Would you like to help update data and maybe add some additional features?

Looking to add more hospitalization + ICU data - both capacity and numbers

[1] Following Centers for Disease Control and Prevention guidance, beginning November 6, 2020 and going forward, IDPH will report confirmed cases and probable cases combined. A confirmed case is laboratory confirmed via molecular test. A probable case meets clinical criteria AND is epidemiologically linked, or has a positive antigen test. If a probable case is later confirmed, the case will be deduplicated and will only be counted once. Probable deaths and confirmed deaths will continue to be reported separately.

[2] Beginning November 6, 2020 and going forward, IDPH will report confirmed cases and probable cases combined. Due to this change, all probable cases previously reported separately, 7,673, have been added to the one-day, November 6, 2020 total of new cases.

[3] Adjusted to remove past probable cases that were not actually tested on this day

[4] Back filled 66 deaths that were reported 1 day late.

[5] 1800 Probable Past NJ Deaths
