Because congregate setting naming conventions, definitions, and categorizations vary across and even within states, this document notes the terminology used in each primary source.

Acronyms used include the following:

LTCF	Long-Term Care Facility	Usually includes SNFs and ALFs, but may be more broadly defined
ALF	Assisted Living Facility	Similar or synonymous to RCs and PCHs
NH	Nursing Home	Usually synonymous with SNFs
SNF	Skilled Nursing Facility	
RC	Residential Care Facility	Similar or synonymous to ALFs and PCHs
ACF	Adult Care Facility	
PCH	Personal Care Home	Similar or synonymous to ALFs and RCs
ICF/IID	Intermediate Care Facility for Individuals with Intellectual Disabilities	

Coding State Reporting

0	The state does not provide information about Covid-19 outbreaks in congregate care settings in any centralized, accessible location.	
1	The state provides only state-wide totals of facilities affected, cases, or deaths in congregate care, or a combination thereof.	
2	The state provides county-level totals of facilities affected, cases, or deaths in congregate care, or a combination thereof.	
3	The state provides the names of congregate settings with outbreaks, but does not provide the numbers of cases or deaths by facility.	
4	The state provides either cases or deaths, enumerated by facility.	
5	The state provides both case and death counts for each affected facility.	
6	The state provides case and death counts as well as race, age, and gender data, by facility.	Our ideal category, this does not exist in any state

Coding Decisions

Where the only case or death counts available were combined resident + staff, we coded these states as reporting exclusively resident data and no staff data. Our rationale was that the majority of cases and deaths are residents, so combined totals approximate resident totals but do not convey useful information about the extent of impact to staff

Most states report data in tables that are regularly maintained and reachable via an evergreen web address. Some states (Delaware, Maine..) report data via press releases or video updates instead. As long as the reporting is located in consistent and predictable location on a government site, those states have been included in our tables.

Psychiatric Facilities and Institutions for People with Intellectual or Developmental Disabilities

As with other kinds of institutions, terms and definitions vary across states. In addition, facilities often serve both people with mental illness and people with developmental disabilities. Coding decisions reflect our best attempt to categorize facilities appropriately.

States reporting data about some facilities for people with developmental disabilities are not necessarily engaging in comprehensive reporting about all facilities serving these populations in the state. Our ranking does not capture the comprehensiveness of the kinds of facilities included in reporting. Where a kind of facility is reporting, we capture the detail of the data provided.

Finally, a disclaimer: state reporting changes daily. Not only are numbers updated, but the presentation and detail of the data is frequently altered, for better and for worse. The links and descriptions provided here were current as of the date indicated.
