

# SCHOLARLY & POPULAR SOURCES

**Introduction:** For her annotated bibliography assignment, Kat is asked to locate reliable sources related to her research interest. She is interested in researching park prescription programs and what benefits they may have especially on low-income families.

For this assignment, Kat must include both scholarly or popular sources and accurately identify the source type.

## **Part I:**

Kat has located four items. Skim the sources and work with your peers to determine the following:

Is the source scholarly or popular? Why did you come to this conclusion?

Comment on whether or not each source is relevant for Kat's research.

Comment on whether or not you would consider each source to be credible.
