76	Investigate how to make our newsletters searchable.	Gary Rappaport	11/17/2020	In Progress		Gary has been working with one of Microsoft's vendors (ECF Data) about how SharePoint could satisfy our requirements. Pete has exchanged several emails with Joe Criner (ECF Data) and on Jan 11 attended a brief demo of SharePoint. However neither the demo or any of the accompanying YouTube links actually demonstarte the search feature that we are looking for. Pete plans to send Joe Criner several of our newsletters (PDFs) along with 5 search words and ask for a more specific demo. On March 25 Pete sent 5 newsletters to Joe Criner and asked him to schedule a demo of the search capability. 4/T - Pete attended a meeting with Joe and one of his technicians to understand how they planned to meet our requirements. 4/8 - Joe sent Pete an estimate (\$4,500) for what it would cost to set up the demo; that environment could then be used for our website. 4/16 - Pete told Joe that his estimate was outside of our budget, Joe said he would fry to reduce the configuration cost. 4/16 - Pete and Gary attended a demo of the "Archive in a Box" solution that uses OCR (optical character recognition). They charge \$1.15 per page and we have 263 pages that need to be scanned (our newsletters that have not been converted to PDFs). However they have a 1,500 page minimum for any job. 9/21: Gary reported that he has been looking at using Adobe Pro but we would still need to scan the old newsletters, will people really use this search tool ? 1/18/2022 - Gary has identified Advantage Archives as a possible company to scan our newsletters and use OCR to make them searchable. Gary needs to determine the hosting costs.
