EXCEL VERSION | This version works in Microsoft Excel, but is a slightly larger file and takes a bit longer to process. Otherwise, functions the same. ALSO, it needs a space after the last word. Happy translating!

Input: put your text here!

Syllable Breaks? Yes

Aarakocra pesth chic shutt pa-juo

Instructions

This can handle up to 483 words.

The max word size is 31 characters. It will just shoot it to the output if it gets this long.

DEV ONLY! If you want to add a language, begin adding in cell J55. There are 16 slots for new languages.

DEV ONLY! Then add "Ancient, Brash, Elegantm or Monsterous" to the right of said new language.

DEV ONLY! If you want a different set of translations, you may edit cell E12, it must be at least 10 character
