync	CHC Health is a Clinical Pharmacist Services firm dedicated to transforming the future of pharmacy and offers a 5-week APPE rotation designed to provide the student pharmacist a well-rounded learning experience in which the student will be engaging with patients, finding solutions to medication-related issues, collaborating with pharmacists and physicians, and delivering high quality patient-centric care that improves overall health outcomes while managing costs. The student will work with patients telephonically to communicate with patients, health providers, and pharmacies.		CHC Health is one of the largest providers of pharmacist services in the US, with medication management, synchronization and adherence programs. CHC Health's 400+ clinical pharmacists leverage their unique skills in medication knowledge while collaborating with patients, caregivers and the entire healthcare team to improve health outcomes while decreasing overall costs.
3/30/2020 19:29:14	ratim@sandiego.edu	Yes	Regina Atim	Clinicians Touch Healthcare Solutions	Healthcare Informatics			
3/30/2020 19:49:24	mnelson@digtalpharmacist.com	Yes	Mallory Nelson	Digital Pharmacist	Product Management	This rotation provides an introduction to the basic principles of clinical informatics and their application to Health Information Technology (HIT) in relation to pharmacy practice. Students will learn how clinical knowledge is incorporated into HIT design and implementation to increase efficiency and patient safety of the various processes in the clinical setting. Management, communication, and change management skill development will be tailored to the student's interests. By the end of the rotation, students will be able to describe the function of various information systems, clinical decision support tools, and safety and quality improvement processes.		I'm a pharmacist / product manager at Digital Pharmacist. My current product is a HIPAA compliant messaging tool. We work with over 500 pharmacies and help them communicate with their patients. The student would be communicating with pharmacies, understanding how we can improve the product and relationship with our pharmacies. This is a great opportunity to learn about technology and how it intersects with pharmacists and patients.
3/30/2020 22:40:53	rcchan@sentara.com	Yes	Raymond Chan	Sentara Healthcare	Clinical Informatics			Might be opportunities to co-precept students 2 and share educational materials

3/31/2020 7:21:22	seanonell@bairbridgehealth.com	Yes	Sean O'Neill	Bairbridge Health	Informatics	Bairbridge Health is a startup that was spun out of the Children's Hospital of Philadelphia. We work with acute care hospitals and focus on taking data from technologies involved in medication administration to identify ways hospitals can a) prevent medication errors and b) identify waste and inefficiencies. The rotation would involve working with the clinical team to provide support to customer engagements. As a small startup, the student will also gain experience with what it is like to build a company from the ground up.		1 We would love to virtually precept! We did it prior to COVID19 and currently have one student virtually from Rhode Island.
4/1/2020 9:10:40	rebeka.conwee@ncods.org	Yes	Michael Raff, Ioshua Nubia	NCODA - National Community Oncology Dispensing Association	Association Management	See our website: <a href="https://www.ncods.org/association-management-advanced-pharmacy-practice-experience/">https://www.ncods.org/association-management-advanced-pharmacy-practice-experience/</a>		1 I typically precept Belmont University College of Pharmacy students but they have April off so I love to have someone!
