How to use this planner to clear monthly

+ Want to plan your own monthly run without too much info? **Make a copy of this Planner like ----->**

+ Columns with green header background is meant to be written by you. **Like this**

+ After downloading/copying the sheet, you can fill out YOUR Champs-Relics for extra functionalities for the **Planner**, including the ability to choose relic sets for your champs!

+ The Monthly **Guide** is included if you want more detailed info on what to use and strategies to win with! (no download/copy needed) If you want unhide columns for additional info, download/copy the sheet.

+ Want to use "an ideal monthly lineup" to avoid thinking, assuming all champs and relics? Check out the **Lineup Generator** made by me, using PetiB's data!

+ Want to see how your statistics when compared to other players? Check out **YOUR Statistics**, made by me, using PetiB's data!

+ The Difficulty Rating system is based on my "perceived" difficulty of enemy champions and stage powers to combine into an automatically calculated number and should be used to compare stages with each other. Combine with a second round of difficulty judging (0-3 scale) afterwards for accuracy!

Basic tips for clearing monthly

+ Clear the **blue** highlighted stages FIRST to unlock more stages (3 unlocks 4-5-6, 6 unlocks 7-8-9, etc.), totaling 23 stages to unlock all 70 stages.

+ Focus on clearing highlighted/hard stages first with strong champs and leave weaker champs for stages in-between.

+ Add up the number of champs you can reliably use (2 stars and up, level 13+) and multiply by 3 to assess from which stage you'll work backwards from

- Example: 20 champions -> 3*20 = 60 stages -> Work backwards from Stage 60.

+ **Level 20 is ideal for monthly** to ensure you draw a champ in your starting hand. Some champs spike in power before that, but to be useful for hard stages, like 30 and beyond, having champ consistency is core. It takes 17680 EXP for level 20, 31760 for 25, 51290 for 30. (**34.47% max EXP - level 20**, 61.92% - 25)

+ The stage's difficulty ramps up at roughly stage 30 (not consistent) so feel free to use your strongest champs to clear the 3rd stages (30-33-...-45-48, etc.) if the "counter" seems unreliable

+ Treat 3-stars difficulty the same as 4 and 4.5 stars difficulty because they can be similarly difficult, often only marginally easier due to having -10 health and -1 starting mana from no Vicious Enemy mutator.

+ [A way to grind champion level is clearing the first 3 stages of Thresh adventure and quitting out, maximizing EXP gain per stage for 770 exp/3 fights \(256/win\) OR first 5 maps of Aurelion Sol for 2015 exp/5 fights \(403/win\) Refer to the Path of Champions XP Chart made by u/ShadowStriker250 for more details, including how many runs you need to level a champion up](#)

- Equipping (greater) cosmic pearl gives you +1 starting mana that helps you during the grind, and isn't spent when you quit. (note: will be patched out in 5.5)

+ If you find that the champs you have that utilizes the stage's powers (like discount) are too weak, use your strongest champs like Jinx, Aurelion Sol instead.