4/1/2020 13:31:21	hillary.blackburn@dispensaryofhope.org	Yes	Hillary Blackburn	Dispensary of Hope	management/mission/public health/Managed care	Dispensary of Hope is a nationally focused charitable medication distributor headquartered in Nashville, TN. We work with pharmaceutical companies to create medicine and distribute it to hospitals, clinics, and pharmacies for their low income uninsured. Job engagement, Burnout, Work Satisfaction, Entrepreneurship, and Innovation		2
4/1/2020 14:04:19	alexmichaelbarber@gmail.com	Yes	Alex Barber	The Happy PharmD	Medical Writing	This rotation will prepare a student to create a continued education program that our company will deliver. In addition, the student will create outline written content that supplements this CE program. This student will research topics, gather relevant information, summarize into a presentation outline, then create and deliver a presentation as a final project. If the student has an interest, this rotation will also teach the fundamentals of building a new service or product as a business, as a student, you'll learn the basics of starting a service or product, scaling an idea, and hiring a team.		1 <a href="https://www.youtube.com/watch?v=388888888888">Here is a video about this rotation: https://www.youtube.com/watch?v=388888888888</a>
4/1/2020 14:20:00	patrick.ryan@gmail.com	Yes	Patrick Ryan	N/A	Emergency Medicine / Intensive Care Medicine	Academic Career/Teaching/Scholarship Preparation 1. Career - Finding/Understanding Future teaching/Administrative/Clinical opportunities inside of pharmacy academia and other 2. Teaching - Teaching in residency as an instructor/preceptor, developing a potential residents abstract and teaching philosophy. An active participant and leader in preparing and presenting lectures, syllabi, quiz and exam questions, preparing lab equipment, grading assignments, evaluating course curricula. 3. Scholarship - involved with reading, reviewing, writing, and writing submissions for publication.		4 I currently have agreements with Drake, University of Iowa, and Creighton but am willing to work with others. Follow up with a text/call to 313 299 7522 if you don't hear back from the email.
4/1/2020 15:42:09	agauewa@dnacc.edu	Yes	Tony Guerra	Des Moines Area Community College	Academic	To gain a greater appreciation for the complexity of community pharmacy practice. Develop practical clinical skills that will allow the student to enhance the quality of life of patients and pharmaceutical care in the community setting. Enhance communication skills when dealing with patients and other health care providers. Foster life long learning experience.		My goal is to enable students to provide safe and effective pharmacotherapy plans, optimize patients' outcomes, assure safe and accurate preparation, dispensing of medications, and provide health care information, and promote public health.
4/1/2020 20:54:30	nmilypark@gmail.com	Yes	Nitay Parkh	Rite Aid Pharmacy	Management, Leadership			2 or more
4/1/2020 22:35:49	monikafg@yahoo.com	Yes	Mona Farghaly	Walmart Pharmacy	Community Pharmacy	Retail/Community pharmacy experience		1
4/2/2020 1:08:54	richard@vuahealth.com	Yes	Richard Wathe	VUCA Health	Digital Health	VUCA Health has the largest library of patient medication education videos that serves pharmacist, health systemic, and health plans. Students will be able to create patient-centered content as the medication expert (collect and interpret evidence, prioritize, formulate, and communicate effectively). The student will also gain an understanding of operating a business, leading a team, and developing a marketing strategy, and media distribution.		1/School
4/2/2020 11:18:27	maryroth@mail@gmail.com	Yes	Mary Rothermal	Schmidt & Sons Pharmacy	Community pharmacy and Community pharmacy leadership			I'd love to share MTM opportunities with an APPE 1 student. These encounters can be done virtually.
4/2/2020 12:19:49	ken@rivipconcege.com	Yes	Ken Bernfield	RVIP Conceivege Pharmacy	Ambulatory care	Students will be able to work collaboratively with physicians and perform ambulatory patient care tasks remotely.		24 students per school
4/2/2020 20:18:57	bleonar@apothecademy.com	Yes	Brian Leonard	Apothecademy LLC	Entrepreneurship	Learn how to create your own small business including idea generation, implementation, marketing, and financial feasibility. The rotation can be tailored to meet the requirements for a community practice or elective rotation depending on student needs. Students will have the opportunity to practice clinical service delivery in a community pharmacy setting, as well as contribute to advocacy and educational efforts to advance pharmacist roles in contraceptive care nationwide. This rotation may be completed remotely (in which case there will be no direct patient care).		3 Meets ambulatory care requirements
4/2/2020 22:36:01	sally@birthcontrolpharmacist.com	Yes	Sally Raffe, PharmD, BCPS, ACP, NCMJ, FCP	Birth Control Pharmacist	Community Practice, Health Communications and Advocacy			1 student/block
4/1/2020 1:19:34	awno_owor@yahoo.com	Yes	Hellen owor-owor	Walmart	Community pharmacist	Engaging patients, Medication therapy management, counseling, Pharmacy operations		I am a community pharmacist in California. I am happy to help our students get through this rough time. I believe we can all contribute to advance our profession by stepping up and taking this role to assist these students.
4/3/2020 12:25:53	StudentProgram@xenda.com	Yes	Cheley, Campbell	Xcenda	Managed care/Industry	This practice experience is designed to provide the PharmD candidate with a basic understanding of the clinical, economic, and humanistic outcomes of healthcare interventions, focusing on pharmacoeconomics and health care quality measurement. Didactic and practical experience in these core areas will expose the student to a variety of competencies utilized in a health outcomes research and managed markets consulting firm.		IMPORTANT NOTES: 1. We are only open to offering a complete APPE rotation experience for students who have had rotations cancelled due to COVID-19 and cannot find a new experience through their school. 2. We are not offering internships; these are an application-only experience and do not currently offer volunteer opportunities. 3. The virtual opportunity is only open to students who are in need of a rotation to graduate, or our normal APPE rotation is application based.

4/4/2020 7:25:31	elliott.aarach@uhcinc.com	Yes	Elliott Aarach	UHS - Devent Springs Hospital	Institutional - Hospital/Pharmacy	Virtual Rotation—soap notes, projects, topic discussion, and journal club to give student hospital/pharmacy experience	2		
4/4/2020 13:56:56	barry.mccain@ash.org	Yes	Barry McCain	Advocate Aurora Health Care	Informatics	Pharmacy informatics in a multi hospital system. I currently have affiliations at two colleges of pharmacists. StockRose Creative, LLC is a healthcare copywriting and content marketing company. Through StockRose, students would write long-form health and medical articles, typically for a consumer audience. The process would entail detailed background research on pharmacy related or medical topics, as well as drafting content and engaging it in an effective way.	2	I am open minded to trying a virtual rotation, particularly in this complicated time. Feel free to reach out to me.	
4/4/2020 19:43:26	hello@meganishole.com	Yes	Megan Freeland	StockRose Creative, LLC	health/medical writing	This virtual rotation would be focused on providing services to veterinary patients. What services are provided to patients and their owners, how to work and understand the world of veterinary medicine. Reviewing veterinary prescriptions for dosage, and how to counsel pet owners on administration. Both commercial medications, human and veterinary, and compounded medications would be part of the rotation.	No more than 2 students per rotation	Veterinary pharmacy is an ever growing segment of our profession. Presently pharmacists are not well trained in this area. If there is any instruction on our pharmacy schools, it is on an elective basis. We will be handling more veterinary prescriptions in the future for a number of reasons, so as pharmacists we must educate ourselves to provide quality care to these patients.	
4/4/2020 20:42:44	tmagnifico57@gmail.com	Yes	Thomas Magnifico	Keystone Pharmacy	Veterinary Pharmacy and Compounding	Keystone has offering Remote APPE Pharmacogenomic (PG) Elective rotations for several years. We also delivered AmCare rotation at practice sites in Bethlehem, Long Island and Great Neck, Long Island since 2016 for Schines, Touro, University at Buffalo, Cuyahoga and a handful of others. With COVID19 closing our practice sites, we pivoted the AmCare rotation to a TeleHealth course that meets all requirements of our previous approved syllabus. We continue to offer our PGx Remote elective rotation as well via TeleHealth. Since announcement on March 23th by CMS relating telemedicine guidelines for physicians, our collaborative business model allows us to continue and increase our core deliverables in this rotation. Over the last 10 days, over a dozen additional colleges of pharmacy and universities have reassigned their students to RXPV Conierge as our capacity exceeds One Hundred (100) seats in our classrooms for all segments of all schools.	1 or a time		
4/4/2020 21:37:26	ken@rxpvcconierge.com	Yes	Ken Stern MD, Crystal Cruz, Jason Cavallina, R RXPV Conierge	APPE - Advanced Practice TeleHealth		The Pharmacy Programs learning experience is designed to provide students with a comprehensive overview of the role of a pharmacist in population health programs. The focus is on engaging students to Value-Based Care Payment Arrangements and Quality measures, Health Plan Drug Utilization Management, Population Health Program Administration, strategic planning and problem solving. The student will participate in various Population Health Pharmacy Program work and initiatives that may include Quality or Process Improvement programs, data analytics. The student will work with multidisciplinary population health program teams that may include medical, nursing, pharmacy, administrative, telehealth, post-acute, safety, data analytics, informatics and clinical quality improvement stakeholders. The student will develop competency in the management of large clinical data sets, dashboards and data analytics. The student will develop competency in quality and process improvement problem-solving, planning and program development. The student will contribute to pharmacy program content and development and serve as a medication information resource. The experience will culminate with a presentation to various stakeholders. 3 major learning objectives 7 Understand Value-Based Care Contracting and related Quality Measures. 8 Develop Understanding and Competency in the management and analysis of large clinical data sets and dashboards for the purpose of research and process improvement. 9 Develop Competency in quality and process improvement problem-solving, planning and program development.	100 +

4/13/2020 12:57:46	marty@matchstick.com	Yes	Marty Coyne	Matchstick	Industry (Pharma), Med Comm, Med Safety	We are an intentionally small, focused consultancy working on a variety of research activities designed to help our clients understand how patients use delivery devices, support materials, and manage chronic disease. Our relations have aspects of Medical Communications/Writing, Community Pharmacy, Acute Care Pharmacy, Medical Affairs, Med Safety, and Health Informatics. Our clients are the largest clinical firms in the world, and students will have interactions with clients and our whole team with engineering, science, clinical and human factors backgrounds. We say, we have a growing list of projects, and are fully remote due to COVID. We offer an outstanding, carefully crafted experience for those looking for industry/pharma roles post-graduation, or those that are truly interested in evaluating if an industry role is right for them. Our site is highly selective as APPE students are given real client projects and full responsibility for execution, supported by expert coaching from our team. Combination products (drugs that are packaged in delivery devices at the point of manufacture), are used to treat autoimmune diseases, diabetes, cancer, Alzheimer's, Parkinson's, respiratory diseases, cardiovascular diseases, eye diseases, rare diseases, and an increasing amount of other disease states every day. Drug delivery goes beyond the device and includes patient starter kits, instructions for use, and education materials designed to reduce the burden of disease management. We've also worked with teams to develop "smart" devices with adherence features, and with neuroscientists to create new interventions rooted in behavioral science to address medication non-adherence. You will have patient interaction through a variety of research activities designed to help our clients understand how patients use delivery devices, support materials, and manage chronic disease. Each of our projects is at the forefront of specialty pharmaceuticals and chronic disease, and there is no "right" answer to what we do. As a result, our approaches are often unconventional and based on triangulation of sources to make good inferences. However, they also need to be robust, data-driven, and medically correct - the patients, caregivers, and clinicians we serve deserve nothing less. The right person for this role will feel exhilarated jumping into an unfamiliar disease area, treatment, or drug delivery approach.		This is an indirect patient experience. Access to PHI may be limited. However, we currently have a public health interest working with us remotely and have been successful providing a robust 2 experience.	
4/14/2020 10:47:20	pam@mivofulmeds.com	Yes	Pam Tarlow, Pharm.D.	Santa Monica Homeopathic Pl Elective		Integrative health pharmacy Dash nutrition, vitamins, minerals, herbs, homeopathic, meditation, social media, branding, teaching CEImpact creates learning experiences that empower pharmacy professionals and support their lifelong learning journey. This election rotation will provide experience in developing continuing education courses, peer reviewing content created by subject matter experts, and assisting pharmacists and pharmacy technicians in connecting learning to practice through international resources and practice tools.	6+	Highly motivated and open minded students please. No previous experience in natural medicine needed.
